

DRAFT VISION AND GUIDING PRINCIPLES

Updated January 11, 2021

A vision is an aspirational description of what the community would like to be in the future. It is a summary of the shared goals to be achieved by the Sonoma Developmental Center Specific Plan. Public involvement helps define the community's vision of future growth and development: the Vision Statement and Guiding Principles are based on input from past community engagement, a community survey and workshop, Planning Advisory Team meetings, and technical analysis.

DRAFT VISION STATEMENT

The former Sonoma Developmental Center is reinvigorated as a vibrant and sustainable community in the heart of Sonoma Valley. A mixed-use, pedestrian-oriented core provides a diverse array of housing choices, and serves as a magnet of innovation, research, education, and visitation. The surrounding open spaces flourish as natural habitats and as agricultural and recreational land linked to regional parks and open space systems. Development builds on the site's rich historic legacy while meeting contemporary needs, emphasizing resiliency and sustainable building practices. Civic uses, community gathering places, and events attract visitors from Glen Ellen, Eldridge, and the broader Sonoma region, making the center a hub of community life in Sonoma Valley.

The former Sonoma Developmental Center (SDC) site, in the heart of Sonoma Valley, has emerged as a culturally and ecologically vibrant and resilient community. A core 180-acre developed area is surrounded by a vast protected open space of oak woodlands, native grasslands, wetlands, forests, creeks, and lakes that provide habitats and wildlife movement corridors; agricultural land; and recreational open space integrated with the surrounding park systems.

The developed core area comprises a complementary mix of housing, commercial, and institutional uses. The SDC site is financially independent and supporting infrastructure is up to date and well maintained. A variety of housing—including affordable, workforce, mid-income, and market-rate housing; senior housing; housing for people with developmental disabilities; and in new and adaptively re-used buildings—will foster a diverse and inclusive community. New development complements the adjacent communities of Glen Ellen and Eldridge. Residents enjoy pedestrian access to essential services and parks, and seamless connections to surrounding open spaces. Employment opportunities reflect the site's legacy of care and emphasize innovation, research, education, environment, and ecology, together with supporting commercial and visitor-serving uses. Sonoma Valley's former largest employment hub is reinvigorated as a regional model for sustainable development.

The reinvigorated community builds upon the site's rich historic legacy while embracing the future. Key historic resources—including the Sonoma House and the Main Building—have been repurposed for contemporary uses, and elements of the historic landscape preserved. Site design patterns—streets layout, building/street relationship, streetscape character—maintain east-west views to the Sonoma and Mayacamas mountains and foster a harmonious sense of place. Contemporary buildings are intermixed with repurposed historic structures, creating a rich and visually cohesive development fabric.

A comprehensive network of pedestrian and bicycle paths connects residents to local and regional destinations, and to transit. Well-designed bus stops, crosswalks, and protected bike lanes create an inviting sense of safety for those of all ages and abilities and provide better walking and biking access to Glen Ellen and Eldridge, and to the regional bicycle network.

New land uses contribute positively to the site's financial feasibility, enabling efficient and sustainable construction of necessary infrastructure. Water is conserved and reused, and safety and fire protection built into the landscape, with defensible design, new fire-resistant buildings, and well-planned evacuation routes. Reuse of historic buildings has saved resources needed for new construction, and building designs reflect sustainable practices and wildfire resiliency. The surrounding open spaces, preserved in perpetuity, are home to countless local species that use SDC's habitat corridors. Sightings of wildlife throughout the site and along Sonoma Creek enrich life for residents.

The SDC site has become a multilingual gathering place for the Sonoma Valley, with public spaces for lingering and enjoying a cup of coffee or a meal; community amenities, cultural spaces, and events; playfields and recreational spaces for soccer games or a game of fetch; and seamless connections to the extensive trail networks of the SDC property, Jack London State Park, Sonoma Valley Regional Park, and the surrounding mountains.

DRAFT GUIDING PRINCIPLES

These Guiding Principles support the overall vision for the SDC and will be reflected in the goals, policies, and implementation measures of the Specific Plan.

- 1. Promote a Vibrant, Mixed-Use Community.** Promote a diverse and integrated mix of residential development and employment uses, including research, education, office, retail, and small businesses, to promote optimal development patterns and site revitalization, and provide economic opportunities for Sonoma Valley communities.
- 2. Emphasize a Cohesive Sense of Place and Walkability.** Establish a cohesive visual landscape with consistent streetscapes and improved sidewalks within the district. Locate land uses and enhance the existing street network to encourage development of a walkable and pedestrian-friendly environment with gathering spaces, diverse activities, and connections within and to surrounding communities and regional trail systems. Ensure that new development complements the adjacent communities of Glen Ellen and Eldridge.
- 3. Integrate Development with Open Space Conservation.** Promote a sustainable, climate-resilient community surrounded by preserved open space and parkland that protects natural resources, fosters environmental stewardship, and maintains and enhances the permeability of the Sonoma Valley Wildlife Corridor for safe wildlife movement throughout the site. Support the responsible use of open space as a recreation resource for the community.
- 4. Balance Redevelopment with Existing Land Uses.** Use recognized principles of land use planning and sustainability to gauge how well proposed land uses protect public trust resources and fit the character and values of the site and surrounding area, as well as benefit local communities and residents.

- 5. Promote Sustainability and Resiliency.** Promote sustainable development practices in building and landscape design. Plan infrastructure efficiently and sustainably, conserving water and creating opportunities for water reuse and recharge. Proactively plan for community safety in natural disasters, especially ensuring that emergency plans and egress routes are in place with adequate capacity, and landscapes and buildings are designed with fire defenses.
- 6. Support Housing Development and Provide a Variety of Housing Types.** Promote housing to address Sonoma County's pressing housing needs and the State's key development objectives for the site. Support a range of housing opportunities, including affordable housing, workforce housing, mid-income housing, housing for individuals with developmental disabilities, senior housing, and market rate housing.
- 7. Balance Development with Historic Resource Conservation.** Preserve and adaptively reuse the Main Building and the Sonoma House, conserve key elements of the site's historic landscape, and strive to maintain the integrity of the historic district to the west of Arnold Drive by adaptive reuse of contributing buildings where feasible. Support a cohesive community feel and character, while allowing a diversity of architectural styles.
- 8. Promote Multi-Modal Mobility.** Promote car-free circulation within the site and promote transportation connections between the SDC site and the larger Sonoma Valley and Bay Area, including through transit access, safe sidewalks and crossings, and regional bicycle routes. Ensure that new development takes into consideration resultant traffic and levels of transportation activity from when SDC was operational.
- 9. Ensure Long-Term Fiscal Sustainability.** Ensure that the proposed plan is financially feasible and sustainable, as financial feasibility is essential to the long-term success of the project. Ensure that the proposed plan supports funding for necessary infrastructure improvements and historic preservation while supporting the Sonoma Valley community's needs and galvanizing regional economic growth.
- 10. Embrace Diversity.** Accommodate the needs of people of diverse backgrounds, interests, and income levels, creating an inclusive, accessible, inviting, and safe place that preserves SDC's legacy of care and creates opportunities for marginalized communities.
