RE: Boyes Boulevard Bridge Mitigation, Watering and Plant Maintenance project. (County Project #M24004)

The Sonoma County Public Infrastructure Department (SPI) received bids for the Boyes Boulevard Bridge Mitigation, Watering and Plant Maintenance project on January 20, 2026. The apparent low bidder was Hanford Applied Restoration and Conservation and Bortolussi & Watkin, Inc. was the apparent second low bidder.

After reviewing the bid amounts and reviewing available funding options, there are insufficient funds to proceed with the project. Accordingly, the County intends to reject all project bids, per Public Contract Code Section 22038. The law requires the County to inform the apparent low bidder of the agency's intention to reject the bid. The Sonoma County Board of Supervisors is scheduled to decide whether to reject the project bids at its meeting scheduled for May 12, 2026. Further details for the meeting and action, including time and location, will be available on the public agenda, which will be posted and available at <https://sonoma-county.legistar.com/Calendar.aspx> as required by law.

If all bids are rejected, the project may be abandoned or the SPI Department may choose to modify the plans and specifications to potentially readvertise the subject project in the future. Thank you for your interest in this project. Apologies for any inconvenience this has caused.

Sincerely,

Johannes J. Hovertsz, SPI Director
