Landfill Settlement Agreement Funds - City Contingent Liability Funds

Ms. Rivera

The City of Santa Rosa is requesting disbursement of excess City Contingent Liability Funds in the amount of \$1,076,000 to support community maintenance and resilience activities. Over the past two years, the City has been reorganizing citywide landscape maintenance response, activities and staffing in an effort to create a more comprehensive and organized approach. This new organizational model was initiated in FY 2024-25 and has demonstrated the need for additional contract support to achieve the anticipated organizational standards. The additional funds will support contract services to address landscape areas along high-traffic city-maintained roads that require additional maintenance and have become draws for litter and debris of all kinds resulting in an appearance of blight begets blight.

Please feel free to contact me if you have any questions about this request.

Regards,

Jason Nutt
Assistant City Manager
