Subject: LCP Authorization for MPA Signage in Sonoma County

EXTERNAL

Dear **XXX**,

In collaboration with the State of California's Ocean Protection Council, we have been working to inform Californians about the statewide network of marine protected areas along our coastline. To meet this goal, we are developing informative marine protected areas signage for priority locations including harbors, marinas, coastal access points, and interpretive centers. Similar efforts have been carried out in recent years and additional State sponsored funds have been dedicated to supporting the development of regulatory and interpretive signage at remaining priority gap locations. The proposed project includes sites within the Coastal Commission's retained jurisdiction and local government LCP jurisdictions and therefore requires coastal development permits from the California Coastal Commission and the local permitting authority of Sonoma County LCP.

Section 30601.3 of the California Coastal Act allows for consolidation of coastal development permitting requirements with the Coastal Commission under these circumstances, if the applicant, local government and Coastal Commission agree to such consolidation. We have agreement from Coastal Commission staff, Cassidy Tuefel, to pursue this approach already and have previously successfully obtained Consolidated Coastal Development Permits for similar projects during 2015 and 2017 (CDP Nos. 9-15-0208 and 9-15-0731). We are now looking for additional authorization to add more signs at new locations during this next phase of MPA signage.

We are writing to you to simplify and expedite the permitting process for signs within your local jurisdictional authority. This can be achieved by allowing the State of California's Coastal Commission to handle the permitting through a consolidated permit for all state marine protected areas signs. We would like to obtain written approval from your local jurisdictional authority to include the proposed signs in the consolidated Coastal Commission permit. To expedite this matter, we request that your office completes and sends the following letter which is located below ***[in email or written format]***, back to us. The letter below outlines the signs proposed and agreed upon by the California Department of Fish and Wildlife and Ocean Protection Council for your area.

Please do not hesitate to call, should you have questions regarding this request. We look forward to hearing from you.

Regards,

Ella Merkle
