Sonoma Water

MEMORANDUM

TW: 24/25-066

DATE: May 27, 2025

TO: Grant Davis, General Manager

FROM: Kevin Booker, Project Manager KB

SUBJECT: **Selection of Brown and Caldwell for Feasibility Study of the 8th Street East Recycled Water Pipeline Project**

Sonoma Valley County Sanitation District (District) and the Sonoma Valley Groundwater Sustainability Agency (SVGSA) are proposing to study recycled water pipeline routes in the unincorporated area of Sonoma County along the 8th Street East corridor (Project) that will be able to supply recycled water for commercial use and agricultural users.

The Project will analyze three potential pipeline alignment alternatives that connect to the existing District's reclamation system, located at the District's wastewater treatment plant.

The results of this study will inform future design for the Project. This study will assist SVGSA and District on where to expand the use of recycled water to assist in the reduction of over-drafting the groundwater.

Brown and Caldwell (Consultant) was selected from a list of qualified consultants developed from a competitive selection process. Attached is a memo that explains the competitive selection process.

Consultant was selected for the subject work because of their experience implementing recycled water projects and studies; their familiarity with the North Bay Water Reuse Authority (NBWRA), and projects implemented under NBWRA, and United States Bureau of Reclamation funding processes.

Internal bargaining unit staff is not being used for this work because the work is beyond the capacity of staff.

The hiring of Consultant for this agreement causes no conflict of interest and is not based on any financial incentive provided to District or its employees and representatives.
