

## **DRAFT Agreement for Russian River Estuary Adaptive Management Plans and Habitat Enhancement Feasibility Study**

This agreement ("Agreement") is by and between **Sonoma County Water Agency**, a body corporate and politic of the State of California "Sonoma Water" and **Environmental Science Associates**, a California corporation ("Consultant"). The Effective Date of this Agreement is the date the Agreement is last signed by the parties to the Agreement, unless otherwise specified in Paragraph 5.1.

### **RECITALS**

1. Consultant represents that it is a duly qualified and licensed environmental science and engineering firm, experienced in the preparation of coastal engineering designs and ecological evaluations and studies and related services.
2. Three species of salmon in the Russian River are listed as threatened or endangered under the Endangered Species Act of 1973, as amended (ESA): Central California Coast (CCC) coho salmon, CCC steelhead, and California Coastal (CC) Chinook salmon.
3. On September 24, 2008, the National Marine Fisheries Service (NMFS) issued its Biological Opinion for Water Supply, Flood Control Operations, and Channel Maintenance (2008 Biological Opinion) conducted by the United States Army Corps of Engineers (Corps), Sonoma Water, and the Mendocino County Russian River Flood Control and Water Conservation Improvement District (2008 Biological Opinion).
4. The 2008 Biological Opinion for the Russian River required that Sonoma Water collaborate with NMFS to modify estuary management practices to reduce marine influence during the summer, promote a higher water surface elevation, and improve water quality in the estuary to enhance rearing habitat for steelhead. It also required development of annual adaptive management plans for estuary management.
5. On April 29, 2025, NMFS issued its second Biological Opinion for the Russian River Watershed Water Supply and Channel Maintenance Project by the Corps, Sonoma Water, and the Mendocino County Russian River Flood Control and Water Conservation Improvement District (2025 Biological Opinion).
6. NMFS found that the Proposed Action, including proposed estuary management, was not likely to jeopardize the continued existence of the federally endangered Central California Coast (CCC) coho salmon (*Oncorhynchus kisutch*) and Killer whale, Southern Resident DPS (*Orcinus orca*), or the threatened CCC steelhead (*O. mykiss*) and California Coastal (CC) Chinook salmon (*O. tshawytscha*). NMFS also concluded that the Proposed Action was not likely to result in the destruction or adverse modification of designated critical habitat for these listed species.
7. Under the Proposed Action, Sonoma Water will continue to adaptively breach the naturally forming bar that closes the beach inlet, will conduct physical and biological monitoring in

the estuary, and will implement habitat enhancement measures in the estuary to minimize the effects of bar breaching.

8. Sonoma Water develops annual Adaptive Management Plans that describe beach management measures that may be pursued by Sonoma Water in an effort to enhance the estuary for salmonid habitat and to minimize flood risk following river mouth closures.
9. Under this Agreement, Consultant will prepare the Adaptive Management Plans and a Habitat Enhancement Feasibility Study for the Russian River Estuary.

In consideration of the foregoing recitals and the mutual covenants contained herein, the parties hereto agree as follows:

### **13. DEMAND FOR ASSURANCE**

- 13.1. Each party to this Agreement undertakes the obligation that the other's expectation of receiving due performance will not be impaired. When reasonable grounds for insecurity arise with respect to the performance of either party, the other may in writing demand adequate assurance of due performance and until such assurance is received may, if commercially reasonable, suspend any performance for which the agreed return has not been received.  
"Commercially reasonable" includes not only the conduct of a party with respect to performance under this Agreement, but also conduct with respect to other agreements with parties to this Agreement or others. After receipt of a justified demand, failure to provide within a reasonable time, but not exceeding thirty (30) days, such assurance of due performance as is adequate under the circumstances of the particular case is a repudiation of this Agreement.

- 14.1. *Consent:* Neither party hereto shall assign, delegate, sublet, or transfer any interest in or duty under this Agreement without the prior written consent of the other, and no such transfer shall be of any force or effect whatsoever unless and until the other party shall have so consented.

- 16.3. *Construction:* To the fullest extent allowed by law, the provisions of this Agreement shall be construed and given effect in a manner that avoids any violation of statute, ordinance, regulation, or law. The parties covenant and agree that in the event that any provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions hereof shall remain in full force and effect and shall in no way be affected, impaired, or invalidated thereby. Consultant and Sonoma Water acknowledge that they have each contributed to the making of this Agreement and that, in the event of a dispute over the interpretation of this Agreement, the language of the Agreement will not be construed against one party in favor of the other. Metrics will also be used to evaluate the suitability of installing two to four in-stream habitat enhancement features (e.g., LWD structures and/or boulders) in the Estuary mainstem between Duncans Mills Bridge and the middle or lower Estuary. Metrics will relate to the 2025 Biological Opinion where appropriate and may include habitat criteria (e.g., hydrologic connectivity, water quality) and constructability considerations (e.g., potential costs, environmental compliance). Metrics will be developed in consultation with Sonoma Water and natural resource agencies.

Consultant will assist Sonoma Water in identifying three to five acres of wetland and/or floodplain enhancement areas to advance to conceptual design. This concept designs will include a limited number of plan, section, and/or detail figures to convey the design intent, earthwork estimates, and a rough order of magnitude cost estimate. The conceptual designs will be shared for feedback with the Working Group and will be documented in the Preferred Restoration Site Conceptual Design Memorandum.
- iii. Habitat Enhancement Feasibility Report.
