MEMORANDUM

TW: 23/24-058

DATE: April 2, 2024

TO: Grant Davis, General Manager

FROM: Alex Bodulow, Project Manager

SUBJECT: **Selection of Brown and Caldwell for Russian River Collector Multi-Year Operational Analysis**

Sonoma County Water Agency (Sonoma Water) periodically conducts an operational analysis on its collectors on the Russian River to demonstrate that the collectors continue to produce high quality water and that conditions at the collectors have not changed since the study was first conducted in 1993.

The data collected from telemetry and manual samples at Sonoma Water's collector wells and the Russian River, along with additional research conducted under this Agreement, will be used to evaluate whether significant changes in how the groundwater and surface-water interactions have been observed during this time. Findings will be summarized in a final report that is consistent with the document that was last submitted in 2017.

Brown and Caldwell (Consultant) were selected from a list of qualified consultants developed from a competitive selection process. Attached is a memo that explains the competitive selection process.

Consultant was selected for the subject work because Consultant is a recognized expert on natural filtration as it relates to water supply systems. Consultant specializes in the interaction between surface water and ground water including groundwater under the direct influence of surface water and riverbank filtration.

The hiring of Consultant for this agreement causes no conflict of interest and is not based on any financial incentive provided to Sonoma Water or its employees and representatives.
