The Water Education Program (Program) is a comprehensive approach to helping educators teach students the value of water as an important natural resource. The Program promotes water conservation and stewardship of our local watersheds. Students are encouraged to use water wisely and make environmentally sustainable choices to help secure a reliable source of fresh water now and in the future. The service area covers over 200 schools throughout Sonoma and northern Marin counties.

Sonoma Water requires bus transportation for students from selected schools in Sonoma and Marin Counties to the Russian River Field Study sites at Sonoma Water's Mirabel and Wohler facilities in Forestville, Lake Sonoma and Warm Springs Dam, Sonoma Water's Rockpile Road Field Study Site in Geyserville, and Jenner, as part of the Headwaters2Ocean Education Program.

On May 7, 2020, Sonoma County Water Agency (Sonoma Water) issued a Request for Statements of Qualifications (RFQ) to the following five firms:
