Sonoma Water

MEMORANDUM

TW: 25/26-105

DATE: April 29, 2026

TO: Grant Davis, General Manager

FROM: Kevin Booker, Project Manager

SUBJECT: **Selection of Woodard & Curran, Inc., for As-Needed Assistance with Wastewater Facilities**

On December 6, 2022, the State Water Resources Control Board approved Order No. WQ 2022—0103- DWQ, known as the Statewide Waste Discharge Requirements (WDR) General Order for Sanitary Sewer Systems. This update replaces earlier orders issued by the Board concerning the creation and enforcement of Sewer System Management Plans. These plans must include measures to ensure the effective, proper, and cost-efficient management, operation, and maintenance of sanitary sewer systems.

The WDR specify that wastewater entities with a sewer collection system longer than one mile must develop and implement a system-specific Sewer System Management Plan (Plan).
The main goal of the Plan is to implement a program focused on:

- Preventing any spill that results in the discharge of untreated or partially treated wastewater into waters of the United States; and
- Preventing any spill that causes a nuisance, as defined by the California Water Code (Section 13050(m)). This ensures that:
- Spills are properly managed, operated, and maintained to minimize their impacts on receiving waters and public health.
- When spills occur, responses are prompt, and all feasible steps are taken to reduce their impact, with adequate reporting, recordkeeping, and, when necessary, public notifications.

Along with the Plan, a System Evaluation Capacity Analysis Plan; Audit and Annual Reports are needed. The System Evaluation Capacity Analysis Plan is designed to assess whether the sewer collection system can handle current and future wastewater flows. If the system is unable to manage such flows, the entity must begin planning efforts to address the issue. Additionally, the Plan must be self-audited at least every three years and updated and approved at least once

every six years by the governing board of the sewer system. The Plan should also include management, operational, and maintenance strategies that are cost-effective and consider risk management and cost-benefit analysis. Each year, an Annual Report is due. The Annual Report consists of infrastructure data (pipelines diameter, number of lift stations, etc.); the length of the collection system video (CCTV); the amount (in feet) cleaned; siphons; creek crossings, etc.

Moreover, the Plan must include a Spill Emergency Response Plan that establishes standardized procedures for immediate spill response to minimize water-quality impacts and prevent potential public nuisances or hazardous conditions.

Sonoma Water manages four wastewater Sanitation Districts and owns and operates four wastewater Sanitation Zones. One District, South Park County Sanitation District, is operated under contract with the City of Santa Rosa, and one Zone, Airport/Larkfield/Wikiup Sanitation Zone, is operated under contract with the Town of Windsor. This leaves three Sanitation Districts and three Zones for which Sonoma Water is responsible for preparing and managing the Plans. Each district and zone requires a Sewer System Management Plan, a System Evaluation Capacity Analysis Plan, outreach efforts, an annual report, and an audit. Sonoma Water's Spill Emergency Response Plan covers all districts and zones, except for South Park County Sanitation District, Airport/Larkfield/Wikiup Sanitation Zone, and Sea Ranch SZ, which are managed by others. The Sea Ranch SZ will need its own Spill Emergency Response Plan to meet the area's needs.

The Sewer System Management Plans present opportunities to document and formalize existing Operations and Maintenance procedures, establish a regular auditing schedule, and promote routine public communication about the plans' implementation.

Woodard & Curran, Inc., (Consultant) was selected from a list of qualified consultants developed from a competitive selection process. Attached is a memo that explains the competitive selection process.

Consultant was selected for the subject work because their experience and expertise encompasses operations of wastewater facilities, collection system planning, condition assessments, computer modeling of sewer collection systems, wastewater monitoring, and conducting after-action analyses of significant and/or emergency events.

Internal bargaining unit staff is not being used for this work because of the workload capacity of staff and because staffs lack of experience with the sanitary sewer management plans.

The hiring of Consultant for this agreement causes no conflict of interest and is not based on any financial incentive provided to Sonoma Water or its employees and representatives.

Sonoma Water

MEMORANDUM

TW24/25-116

DATE: September 2, 2025

TO: Grant Davis, General Manager

FROM: Aaron Fulton, Project Manager

SUBJECT: **LIST OF QUALIFIED CONSULTANTS FOR ENGINEERING SERVICES - *NOT TO BE USED FOR FEDERALLY FUNDED PROJECTS UNLESS APPROVED IN ADVANCE BY GRANT MANAGER***

On July 1, 2025, Sonoma County Water Agency and its affiliated sanitation districts (collectively "Sonoma Water") issued a Request for Statements of Qualifications (RFQ) to the attached list of 97 firms.

The RFQ was also posted on the Sonoma County Water Agency website.

The 49 firms listed below submitted Statements of Qualifications (SOQs):

- Alpha CM, Napa, California
- Balance Hydrologics, Berkeley, California
- BKF Engineers, Santa Rosa, California
- Blackburn Consulting, Auburn, California
- Brelje and Race, Santa Rosa, California
- Brown and Caldwell, Walnut Creek, California
- Brunsing Associates, Santa Rosa, California
- Carlile Macy, Santa Rosa, California
- Carollo Engineers, Inc., Walnut Creek, California
- Coastland DCCM, Santa Rosa, California
- Cordoba Corporation, Los Angeles, California
- Corrpro Companies, Inc., Hayward, California
- Dudek, Oakland, California
- EBA Engineering, Santa Rosa, California
- EKI Water & Environment, Inc., Corte Madera, California
- Environmental Science Associates, San Francisco, California
- Freyer & Laureta, Inc., Novato, California

- GEI Consultants, Inc., Rancho Cordova, California
- Geologic Associates, Inc., Petaluma, California
- Geosyntec Consultants, Inc., Oakland, California
- GHD, Inc., Santa Rosa, California
- Harris & Associates, Inc., Concord, California
- HDR Engineering, Inc., Folsom, California
- InfraTerra, Inc., San Francisco, California
- Integrated Project Solutions, Walnut Creek, California
- Jacobs Associates (dba Delve Underground), Walnut Creek, California
- Kennedy/Jenks Consultants, Inc., Santa Rosa, California
- Kleinfelder, Inc., Santa Rosa, California
- LEE + RO, Inc., Walnut Creek, California
- Northwest Hydraulic Consultants, Inc., Sacramento, California
- Peterson Structural Engineers, Inc., San Diego, California
- Prunuske Chatham, Inc., Sebastopol, California
- R&F Engineering, Inc., Roseville, California
- Restoration Design Group, Inc., Berkeley, California
- Sonoma RSA, Inc., Napa, California
- Schaaf & Wheeler Consulting Civil Engineers, Santa Rosa, California
- Shannon & Wilson, Inc., Concord, California
- Stetson Engineers Inc., San Rafael, California
- Summit Engineering, Inc., Santa Rosa, California
- Tall Tree Engineering, Rohnert Park, California
- Terracon Consultants, Inc., Cotati, California
- V & A Consulting Engineers, Inc., Oakland, California
- Verdantas, Inc., West Sacramento, California
- Water System Consulting, Inc., Folsom, California
- WEST Consultants, Inc., Folsom, California
- West Yost & Associates, Inc., Santa Rosa, California
- Wood Rodgers, Inc., Sacramento, California
- Woodard & Curran, Walnut Creek, California
- ZFA Structural Engineers, Santa Rosa, California

The following criteria were used to evaluate each firm:

- Thoroughness of SOQ.
- Professional qualifications and demonstrated ability to perform the work.
- Exceptions to standard terms in the sample agreement.
- Local preference.

Based on the evaluations, the following respondents were selected for the list of qualified consultants by service category:

For projects requiring engineering and related services, Sonoma Water will contact individual firms from the above list to determine availability and potential conflict of interest with other projects that the firm is undertaking, and to prepare a cost proposal to perform the work.

Prior to contacting a firm, Sonoma Water will, at a minimum, vet the firm against federal sanctions lists to comply with Executive Order N-6-22. Executive Order N-6-22 was issued by Governor Newsom to support federal efforts aimed at the Russian war on Ukraine. To remain eligible for state contracting and grant funding, Sonoma Water will not contract with firms listed on the sanctions lists or that are a target of the federal sanctions.

SOQs and evaluation forms have been sent to Records.
