MEMORANDUM

TW: 24/25-046

DATE: April 1, 2025

TO: Grant Davis, General Manager

FROM: Parastou Hooshalsadat, Project Manager *PH*

SUBJECT: **Selection of Carollo Engineers, Inc. for Engineering and Design Services for Compliance Locations for the Water Treatment System Modernization – Compliance Locations Project**

Sonoma County Water Agency (Sonoma Water) recently completed an evaluation of existing water treatment facilities to meet process and system operational goals and regulatory requirements under current and future conditions. The evaluation included an assessment of the primary and backup facilities that comprise Sonoma Water's treatment system, which includes chlorination and corrosion control.

The assessment identified the Water Treatment System Modernization Project, which includes three distinct projects including compliance locations, to enhance water treatment system functionality, expandability, reliability, and resiliency at Shone Farm, Forestville Booster Station, the Wohler and Mirabel facilities, and the River Road facility.

Carollo Engineers, Inc. (Consultant) was selected from a list of qualified consultants developed from a competitive selection process. Attached is a memo that explains the competitive selection process.

Consultant was selected for the subject work based on its experience with design of a similar water quality treatment system and related services.

Internal bargaining unit staff are not being used for this work because work requires license, certification, or expertise that staff don't have.

The hiring of Consultant for this agreement causes no conflict of interest and is not based on any financial incentive provided to Sonoma Water or its employees and representatives.
