

MITIGATION MONITORING AND REPORTING PROGRAM

INTRODUCTION

CEQA and the State CEQA Guidelines (PRC Section 21081.6 and State CEQA Guidelines Sections 15091[d] and 15097) require public agencies “to adopt a reporting and monitoring program for changes to the project which it has adopted or made a condition of project approval to mitigate or avoid significant effects on the environment.” A mitigation monitoring and reporting program (MMRP) is required for the Cannabis Program Update because the EIR identifies potential significant adverse impacts related to the project implementation, and mitigation measures have been identified and adopted to reduce those impacts. Adoption of the MMRP would occur along with approval of the amendments to the Sonoma County General Plan and amendments to Sonoma County Code for the Sonoma County Comprehensive Cannabis Program Update:

PURPOSE OF MITIGATION MONITORING AND REPORTING PROGRAM

This MMRP has been prepared to ensure that all adopted mitigation measures have been incorporated into the Cannabis Program Update and would be implemented during construction and operation of individual projects. The attached table has been prepared to assist the responsible parties in implementing the mitigation measures. The table identifies the impact, mitigation measures (as amended through the Final EIR), monitoring responsibility, mitigation timing, and provides space to confirm implementation of the mitigation measures. The numbering of mitigation measures follows the numbering sequence found in the EIR. Mitigation measures that are referenced more than once in the DEIR are not duplicated in the MMRP table.

The following adopted mitigation measures were incorporated into County Code:

- ▶ Mitigation Measure 3.1-1 (ZPC, DRH, UPC):¹ Implement Additional Measures to Protect Scenic Resources
- ▶ Mitigation Measure 3.3-4a: Implement Additional Measures to Minimize Odors from Cultivation and Handling of Harvested Cannabis
- ▶ Mitigation Measure 3.3-4b: Implement Additional Measures to Minimize Odors from Cannabis Smoking
- ▶ Mitigation Measure 3.4-2c (ZPC): Limit Removal of Trees to Outside of the Nesting Bird Season
- ▶ Mitigation Measure 3.4-6a (ZPC): Utilize Wildlife-Friendly Building and Fencing Designs
- ▶ Mitigation Measure 3.10-2b (ZPC): Implement Groundwater Monitoring
- ▶ Mitigation Measure 3.12-4a: Outdoor Amplified Live Music Requires a Use Permit at Storefront Retailers
- ▶ Mitigation Measure 3.15-1a (ZPC): Protection of Tribal Cultural Resources for Permitted Uses
- ▶ Mitigation Measure 3.16-1 (All Cannabis Uses): Municipal Water Supply Verification for New Cannabis Uses
- ▶ Mitigation Measure 3.17-1a (UPC, DRH, and ZPC): Limitation of Use Types in Very High Fire Hazard Severity Zones

REPORTING

The County shall document and describe the compliance of the activity with the adopted mitigation measures either within the attached table or a separate monitoring documentation as part of processing applications under the proposed ordinance.

¹ ZPC: Zoning Permit for Cannabis; DRH: Design Review with Hearing; UPC: Use Permit for cannabis.

MITIGATION MONITORING AND REPORTING PROGRAM TABLE

The categories identified in the attached MMRP table are described below.

- ▶ Mitigation Measure – This column provides the verbatim text of the adopted mitigation measure
- ▶ Implementation Responsibility – This column identifies the party responsible for implementing the mitigation measure.
- ▶ Timing – This column identifies the time frame in which the mitigation will be implemented.
- ▶ Verification – This column is to be dated and signed by the person (either project manager or his/her designee) responsible for verifying compliance with the requirements of the mitigation measure.
- ▶ Throughout the table, “Prior to operation” means post-approval, but before operation begins. Verification of compliance would occur through one or more of the following:
 - ▶ For measures that apply only to a specific mitigation action (e.g., installing odor control equipment, which requires a building permit), a specific post-approval checkpoint is identified (e.g., prior to building permit final);
 - ▶ For discretionary permits (UPC and DRH), all mitigation measures are incorporated into project conditions of approval, and those conditions must be verified prior to operation.
 - ▶ A Use Permit Certificate is issued by the County following completion of all pre-operational conditions for a UPC.
 - ▶ Formal signoff and authorization to operate is also provided by the County for DRH after completion of all pre-operational conditions.
 - ▶ Pre-operational conditions can be verified at different stages, depending on the condition. For example, pre-disturbance surveys would be required prior to initial ground-disturbance and/or vegetation removal; building plans would be reviewed for compliance with light and glare standards prior to issuance of building permit(s) (and sometimes a second time prior to building permit final); installation of odor control filtration equipment would be reviewed on building plans prior to building permit issuance and given final signoff after building construction, prior to building permit final.

Mitigation Monitoring and Reporting Program

Impact	Mitigation Measures	Implementation Responsibility	Time Frame / Monitoring Milestone	Verification
Aesthetics				
<p>Impact 3.1-1: Have a Substantial Adverse Effect on a Scenic Vista or Viewshed</p> <p>Impact 3.1-2: Damage Scenic Resources Including, but Not Limited to, Trees, Rock Outcroppings, and Historical Buildings within a State Scenic Highway or County-Designated Scenic Roadway</p> <p>Impact 3.1-3: Substantially Degrade the Existing Visual Character or Quality</p>	<p>Mitigation Measure 3.1-1 (ZPC, DRH, UPC): Implement Additional Measures to Protect Scenic Resources</p> <p>The following mitigation measures would be included as new standards in proposed Section 26-18-115(C):</p> <ul style="list-style-type: none"> ▶ If a hoop house is visible from a public vantage point, any covering must be non-reflective. ▶ Weed block materials shall be made of non-reflective and non-plastic materials. ▶ Installation of solid fencing, such as wood, masonry, and chain link covered with privacy cloth, is prohibited within County-designated scenic landscapes, scenic corridors, and community separators. 	<p>County to verify compliance</p> <p>County to verify compliance</p>	<p>Verify fencing and hoop house design and location compliance during the permit process and prior to approval of ZPC, UPC, DRH.</p> <p>Verify hoop house covering and weed block material compliance prior to operation for UPC or DRH, and during annual inspections for ZPC, UPC & DRH.</p>	
<p>Impact 3.1-4: Create a New Source of Substantial Light or Glare that Would Adversely Affect Day or Nighttime Views</p>	<p>Mitigation Measure 3.1-4a (ZPC, UPC, DRH): Implement Mitigation Measure 3.1-1</p> <p>Mitigation Measure 3.1-4b: (ZPC, UPC, DRH): Implement New Light and Glare Requirements</p> <p>The following mitigation measures would be imposed through the zoning permit, use permit, and design review with hearing processes:</p> <ul style="list-style-type: none"> ▶ A lighting plan must be submitted for new cannabis uses that are subject to a use permit or design review with hearing. The lighting plan must demonstrate compliance with the following standards. ▶ Lighting Standards <ul style="list-style-type: none"> ▪ All exterior lighting shall be “Dark-sky” compliant and fully shielded to avoid nighttime light pollution per guidance provided by the International Dark Sky Association (www.darksky.org). ▪ Lighting shall be fully shielded to prevent nighttime light pollution. ▪ Lighting shall be downward facing, located at the lowest possible point to the ground to prevent spill over onto adjacent properties, 	<p>See above.</p> <p>Applicant to submit lighting plan</p> <p>County to verify compliance</p>	<p>See above.</p> <p>Lighting plan required at time of application for UPC, DRH.</p> <p>Verify compliance with lighting and glare standards prior to issuance of grading or building permits for ZPC, UPC or DRH).</p>

Impact	Mitigation Measures	Implementation Responsibility	Time Frame / Monitoring Milestone	Verification
	<p>glare, nighttime light pollution and unnecessary glow in the night sky.</p> <ul style="list-style-type: none"> ▪ Light fixtures shall not be located at the periphery of the property and shall not reflect off structures. Security lighting shall be put on motion sensors. ▪ Uplights are not permitted; flood lights are permitted only for temporary use in fields during harvest. ▪ Signs that emit light are prohibited and lights used to illuminate signs shall be shielded to prevent light spill beyond the sign and not exceed a total light output of 1000 lumens. ▪ Light fixtures emitting over 1000 lumens are prohibited except where needed for agriculture, commercial fishing, and first responders. ▪ Total illuminance created by artificial lighting, shall not exceed 1.0 lux at the property line. Color temperature of exterior light sources shall be 3000 Kelvin or lower. <p>▶ Glare Standards.</p> <ul style="list-style-type: none"> ▪ All glass used on building exteriors must have a visible light reflectance of no more than 15%. ▪ Glass with a visible light reflectance greater than 10% must incorporate glare mitigation strategies, including but not limited to exterior shading devices or non-reflective coatings. ▪ Certification from the glass manufacturer verifying compliance with reflectance limits must be provided with the building permit application. ▪ Reflectance data and specifications for all exterior glass must be included in the permit documentation. 			
Air Quality				
<p>Impact 3.3-2: Generate Short-Term Construction-Related Emissions of ROG, NO_x, PM₁₀, and PM_{2.5}</p>	<p>Mitigation Measure 3.3-2 (DRH and UPC): Implement the Bay Area Air Quality Management District’s Basic Construction Mitigation Measures The following mitigation measures would be implemented through the design review with hearing (DRH) or use permit for cannabis (UPC) process for individual projects.</p>	<p>County to verify compliance</p>	<p>Verify compliance prior to issuance of grading or building permits for UPC, DRH.</p>	

Notes: ZPC: Zoning Permit for Cannabis; DRH: Design Review with Hearing; UPC: Use Permit for cannabis

Impact	Mitigation Measures	Implementation Responsibility	Time Frame / Monitoring Milestone	Verification
	<p>Prior to the issuance of grading or building permits, Sonoma County shall ensure that BAAQMD’s basic construction mitigation measures from Table 5-2 of the BAAQMD 2022 CEQA Guidelines (or subsequent updates) are noted on the construction documents. These basic construction mitigation measures include the following:</p> <ol style="list-style-type: none"> 1) All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day. 2) All haul trucks transporting soil, sand, or other loose material off-site shall be covered. 3) All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited. 4) All vehicle speeds on unpaved roads shall be limited to 15 miles per hour (mph). 5) All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used. 6) All excavation, grading, and/or demolition activities shall be suspended when average wind speeds exceed 20 mph. 7) All trucks and equipment, including their tires, shall be washed off prior to leaving the site. 8) Unpaved roads providing access to sites located 100 feet or further from a paved road shall be treated with a 6- to 12-inch layer of compacted layer of wood chips, mulch, or gravel. 9) A Construction Coordinator shall be designated by the project applicant, and a sign shall be posted on the site including the Coordinator’s 24-hour phone number for public contact regarding dust, trackout, and air quality complaints. The Coordinator shall respond and take corrective action within 48 hours. The Coordinator shall report all complaints and their resolutions to County staff. 	<p>Construction Coordinator</p>	<p>Complaint responses and resolution ongoing during construction</p>	

Notes: ZPC: Zoning Permit for Cannabis; DRH: Design Review with Hearing; UPC: Use Permit for cannabis

Impact	Mitigation Measures	Implementation Responsibility	Time Frame / Monitoring Milestone	Verification
<p>Impact 3.3-4: Expose a Substantial Number of People to Odors Considered Objectionable</p>	<p>Mitigation Measure 3.3-4a: Implement Additional Measures to Minimize Odors from Cultivation and Handling of Harvested Cannabis Proposed Sections 26-18-115(C), 26-20-080, 26-20-025(C) shall be amended to include the following provision:</p> <ul style="list-style-type: none"> • A structure containing cannabis must be equipped with a filtration and ventilation system to control odors, humidity, and mold, except for structures containing only prepackaged cannabis products. The air filtration system shall be sufficient to prevent internal odors from being emitted externally and must rely on activated carbon filtration, negative ion generation, ozone generation, or other odor control mechanisms demonstrated to achieve the same odor reductions so that odors are not detectable outside the structure. 	<p>County to verify compliance</p>	<p>Verify compliance prior to building permit final for ZPC, UPC & DRH.</p>	
<p>Impact 3.3-4: Expose a Substantial Number of People to Odors Considered Objectionable</p>	<p>Mitigation Measure 3.3-4b: Implement Additional Measures to Minimize Odors from Cannabis Smoking Proposed Sections 26-18-270, 26-22-120, and 26-26-025 shall be amended as follows:</p> <ul style="list-style-type: none"> ▶ Designated outdoor smoking areas must be located at the furthest distance possible from offsite receptors. If a designated outdoor smoking area is within 600 feet from a property line, the site must employ odor control technology proven to reduce or control smoke and associated odors (e.g. vacuum ventilation or water misters). If smoking occurs indoors, the structure shall be equipped with an air filtration system sufficient to prevent internal odors from being emitted externally and shall rely on activated carbon filtration, negative ion generation, ozone generation, or other odor control mechanisms demonstrated to achieve the same odor reductions so that odors are not detectable outside the structure. Any facility where cannabis smoking occurs must also comply with the Sonoma County Health Ordinance related to employee protections. 	<p>County to verify compliance</p>	<p>Verify compliance prior to building permit final for UPC & DRH or prior to permit issuance for periodic special events (ZPE).</p>

Impact	Mitigation Measures	Implementation Responsibility	Time Frame / Monitoring Milestone	Verification
Biological Resources				
<p>Impact 3.4-1: Result in Disturbance to or Loss of Special-Status Plant Species and Habitat</p>	<p>Mitigation Measure 3.4-1a (DRH or UPC): Conduct Biotic Resource Assessment Consisting of Pre-Application Biological Surveys and Project-Level Analysis</p> <p>Sonoma County shall require the following mitigation measures for cannabis project applications subject to a use permit or design review hearing.</p> <ul style="list-style-type: none"> ▶ A biotic resource assessment must be prepared to determine the presence of biological resources within a project site. The biotic resource assessment will include a biological survey and project-level analysis, which shall be conducted by a qualified biologist. The survey area shall include the proposed disturbance area for the proposed cannabis premises and supporting improvements outside of the premises, including areas of anticipated construction, grading, other ground disturbance, or vegetation removal as well as staging areas, areas of anticipated light or noise impacts, ingress and egress routes, and utility routes. The survey area shall be large enough to encompass areas subject to both direct and indirect impacts. The qualified biologist shall assess the habitat suitability of the proposed disturbance area for all special-status plants, special-status wildlife, and sensitive habitats identified as having potential to occur in the County. This shall include an analysis of the late successional forest habitat present within the Program Area, if applicable (see “Late Successional Forest” under Section 3.4.2 above) to determine if there is old-growth habitat present within the proposed disturbance area (see Mature and Old-Growth Forests: Definition, Identification, and Initial Inventory on Lands Managed by the Forest Service and Bureau of Land Management, Appendix 1, Pacific Southwest Region [Region 5] [USFS 2023] to determine what qualifies as old-growth). The qualified biologist shall also assess the habitat suitability of the proposed disturbance area for all invasive species, as well as record locations of invasive species if they are observed during the survey. The biotic resource assessment must include sufficient evidence to support a conclusion as to whether special-status species and sensitive habitats are present or are likely to occur in the proposed 	<p>Applicant to submit Biotic Resource Assessment</p> <p>County to verify compliance</p>	<p>Biotic Resource Assessment required at time of application submittal</p> <p>Verify compliance during the permit process and prior to UPC or DRH approval.</p>

Impact	Mitigation Measures	Implementation Responsibility	Time Frame / Monitoring Milestone	Verification
	<p>habitat, wetlands, or other waters are identified on an individual project site, no further mitigation is required.</p> <ul style="list-style-type: none"> ▶ If special-status species, sensitive habitats, or wetlands or other waters are present or have the potential to be present, the qualified biologist developing the biotic resource assessment report shall include a discussion of potential direct and indirect impacts (temporary and permanent) on these resources, including identifying the project activities that would lead to impacts, and the appropriate biological resource protection measures identified in Mitigation Measures 3.4-1b, 3.4-1c, 3.4-2a through 3.4-2q, 3.4-4, 3.4-5, 3.4-6a through 3.4-6d, 3.4-6c, 3.4-8 shall be implemented. 			
<p>Impact 3.4-1: Result in Disturbance to or Loss of Special-Status Plant Species and Habitat</p>	<p>Mitigation Measure 3.4-1b (DRH or UPC): Conduct Special-Status Plant Surveys and Implement Avoidance Measures and Mitigation</p> <p>If the biotic resources assessment (see Mitigation Measure 3.4-1a) identifies the presence or potential presence of special-status plant species on the proposed cannabis site (including cannabis premises and supporting improvements outside of the premises), Sonoma County shall require the following standards through the design review approval process for new construction in industrial and commercial zones and for new cannabis uses requiring a use permit in agricultural and resources zones:</p> <ul style="list-style-type: none"> ▶ Within one year prior to the start of project-related ground disturbing activities and during the blooming period for the special-status plant species with potential to occur on the site, a qualified botanist shall conduct protocol-level surveys for special-status plants in all proposed disturbance areas, including temporary features, following survey methods from the CDFW <i>Protocols for Surveying and Evaluating Impacts to Special Status Native Plant Populations and Natural Communities</i> (CDFW 2018a). ▶ If special-status plants are not identified, the botanist shall document the findings in a report to the applicant, County, and CDFW, and no further mitigation shall be required. ▶ If special-status plant species are found, the qualified botanist shall consult with CDFW to designate a no-disturbance buffer or redesign of the cannabis site that shall be reflected in application materials to the County. If special-status plants cannot be avoided, then the 	<p>Applicant to submit pre-disturbance survey(s) and notification to County</p> <p>County to verify survey(s), additional requirements (if any), and final report compliance</p> <p>County to verify compliance or whether compliance is not feasible due to federal status of species listing</p>	<p>Survey(s) and notification to County required prior to initial ground-disturbing activities or issuance of grading or building permits (whichever is first) for UPC or DRH.</p> <p>Verify compliance prior to initial ground-disturbing activities or issuance of grading or building permits (whichever is first) for UPC or DRH.</p>	

Notes: ZPC: Zoning Permit for Cannabis; DRH: Design Review with Hearing; UPC: Use Permit for cannabis

Impact	Mitigation Measures	Implementation Responsibility	Time Frame / Monitoring Milestone	Verification
	<p>applicant shall consult with CDFW to determine if an incidental take permit should be obtained (i.e., for special-status species listed under CESA) or if compensatory mitigation would be required. Impacts on special-status plant species will be mitigated such that there would be no net loss of occupied habitat or individuals. Mitigation measures shall include, at a minimum, preserving and enhancing existing populations, establishing populations through seed collection or transplantation from the site that is to be affected, and restoring or creating habitat in sufficient quantities to achieve no net loss of occupied habitat or individuals. Habitat and individual plants lost shall be mitigated at a minimum 2:1 ratio, considering acreage, as well as function and value, and in compliance with Sonoma County General Plan Policy OSRC-7b-1-d (though this only applies in designated Biotic Habitat Areas, which are only approximately 3.2 percent of the Program Area). As outlined in that policy, acreage required for adequate mitigation and replacement habitat shall be at least two times the acreage affected unless a lower level is acceptable to the applicable state agencies, with the amount depending on the habitat affected and the applicable mitigation priority value. Success criteria for preserved and compensatory populations shall include the following conditions:</p> <ul style="list-style-type: none"> ▪ The extent of occupied area and plant density (number of plants per unit area) in compensatory populations shall be equal to or greater than the affected occupied habitat. ▪ Compensatory and preserved populations shall be self-producing. Populations shall be considered self-producing when: <ul style="list-style-type: none"> • Plants reestablish annually for a minimum of 5 years with no human intervention, such as supplemental seeding; and • Reestablished and preserved habitats contain an occupied area and flower density comparable to existing occupied habitat areas in similar habitat types in the project vicinity. • If off-site mitigation includes dedication of conservation easements, purchase of mitigation credits, or other off-site conservation measures, the details of these measures shall be included in the mitigation plan, including information on responsible parties for long-term management, conservation 			

Notes: ZPC: Zoning Permit for Cannabis; DRH: Design Review with Hearing; UPC: Use Permit for cannabis

Impact	Mitigation Measures	Implementation Responsibility	Time Frame / Monitoring Milestone	Verification
	<p>easement holders, long-term management requirements, success criteria such as those listed above, and other details, as appropriate to target the preservation of long-term viable populations.</p> <ul style="list-style-type: none"> ▪ Any mitigation plan for impacts on special-status plants must be reviewed and approved by Sonoma County and CDFW. ▶ If special-status plants covered by the Santa Rosa Plain Conservation Strategy (Burke’s goldfield, Sonoma sunshine, Sebastopol meadowfoam, and many-flowered navarretia) are found and the proposed disturbance area is located in the Conservation Strategy plan area, direct and indirect impacts on these plants shall be completely avoided through implementation of no-disturbance buffers or redesign of the project. If the plants cannot be completely avoided, the application shall be denied until such a time that cannabis uses are legalized under federal law and federal incidental take permitting through participation in the Conservation Strategy may be pursued. If the plants cannot be completely avoided and cannabis uses are legalized under federal law, applicants will pursue federal incidental take permitting through participation in the Conservation Strategy. 			
<p>Impact 3.4-1:</p>	<p>Mitigation Measure 3.4-1c (DRH or UPC): Implement Measures to Avoid Introduction or Spread of Invasive Plant and Wildlife Species If the biotic resources assessment (see Mitigation Measure 3.4-1a) determines that special-status plants are present or potentially present on the proposed cannabis site (including cannabis premises and supporting improvements outside of the premises), Sonoma County shall require the following standards through the design review approval process for new construction in industrial and commercial zones and for new cannabis uses requiring a use permit in agricultural and resources zones:</p> <ul style="list-style-type: none"> ▶ The application shall include identification of invasive plant species that occur on the site and where they are located. After identifying what type of invasive species could be or are present on the project site, the application shall identify specific measures to be employed for the removal of invasive species and on-site management practices. 	<p>Applicant to submit invasive species management plan</p> <p>County to verify plan compliance</p>	<p>Plan required at time of application for UPC or DRH.</p> <p>Verify plan compliance during the permit process and prior to UPC or DRH approval.</p>	

Notes: ZPC: Zoning Permit for Cannabis; DRH: Design Review with Hearing; UPC: Use Permit for cannabis

Impact	Mitigation Measures	Implementation Responsibility	Time Frame / Monitoring Milestone	Verification
Impact 3.4-2: Result in Disturbance to or Loss of Special-Status Wildlife Species and Habitat	Mitigation Measure 3.4-1a (DRH or UPC): Conduct Biotic Resource Assessment Consisting of Pre-Application Biological Surveys and Project-Level Analysis	See above.	See above.	
Impact 3.4-2 (continued)	<p>Mitigation Measure 3.4-2a (DRH or UPC): Conduct Pre-disturbance Surveys for Special-Status Amphibians and Implement Avoidance Measures</p> <p>If the biotic resources assessment (see Mitigation Measure 3.4-1a) determines that special-status amphibians are present or potentially present on the proposed cannabis site (including cannabis premises and supporting improvements outside of the premises), Sonoma County shall require the following standards through the design review approval process for new construction in industrial and commercial zones and for new cannabis uses requiring a use permit in agricultural and resources zones:</p> <ul style="list-style-type: none"> ▶ For California tiger salamander or California red-legged frogs: <ul style="list-style-type: none"> ■ If California tiger salamanders or California red-legged frogs are detected during the initial biological survey (see Mitigation Measure 3.4-1a) or are determined to be likely to occur (i.e., aquatic or upland habitats potentially suitable for the species are present), then it shall be assumed that all cannabis-related activities, other than crop-swap, that involve construction, other project activities utilizing large machinery (by which special-status amphibians can be crushed), vegetation removal, or other ground disturbance, in all zoning districts in the Program could result in take of this species, and the application shall be denied until such a time that cannabis uses are legalized under federal law and protocol-level surveys by USFWS-approved biologists with ESA Section 10(a)(1)(A) permits may be conducted and federal incidental take permitting may be pursued. Furthermore, a buffer of 1.3 miles shall be established around existing known California tiger salamander breeding occurrences (e.g., Santa Rosa Plain Conservation Strategy Mapping, CNDDDB), and cannabis uses shall also be prohibited within the buffer. ■ If California tiger salamander or California red-legged frog are delisted from ESA and one of these delisted species are detected during the initial biological resources assessment survey (see 	<p>County to verify compliance or whether compliance is not feasible due to federal status of species listing</p> <p>Applicant to submit pre-disturbance survey(s) and notification to County (other species)</p> <p>County to verify pre-disturbance survey compliance (other species)</p> <p>County to verify use of plastic</p>	<p>Verify compliance during the permit process and prior to UPC or DRH approval.</p> <p>Survey(s) and notification to County required prior to initial ground-disturbing activities or issuance of grading or building permits (whichever is first) for UPC or DRH.</p> <p>Verify compliance prior to initial ground-disturbing activities or issuance of grading or building permits (whichever is first) for UPC or DRH.</p> <p>During project operation, verify compliance with plastic use and maintenance requirements during annual inspections.</p>	

Notes: ZPC: Zoning Permit for Cannabis; DRH: Design Review with Hearing; UPC: Use Permit for cannabis

Impact	Mitigation Measures	Implementation Responsibility	Time Frame / Monitoring Milestone	Verification
	<p>Mitigation Measure 3.4-1a) or are determined to be likely to occur (i.e., aquatic or upland habitats potentially suitable for the species are present on the site), protocol-level surveys shall be conducted by a qualified biologist. For California tiger salamander, <i>Interim Guidance on Site Assessment and Field Surveys for Determining Presence or a Negative Finding of the California Tiger Salamander</i> (USFWS and CDFG 2003) shall be used, and for California red-legged frog <i>Revised Guidance on Site Assessments and Field Surveys for the California Red-legged Frog</i> (USFWS 2005). If either of these species were identified in protocol-level surveys, work on the site shall not commence until the applicant has consulted with CDFW to determine whether mitigation measures, such as project design modifications, relocation of the site, or relocation of individual animals, shall be necessary and appropriate so that injury to or mortality of special-status amphibians shall be avoided.</p> <ul style="list-style-type: none"> ▶ For California giant salamander, foothill yellow-legged frog, Pacific tailed frog, red-bellied newt, or other amphibians considered special-status detected during the initial biotic resource assessment survey (see Mitigation Measure 3.4-1a) application: <ul style="list-style-type: none"> ▪ If California giant salamanders, foothill yellow-legged frogs, Pacific tailed frogs, red-bellied newts, or any other amphibians considered special-status species are detected during the initial biotic resource assessment survey (see Mitigation Measure 3.4-1a) or are determined to be likely to occur based on the presence of habitat suitable for these species, the following measures shall apply: <ul style="list-style-type: none"> • A qualified biologist familiar with the life cycle of California giant salamander, foothill yellow-legged frog, Pacific tailed frog, and red-bellied newt shall conduct pre-disturbance surveys of proposed new disturbance areas within 48 hours before new disturbance activities. Pre-disturbance surveys for special-status amphibian species shall be conducted throughout the proposed development area, and a minimum 400-foot buffer around the proposed disturbance area. Surveys shall consist of “walk and turn” surveys of areas beneath surface objects (e.g., rocks, leaf litter, moss mats, 			

Notes: ZPC: Zoning Permit for Cannabis; DRH: Design Review with Hearing; UPC: Use Permit for cannabis

Impact	Mitigation Measures	Implementation Responsibility	Time Frame / Monitoring Milestone	Verification
	<p>coarse woody debris) for salamanders and visual searches for frogs. Appropriate surveys will be conducted for the applicable life stages (i.e., eggs, larvae, adults) depending on the timing of the survey.</p> <ul style="list-style-type: none"> • If special-status amphibians are not detected during the pre-disturbance survey, then further mitigation is not required. • If California giant salamanders, foothill yellow-legged frogs, Pacific tailed frogs, or red-bellied newts are detected, injury to or mortality of special-status amphibians shall be avoided by modifying project design, relocating the site, or relocating individual animals (with an applicable CDFW scientific collecting permit and CDFW approval). A no-disturbance buffer shall be established around the location where the detection occurred, and around habitat suitable for the species detected, the size of which shall be determined by the qualified biologist such that injury and mortality of individuals, including individuals dispersing in upland habitats, would be avoided. No work shall occur in the no-disturbance buffer for the duration of disturbance activities. If the applicant determines that project implementation outside of the no-disturbance buffer is infeasible (i.e., most project objectives cannot be met), then the applicant may consult with CDFW to determine whether additional mitigation measures, such as compensatory mitigation would be necessary to minimize impacts on these species and allow development in the no-disturbance buffer. <ul style="list-style-type: none"> ▶ Polyethylene plastic used for agricultural shade or crop structures for cannabis cultivation shall be properly fastened, maintained in good condition, and regularly inspected for degradation from weather to prevent introduction of plastic into the natural environment, including waterways. ▶ Polyethylene plastic sheeting may not be placed directly on the ground.

	<p>proposed cannabis site (including cannabis premises and supporting improvements outside of the premises), Sonoma County shall require the following standards through the design review approval process for new construction in industrial and commercial zones and for new cannabis uses requiring a use permit in agricultural and resources zones:</p> <ul style="list-style-type: none"> ▶ To minimize the potential for loss of nesting raptors, disturbance activities shall occur only during the nonbreeding season (September 1 through January 31) and outside the soil disturbance avoidance timeframe outlined in the <i>Best Management Practices Cannabis Cultivation</i> (Sonoma County Department of Agriculture n.d.-a), which all cannabis cultivation operations are required to follow. As such, all disturbance activities related to cannabis cultivation shall only occur from September 1 through October 31. In addition, disturbance activities for non-cultivation uses, as well as tree removal for cultivation uses that does not involve soil disturbance shall only occur during the nonbreeding season (September 1 through January 31). ▶ If removal of trees (without soil disturbance) cannot occur during the nonbreeding season (September 1 through January 31) or if ground-disturbing activities including removal of trees involving soil disturbance cannot occur between September 1 through October 31, the following will apply: <ul style="list-style-type: none"> ▪ Before removal of any trees or ground-disturbing activities between February 1 and August 31, a qualified biologist shall conduct pre-disturbance surveys for nesting raptors and shall identify active nests within a certain distance of the disturbance area, depending on the species that are known or have potential to be present. For northern harrier and short-eared owl, surveys shall occur at a minimum of 500 feet of the proposed disturbance area. For Swainson’s hawk and white-tailed kite, surveys shall occur at a minimum of 0.25 miles of the proposed disturbance area. Additionally, for American peregrine falcon, bald eagle, and golden eagle, surveys shall occur at a minimum of 0.5 miles of the proposed disturbance area. The surveys shall be conducted between February 1 and August 31. Inaccessible areas (e.g., private property) within the 0.25-mile or 0.5-mile survey buffers shall be surveyed using binoculars or a spotting scope. 	<p>notification to County if vegetation removal occurs during nesting season (February 1 through August 31) or soil disturbance occurs during outdoor cultivation soil disturbance avoidance timeframe (November 1 through April 15)</p> <p>County to verify compliance</p> <p>County to verify use of plastic</p>	<p>ground-disturbing activities, tree removal, issuance of grading or building permits (whichever is first) for UPC or DRH.</p> <p>Verify compliance prior to initial ground-disturbing activities, tree removal, or issuance of grading or building permits (whichever is first) for UPC or DRH.</p> <p>During project operation, verify compliance with plastic use and maintenance requirements during annual inspections.</p>	

Notes: ZPC: Zoning Permit for Cannabis; DRH: Design Review with Hearing; UPC: Use Permit for cannabis

Impact	Mitigation Measures	Implementation Responsibility	Time Frame / Monitoring Milestone	Verification
	<ul style="list-style-type: none"> ▶ If no active nests are found, the qualified biologist shall submit a report documenting the survey methods and results to the applicant and CDFW, and no further mitigation shall be required. ▶ If active nests are found, impacts on nesting raptors, including direct removal and disturbance (e.g., noise, presence of construction crews) shall be avoided by establishing appropriate buffers around active nest sites identified during pre-disturbance raptor surveys. <ul style="list-style-type: none"> ■ For northern harrier and short-eared owl, avoidance buffers will be established a minimum of 500 feet from the proposed disturbance area, including tree removal. For Swainson’s hawk and white-tailed kite, avoidance buffers will be established a minimum of 0.25 miles of the proposed disturbance area, including tree removal. For American peregrine falcon, bald eagle, and golden eagle, avoidance buffers will be established a minimum of 0.5 miles from the proposed disturbance area, including tree removal. ■ Buffer size may be adjusted if the qualified biologist and the applicant, in consultation with CDFW, determine that such an adjustment would not be likely to adversely affect the nest. Factors to be considered for determining buffer size shall include the presence of natural buffers provided by vegetation or topography, nest height, locations of foraging territory, and baseline levels of noise and human activity. ■ The buffer areas shall be protected with construction fencing, and no activity shall occur within the buffer areas until the qualified biologist has determined, in coordination with CDFW, that the young have fledged, the nest is no longer active, or reducing the buffer would not likely result in nest abandonment. ■ Monitoring of the nest by a qualified biologist during disturbance (e.g., ground disturbance, vegetation removal [including tree removal], installation of cannabis cultivation sites, installation of temporary event facilities, cannabis events) shall be required if the activity has potential to adversely affect the nest. ▶ Removal of bald and golden eagle nests is prohibited regardless of the occupancy status under the federal Bald and Golden Eagle Protection Act. If bald or golden eagle nests are found during pre-disturbance surveys, then the nest tree shall not be removed. 			

Notes: ZPC: Zoning Permit for Cannabis; DRH: Design Review with Hearing; UPC: Use Permit for cannabis

Impact	Mitigation Measures	Implementation Responsibility	Time Frame / Monitoring Milestone	Verification
	<ul style="list-style-type: none"> ▶ If no burrowing owls, including occupied burrowing owl burrows, are found, the qualified biologist shall submit a burrowing owl report documenting the survey methods and results to the applicant, Sonoma County, and CDFW, and no further mitigation shall be required. ▶ If an active burrow is found during the surveys, the project applicant shall establish and maintain a buffer around the occupied burrow and any identified satellite burrows (i.e., non-nesting burrows that burrowing owls use to escape predators or move young into after hatching) to prevent take of the burrowing owls. <ul style="list-style-type: none"> ■ During the non-breeding season (September 1 through January 31), the minimum buffer distance shall be 164 feet (50 m). During the breeding season (February 1 through August 31), the minimum buffer distance shall be increased to 1,640 feet (500 meters). ■ The buffer may be adjusted if, in consultation with CDFW, a qualified biologist determines that an alternative buffer will not result in take of burrowing owl adults, young, or eggs because of particular site features (e.g., topography, natural line-of-sight barriers), level of project disturbance, or other considerations. If the buffer is reduced, a qualified biologist shall monitor the behavior of the burrowing owls during all project activities within 1,640 feet of the burrow. If the owls are disturbed or agitated (e.g., vocalizations, bill snaps, fluffing feathers to increase body size appearance, drooping wings and rotating them forward, crouching and weaving back and forth) by the project activities, the biologist shall have the authority to halt the activities and re-establish a buffer consistent with the first bullet until the agitated behavior ceases and normal behavior resumes. ■ The buffer shall remain in place around the occupied burrow and associated satellite burrows until a qualified biologist has determined through noninvasive methods that the burrows are no longer occupied by burrowing owl. A previously occupied burrow will be considered unoccupied if surveys demonstrate that no owls have used the burrow for seven consecutive days. ■ Locations of burrowing owls detected during surveys shall be reported to the CNDDDB.

	cannabis cultivation area, alteration of the groundwater pumping schedule, or other measures determined appropriate. ▶ A maximum of 100,000 gallons of new tank storage is allowed.			
Noise and Vibration				
Impact 3.12-1: Result in Excessive Short-Term Construction Noise Impacts	<p>Mitigation Measure 3.12-1a (DRH or UPC): Incorporate Noise Reduction Measures into Construction Specifications</p> <p>Sonoma County shall require the following mitigation measures for cannabis project applications subject to issuance of a use permit or design review with hearing.</p> <p>To minimize noise levels during construction activities, the development of cannabis uses shall comply with the following measures during construction work.</p> <ul style="list-style-type: none"> ▶ Noise-generating construction activities should be restricted to between the hours of 7:00 a.m. to 7:00 p.m. Monday through Saturday. No construction activities should occur on weekends or holidays. If work is necessary outside of these hours, the County should require the contractor to implement a construction noise monitoring program and, if feasible, provide additional mitigation as necessary (in the form of noise control blankets or other temporary noise barriers, etc.) for affected receptors. A sign(s) shall be posted on the site regarding allowable hours of construction. ▶ All construction equipment shall be properly maintained and equipped with noise-reduction intake and exhaust mufflers and engine shrouds, in accordance with manufacturer recommendations. Equipment shrouds shall be closed during equipment operation. ▶ Equip all internal combustion engine-driven equipment with intake and exhaust mufflers that are in good condition and appropriate for the equipment. Equipment shall be properly maintained and turned off when not in use. ▶ Unnecessary idling of internal combustion engines should be strictly prohibited. ▶ Locate stationary noise-generating equipment, such as air compressors or portable power generators, as far as possible from sensitive receptors as feasible. If they must be located near receptors, 	County to verify compliance with noise measures	Verify measure is included on construction and/or building plans prior to issuance of grading or building permits.	

Notes: ZPC: Zoning Permit for Cannabis; DRH: Design Review with Hearing; UPC: Use Permit for cannabis

Impact	Mitigation Measures	Implementation Responsibility	Time Frame / Monitoring Milestone	Verification
	<p>adequate muffling (with enclosures where feasible and appropriate) shall be used. Any enclosure openings or venting shall face away from sensitive receptors.</p> <ul style="list-style-type: none"> ▶ Utilize "quiet" air compressors and other stationary noise sources where technology exists. ▶ Construction maintenance, storage and staging areas for construction equipment shall avoid proximity to residential areas to the maximum extent practicable. Stationary construction equipment, such as compressors, mixers, etc., shall be placed away from residential areas and/or provided with acoustical shielding. Quiet construction equipment shall be used when possible. ▶ Construction staging areas shall be established at locations that will create the greatest distance between the construction-related noise sources and noise-sensitive receptors nearest the project site during all project construction. ▶ Control noise from construction workers' radios to a point where they are not audible at existing residences bordering the project site. 			
	<p>Mitigation Measure 3.12-1b (UPC or DRH): Prepare Noise Analysis for Ongoing Construction Projects Anticipated to Last One Year or More Sonoma County shall require the following mitigation measure for cannabis project applications subject to issuance of a use permit or design review with hearing.</p> <ul style="list-style-type: none"> ▶ Sonoma County shall require the cannabis permit applicants to submit a noise analysis prepared in accordance with the County Guidelines for the Preparation of Noise Analysis. The noise analysis shall demonstrate compliance with the required County noise thresholds through the use of noise reduction measures (such as those identified in Mitigation Measure 3.12-1a) and will be subject to review by Permit Sonoma. This measure shall be incorporated into project-specific approvals. 	<p>Applicant to submit noise analysis</p> <p>County to verify analysis, additional requirements (if any), and final report compliance</p>	<p>Study required prior to UPC or DRH approval.</p> <p>Verify compliance during the permit process and prior to UPC or DRH approval.</p>	
<p>Impact 3.12-4: Cause Excessive Long-Term Operational Stationary Noise Levels</p>	<p>Mitigation Measure 3.12-4a: Outdoor Amplified Live Music Requires a Use Permit at Storefront Retailers The proposed Code Section 26-18-025 shall be modified to include the following standard.</p>	<p>County to verify code standard added to code</p>	<p>At program adoption</p>	

Notes: ZPC: Zoning Permit for Cannabis; DRH: Design Review with Hearing; UPC: Use Permit for cannabis

Impact	Mitigation Measures	Implementation Responsibility	Time Frame / Monitoring Milestone	Verification
	<ul style="list-style-type: none"> ▶ Amplified live music at a storefront retailer is prohibited without a use permit. 			
<p>Impact 3.12-4 (continued)</p>	<p>Mitigation Measure 3.12-4b (UPC): Noise Reduction Measures for Outdoor Amplified Live Music at Cannabis Events or at Storefront Retailers</p> <p>The following mitigation measure would be implemented through the Use Permit process for individual projects.</p> <ul style="list-style-type: none"> ▶ Applicants must demonstrate compliance with the County Noise Standards presented in General Plan Policy NE-1c and Table NE-2. If outdoor amplified live music is proposed, compliance with the County Noise Standards shall be demonstrated through a project-specific noise study prepared in accordance with the County Guidelines for the Preparation of Noise Analysis. Compliance with these requirements may be met through development design considerations such as; <ul style="list-style-type: none"> ▪ Locating performance areas away from noise sensitive land uses. ▪ Locating live music indoors. ▪ Positioning speaker at locations where noise barriers such as buildings can serve to reduce noise at off-site sensitive receptor locations. ▪ Prohibit amplified music or sound after 10:00 p.m. ▪ During the sound testing of the amplified sound system prior to each event multiple sound level measurements shall be conducted along the property line of the most affected residential land uses. Volume settings shall be adjusted to ensure that the applicable county noise standards will not be exceeded at the residences during the event. ▶ Operators hosting cannabis events and storefront retailers will be required to conduct noise monitoring with a measuring device (e.g., electronic noise meter) during events and retailer activities as follows: <ul style="list-style-type: none"> ▪ Noise monitoring is required during the first 3 large-scale cannabis events. ▪ Noise monitoring is required during the first 3 small-scale cannabis events, except that if the use permit allows for small- 	<p>Applicant to submit noise analysis</p> <p>County to verify analysis, additional requirements (if any), and final report compliance</p> <p>Applicant to submit noise monitoring report(s)</p> <p>County to verify monitoring, additional requirements (if any), and final report compliance</p>	<p>Study required prior to UPC approval.</p> <p>Verify compliance during the permit process and prior to UPC approval.</p> <p>Reports required during the first 3 cannabis events OR until 3 consecutive events have been demonstrated to meet standards, as described in mitigation measure for UPC</p> <p>Verify compliance during operation for UPC until success criteria are met</p>

Impact	Mitigation Measures	Implementation Responsibility	Time Frame / Monitoring Milestone	Verification
<p>Impact 3.12-4 (continued)</p>	<p>Mitigation Measure 3.12-4c (DRH): Implement Noise Reduction Measures to Reduce Operational Noise Impacts in Industrial and Commercial Districts The following mitigation measures would be implemented through the design review with hearing (DRH) for individual projects.</p> <ul style="list-style-type: none"> ▶ Demonstrate compliance with the County Noise Standards presented in Policy NE-1c (TABLE NE-2). Compliance with these requirements may be met through development design considerations such as those listed below. <ul style="list-style-type: none"> ▪ Selection of HVAC with low decibel rating. ▪ Locate HVAC units within equipment rooms or enclosures that incorporate noise reduction features, such as acoustical louvers. Equipment enclosures shall be oriented so that major openings (i.e., intake louvers, exhaust) are directed away from nearby noise-sensitive receptors. ▪ Set back all HVAC units as much as possible from off-site noise-sensitive receptors, including residential land uses. ▪ Position HVAC units on the opposite side of an on-site buildings from off-site sensitive receptors so that the buildings serve as an intervening noise barrier. 	<p>Applicant to submit noise reduction details</p> <p>County to verify noise reduction details, additional requirements (if any), and final report and building permit compliance</p>	<p>Plan required prior to approval for DRH.</p> <p>Verify plan during the permit process and prior to DRH approval.</p> <p>Verify building permit compliance with noise reduction plan prior to issuance of building permit(s) for DRH.</p>	
<p>Transportation</p>				
<p>Impact 3.14-2: Conflict or Be Inconsistent with CEQA Guidelines Section 15064.3(b) Regarding Vehicle Miles Traveled</p>	<p>Mitigation Measure 3.14-2 (UPC, DRH): Conduct VMT Analysis and Identify Mitigation for VMT Sonoma County shall require the following mitigation measures for cannabis project applications subject to a use permit or design review with hearing:</p> <p>Cannabis cultivation and supply chain sites that are located outside of VMT efficient areas, as identified in Table 3.14-3, shall conduct a project-level VMT analysis and identify VMT impacts associated with the cannabis facility. Consistent with this guidance, projects that include accessory uses would be analyzed independently. Where appropriate, VMT shall be evaluated using VMT screening maps based on the outputs from the most recent update of the Sonoma County Travel Demand Model or a dedicated model run.</p>	<p>Applicant to submit VMT analysis</p> <p>County to verify VMT analysis, additional requirements (if any), and final VMT analysis compliance</p>	<p>Study required prior to approval for UPC or DRH.</p> <p>Verify compliance during the permit process and prior to UPC or DRH approval.</p>	

Notes: ZPC: Zoning Permit for Cannabis; DRH: Design Review with Hearing; UPC: Use Permit for cannabis

Impact	Mitigation Measures	Implementation Responsibility	Time Frame / Monitoring Milestone	Verification
	<p>Please see Table 3.14-3 on page 3.14-17 of this Draft EIR.</p> <p>Because some projects may not be screened out based on these criteria, the process described below shall be applied to assess potential VMT impacts at the project level:</p>			
<p>Impact 3.14-2 (continued)</p>	<p><u>Step 1 - Map-Based Low VMT Screening</u></p> <p>The SCTA travel demand model analyzes geographic areas throughout the county known as transportation analysis zones (TAZs) and the VMT per employee is calculated for each TAZ. As shown in Figure 3.14-1, the VMT per employee is at least 15 percent below the county-wide average for a large portion of Sonoma County. Since incoming development is presumed to be associated with similar commuting patterns as existing conditions in the TAZ, individual cannabis projects proposed for sites in TAZs that have a VMT per employee at least 15 percent below the regional average are presumed to have a less-than-significant VMT impact. This screening criteria shall only be applied to projects that do not include cannabis events, as the SCTA model does not include data for events, or other types of visitor-focused uses. For employee-based projects not located in a TAZ with a VMT per employee at least 15 percent below the regional average, the analysis shall proceed to Step 2.</p> <p><u>Step 2 - Proximity to Transit</u></p> <p>In accordance with the screening criteria recommended by OPR, projects located within one-half mile of an existing major transit stop or an existing stop along a high-quality transit corridor shall be presumed to have a less than significant VMT impact, unless they meet at least one of the following:</p> <ul style="list-style-type: none"> ▶ Have a Floor Area Ratio (FAR) of less than 0.75 ▶ Includes more parking for use by customers or employees of the project than required by the jurisdiction (if the jurisdiction requires the project to supply parking) ▶ Is inconsistent with the applicable Sustainable Communities Strategy (as determined by the lead agency, with input from the Metropolitan Planning Organization) <p>As in the case of map-based screening, projects that include cannabis events are not presumed to have a less than significant VMT impact and</p>			

Notes: ZPC: Zoning Permit for Cannabis; DRH: Design Review with Hearing; UPC: Use Permit for cannabis

Impact	Mitigation Measures	Implementation Responsibility	Time Frame / Monitoring Milestone	Verification
	<p>therefore could not be screened using this criterion, and must start at Step 3.</p> <p>Step 3 – Project VMT Assessment (if screening is not applicable) For projects that do not screen from VMT analysis, including those that propose events, the individual cannabis project must be compared with the appropriate VMT significance threshold. For employment-based land uses, the OPR-recommended threshold is 15 percent below the regional average; for projects in Sonoma County, the countywide average is typically used as regional. Projects that cannot reduce their VMT to a level that is at least 15 percent below the county-wide average are considered to have a significant VMT impact.</p> <p>For individual cannabis projects resulting in a significant VMT impact, a Transportation Demand Management (TDM) Program shall be developed that commits the project to VMT reduction measures that match their specific operation and geographic location in the county. These measures may include, but are not limited to the following:</p> <ul style="list-style-type: none"> ▶ Implementation of an employee rideshare program ▶ Subsidies to employees for public transit use ▶ Provision of on-site bicycle storage and maintenance facilities ▶ Shuttle service for employees and customers for all cannabis events ▶ Participation in future Sonoma County VMT reduction programs <p>The TDM will quantify the effectiveness of VMT reduction measures and their ability to reduce project VMT 15 percent below the county-wide average or why attainment of 15 percent reduction is not feasible to the satisfaction of the County prior to the issuance of occupancy permits or other approvals allowing for operation of the cannabis site.</p>			
Tribal Cultural Resources				
<p>Impact 3.15-1: Change the Significance of a Tribal Cultural Resource</p>	<p>Mitigation Measure 3.15-1a (ZPC): Protection of Tribal Cultural Resources for Permitted Uses The following measures would be included as standards in Section 26-18-115(C)(4)(h):</p> <ul style="list-style-type: none"> ▶ The applicant must attest that they do not know of or have reason to believe that an archaeological tribal cultural resource is present within the cannabis premises. 	<p>Applicant to submit attestation and Sacred Lands Inventory Search results for ZPC</p>	<p>Required at time of application submittal</p>	

Notes: ZPC: Zoning Permit for Cannabis; DRH: Design Review with Hearing; UPC: Use Permit for cannabis

Impact	Mitigation Measures	Implementation Responsibility	Time Frame / Monitoring Milestone	Verification
	<ul style="list-style-type: none"> ▶ The applicant must provide search results from the Sacred Lands Inventory maintained by the Native American Heritage Commission. The application cannot be approved if the search returns a positive result demonstrating that the project will impact a known archeological or tribal cultural resource. ▶ A referral must be sent to the Northwest Information Center. The application cannot be approved if the project will impact a known archaeological resource identified by the Northwest Information Center. ▶ A referral must be sent to the local tribes. The application cannot be approved if the project will affect a known tribal cultural resource as identified by a local tribe. Documentation must be provided by a local tribe to support a finding that a tribal cultural resource is present. The County must maintain the confidentiality of supporting documentation in accordance with California Government Code Sections 7927.000 and 7927.005. ▶ If requested by a local tribe, the applicant must retain a tribal cultural monitor, at the applicant’s own cost, during crop removal and initial ground disturbing replanting activities. The retention of a tribal cultural monitor must be demonstrated through the submittal of an executed monitoring agreement prior to permit approval. 	<p>County to verify attestation, Sacred Lands Inventory search results, and Northwest Information Center search results for ZPC</p> <p>Applicant to retain a tribal cultural monitoring, if requested by a Tribe</p> <p>County to verify monitoring agreement</p>	<p>Verify compliance during the permit process and prior to ZPC approval.</p> <p>Required prior to ZPC approval.</p> <p>Verify compliance during the permit process and prior to ZPC approval.</p>	
<p>Impact 3.15-1 (continued)</p>	<p>Mitigation Measure 3.15-1b (UPC and DRH): Implement Mitigation Measure 3.5-2a</p> <ul style="list-style-type: none"> ▶ Mitigation Measure 3.5-2a – (UPC and DRH) Cultural Resource Pre-Approval Evaluation 	<p>See above.</p>	<p>See above.</p>	
<p>Impact 3.15-1 (continued)</p>	<p>Mitigation Measure 3.15-1c. (UPC and DRH) Tribal Cultural Resources Pre-Approval Consultation</p> <p>The County shall send a project referral to all tribes that are traditionally and culturally affiliated with the area. A cultural resources survey report generated under Mitigation Measure 3.5-2a may be released only to those tribes who have requested consultation. If requested by a tribe, the County shall engage in consultation to identify potential impacts to tribal cultural resources. The information provided by tribes through consultation with the applicant shall be maintained as confidential in</p>	<p>County to send referrals to tribes and engage in consultation if requested</p>	<p>During the permit process and prior to UPC or DRH approval.</p>

	accordance with California Government Code Sections 7927.000 and 7927.005 and all other applicable laws.			
Impact 3.15-1 (continued)	<p>Mitigation Measure 3.15-1d. (UPC and DRH) Avoidance of Tribal Cultural Resources</p> <ul style="list-style-type: none"> ▶ Cannabis project applications shall be designed to avoid impacts to tribal cultural resources identified by Mitigation Measure 3.5-2a and Mitigation Measure 3.15-1c. ▶ A barrier (temporary fencing) and flagging shall be placed between the work location and any resources within 60 feet of a work location to minimize the potential for inadvertent impacts. ▶ If the site is identified as potentially sensitive for tribal cultural resources under Mitigation Measure 3.5-2a or Mitigation Measure 3.15-1c, the applicant shall retain a qualified archeologist to prepare a tribal cultural resource treatment plan that shall be implemented in the event an unanticipated resource that may be considered a tribal cultural resource is identified during ground disturbance. The plan shall include any necessary monitoring requirements and suspension of all earth-disturbing work in the vicinity of the find. Avoidance of the resource is the preferred approach and wherever feasible the project shall be redesigned, subject to review and approval by the County, in consultation with the local tribe or tribes. If avoidance is infeasible, the plan shall outline the appropriate treatment of the resource in coordination and as agreed to by the local tribe or tribes and, if applicable, a qualified archeologist. Examples of appropriate treatment for the tribal cultural resources include, but are not limited to, protecting the cultural character and integrity of the resource, protecting traditional use of the resource, protecting the confidentiality of the resource, repatriation at a mutually agreed upon location, or returning the resources to the tribe. The plan shall be reviewed by the County and the local tribe or tribes prior to approval to confirm compliance with this measure. Following an unanticipated discovery, the County must verify project redesign or appropriate treatment of the resource, in consultation with the local tribe or tribes, prior to authorizing recommencement of ground disturbance. 	<p>Applicant to submit tribal cultural resource treatment plan, if required</p> <p>Applicant to retain a tribal cultural monitor, if required by plan</p> <p>County to verify compliance with plan submission, acceptance by local tribe(s), and any additional requirements</p>	<p>Plan required prior to UPC or DRH approval.</p> <p>Monitoring agreement required prior to initial ground-disturbing activities, or issuance of grading or building permits (whichever is first) for UPC or DRH.</p> <p>Verify plan during the permit process and prior to UPC or DRH approval.</p> <p>Verify treatment measures are implemented, monitoring agreement is in place, and exclusion fencing/ flagging prior to initial ground-disturbing activities, or issuance of grading or building permits (whichever is first) for UPC or DRH.</p>	

Notes: ZPC: Zoning Permit for Cannabis; DRH: Design Review with Hearing; UPC: Use Permit for cannabis

Impact	Mitigation Measures	Implementation Responsibility	Time Frame / Monitoring Milestone	Verification
	<ul style="list-style-type: none"> If the site is identified as potentially sensitive for tribal cultural resources under Mitigation Measure 3.5-2a or Mitigation Measure 3.15-1c, the applicant shall retain a tribal monitor to observe all ground disturbance, including archeological excavation. Monitoring methods and requirements shall be outlined in the tribal cultural resource treatment plan to mitigate impacts to the identified resource. 			
<p>Impact 3.15-1 (continued)</p>	<p>Mitigation Measure 3.15-1e. (UPC and DRH) Avoidance of Human Remains Impacts to human remains must be avoided. For a site where human remains are expected to be present based on the results of studies or consultation conducted under Mitigation Measure 3.5-2a or Mitigation Measure 3.15-1c, the County shall consult with the local tribe(s) on whether to employ a canine forensics team. If appropriate, the County shall require the use of a canine forensics team to attempt to identify the location of human remains in a noninvasive way for purpose of avoidance. Any requirements for the use of a canine forensics team shall be documented in a tribal cultural resources treatment plan prepared under Mitigation Measure 3.15-1d. The tribal cultural resources treatment plan may require revision or an addendum to reflect additional recommendations or requirements if human remains are present.</p>	<p>County to verify compliance with plan submission, acceptance by local tribe(s), and any additional requirements</p>	<p>If the County requires the use of canine forensics team, the application shall include the results of this activity and will be documented in the tribal cultural treatment plan identified in Mitigation Measure 3.15-1d prior to any action on the application.</p> <p>Verify treatment measures are implemented prior to initial ground-disturbing activities, or issuance of grading or building permits (whichever is first) for UPC or DRH.</p>	
<p>Utilities and Service Systems</p>				
<p>Impact 3.16-1: Result in Insufficient Water Supplies</p>	<p>Mitigation Measure 3.16-1 (All Cannabis Uses): Municipal Water Supply Verification for New Cannabis Uses The proposed Code Sections for all cannabis uses shall be modified to include the following standard.</p> <ul style="list-style-type: none"> Individual projects must demonstrate that water demand would be equivalent or less than current levels of a facility or if the entity providing water can demonstrate that water is available to serve the project in normal, dry, and multiple dry years. 	<p>Applicant to submit proof of water supply</p> <p>County to verify compliance</p>	<p>Required at time of application submittal for by right uses, ZPC, UPC and DRH</p> <p>Verify compliance prior to approval for ZPC, UPC or DRH.</p>

	<ul style="list-style-type: none"> ▶ Parking areas shall be designated and consist of noncombustible materials (e.g., poured concrete or gravel). ▶ Vegetation shall not be permitted within 10 feet of power poles. ▶ Gutters and downspouts shall be noncombustible, and cleared of debris on a monthly basis. ▶ No solid wood fencing shall be constructed. ▶ A minimum of 30 feet between structures shall be maintained. 			
<p>Impact 3.17-1 (continued)</p>	<p>Mitigation Measure 3.17-1d (UPC and DRH): Develop and Implement Site-Specific Fire Protection and Prevention Plan Applicant must prepare a Fire Protection and Prevention Plan that includes site-specific and detailed plans to address increased wildfire risk at the cannabis site. The Fire Protection and Prevention Plan will be subject to review and approval by the County Fire Marshal and the fire district with jurisdiction over the cannabis site before issuance of a permit by the County. The County Fire Marshal shall use the Fire Protection and Prevention Plan to establish conditions of approval for the site that will be incorporated into requirements for issuance of a use permit or design review approval.</p> <p>The site-specific Fire Protection and Prevention Plan shall include the following minimum components. Additional requirements and inspections may be included in the plan at the discretion of the County Fire Marshal or local fire district.</p> <ul style="list-style-type: none"> ▶ Verification that Mitigation Measures 3.17-1a, 3.17-1b, and 3.17-1c are feasible and incorporated into project plans. ▶ Verification that the cannabis site is located within a fire district with adequate capacity to serve the site in the event of unintended fire ignition. ▶ Identification of emergency response and evacuation routes. Unless the site is located along a State or federal Highway, a street identified by the County as an arterial or collector, or as otherwise directed by the County Fire Marshal, the adequacy of emergency response shall be determined based on modeling prepared by a traffic engineer that takes into account expected numbers of workers and total estimated amount of operational traffic, the capacity of roadways near the facility, reasonably foreseeable wildfire scenarios, evacuation 	<p>Applicant to submit plan</p> <p>County to verify draft plan compliance with minimum requirements, recommend additional requirements (if necessary), and approve final plan</p>	<p>Plan required prior to UPC or DRH approval.</p> <p>Verify compliance during the permit process and prior to UPC or DRH approval.</p>

	<p>time, and emergency response time. Minimum response objectives shall be evaluated and approved by the local fire district or the County. Unless otherwise established by the County or the local fire district, emergency response standards established by the National Fire Protection Association shall be used to determine if emergency response time of the associated fire district is adequate.</p> <ul style="list-style-type: none"> ▶ Defined staff roles and responsibilities, including staff responsible for communicating with emergency service providers. Communication protocols must also be included to ensure that staff, customers, and vendors are informed of potential emergencies and needed actions due to an emergency, up to and including evacuation of the site. ▶ Verification that roadway conditions are consistent with all applicable requirements. ▶ Verification that all roads leading up to the individual site and buildings on the site are designated by names or numbers posted on signs clearly visible and legible from the roadway and at interchanges. ▶ Identification of emergency water supply that is available, accessible, and maintained in quantities and locations specified consistent with all applicable requirements. ▶ Verification that areawide fuel breaks are sufficient and in compliance all applicable requirements. ▶ Confirmation that roadways are in compliance with the State and local roadway standards. ▶ Identification of operational requirements, including the following: <ul style="list-style-type: none"> ▶ Mowing shall occur before 10 a.m. and never on a hot or windy day, or a red flag warning or a particularly dangerous situation event issued by the National Weather Service. ▶ String trimmers shall be used rather than lawnmowers for clearing vegetation wherever feasible. ▶ All dead or dying vegetation shall be removed during drought conditions when water use restrictions are in place. 			
<p>Impact 3.17-1 (continued)</p>	<p>Mitigation Measure 3.17-1e (UPC and DRH): Implement Site-Specific Standards for Events</p>			

Notes: ZPC: Zoning Permit for Cannabis; DRH: Design Review with Hearing; UPC: Use Permit for cannabis

Impact	Mitigation Measures	Implementation Responsibility	Time Frame / Monitoring Milestone	Verification
	<p>Standards for cannabis events shall be established to meet the requirements of a specific site. These standards must be developed by the applicant, subject to review and approval by the County Fire Marshal and the local fire district. Requirements for events shall be incorporated into the conditions for approval of a use permit and include the following, at minimum.</p> <ul style="list-style-type: none"> ▶ Standards for water application at the perimeter of the event. ▶ Designated smoking areas where incendiaries devices may be used. Such smoking areas must consist of noncombustible materials (e.g., poured concrete or gravel). ▶ Installation and maintenance of fire extinguishers. ▶ Access to adequate water supply for fire suppression (e.g., hoses, reservoirs, pumps or water tanks). ▶ Installation of sprinkler systems in strategic locations to address potential ignition sources. ▶ The pertinent emergency evacuation zone, map of the site that clearly shows nearby roadways, and shelter-in-place locations on the subject property shall be posted in a conspicuous location within the cannabis facility or event location. 	<p>Applicant to submit proposed standards for events</p> <p>County to verify compliance with minimum requirements, recommend additional requirements (if necessary), and approve final standards</p>	<p>Required prior to UPC or DRH approval.</p> <p>Verify compliance during the permit process and prior to UPC or DRH approval.</p>	
<p>Impact 3.17-2: Substantially Impair an Adopted Emergency Response Plan, Emergency Access, or Emergency Evacuation Plan in Areas in or Near SRAs or Land Classified as Very High Fire Hazard Severity Zones</p>	<p>Mitigation Measure 3.17-1a: Require All Structures to Meet Defensible Space Parameter</p> <p>Mitigation Measure 3.17-1b: Require All Structures to Be Constructed with Noncombustible Materials</p> <p>Mitigation Measure 3.17-1c: Ensure Roadways Comply with Board of Forestry State Minimum Fire Safe Regulations</p> <p>Mitigation Measure 3.17-1d: Minimize Wildfire/Ignition Risk during Operations</p> <p>Mitigation Measure 3.17-1e: Minimize Ignition Risk during Events</p>	<p>See above.</p>	<p>See above.</p>	
<p>Impact 3.17-4: Require the Installation or Maintenance of Associated Infrastructure (such as Roads, Fuel Breaks, Emergency Water Sources) That May Exacerbate Fire Risk or That May</p>	<p>Mitigation Measure 3.17-1a: Require All Structures to Meet Defensible Space Parameter</p> <p>Mitigation Measure 3.17-1b: Require All Structures to Be Constructed with Noncombustible Materials</p>	<p>See above.</p>	<p>See above.</p>
