

SUMMARY REPORT

Agenda Date: 4/16/2019

To: Sonoma County Board of Supervisors
Department or Agency Name(s): County Administrator's Office
Staff Name and Phone Number: Michael Gossman, 565-2341
Vote Requirement: Informational Only
Supervisorial District(s): All

Title:

Recovery Update

Recommended Actions:

Receive an update on the status of recovery operations, planning and seeking of funding opportunities following the October 2017 Sonoma Complex Fires and the 2019 Winter Storm Events.

Executive Summary:

Office of Recovery and Resiliency staff provides the Board regular updates on disaster recovery efforts, including building permits; external funding and grant efforts; and relevant legislation.

Discussion:

In an effort to keep the Board and community informed about the County's recovery efforts, the Office prepares a standing agenda item for each Board meeting, typically included on the consent calendar. This update includes information on: Ongoing Recovery Efforts; Housing; Recovery Related External Funding Opportunities; and other items of interest. In addition to the standing agenda item, the Office will be presenting quarterly updates to the Board on the status of the implementation of the Recovery and Resiliency Framework. The quarterly updates are scheduled for the following Board meetings this calendar year: April 16, July 9, and November 5, 2019.

2017 Sonoma Complex Fires

1. Ongoing Recovery Efforts

A. Debris Removal

The U.S. Army Corps of Engineers in May 2018 concluded the Government-Sponsored Debris Removal Program in Sonoma County on 3,674 participating properties and stopped accepting new debris-related complaints.

Additionally, the California Office of Emergency Services on December 14, 2018 concluded the program that addressed over-excavation and property damage issues that occurred during the Government-Sponsored Debris Removal Program. Owners of 722 properties in Sonoma County requested site assessments by the September 21, 2018 deadline; 381 properties were ruled eligible and remedied by

CalOES; 341 properties were ruled ineligible for the program.

All properties in the Public Debris Removal Program have been cleared. CalOES has completed remediation work for properties it deemed eligible for the Over Excavation Program, except for one. This one project is incomplete due to weather, and will be completed at the end of the rain season. We have been advised that FEMA completed the cost reports, and both CalOES and the County expect to receive them in the near future.

If property owners require additional clarification specific to the Debris Removal Program, they can contact the California Office of Emergency Services Recovery Section at 916-845-8200. If property owners have other questions or concerns, they can contact Sonoma County's Office of Recovery and Resiliency at 707-565-1222.

2. Housing

A. Resiliency Permit Center

Permit Sonoma established a Resiliency Permit Center providing expedited comprehensive permitting and inspection services for those who lost homes in the fires and their representatives dealing with reconstruction of approximately 3,000 residential structures destroyed or damaged by the Sonoma Complex Fire. Services at the Resiliency Permit Center began February 13, 2018. In 2019, the Resiliency Permit Center will also provide, free of charge, a general review of bid proposals to fire survivors to help them determine where scope and pricing are appropriate.

B. Sonoma County Energy Independence Program (SCEIP) Financing Expansion: Fire Hardening and Seismic

Currently, the Sonoma County Energy Independence Program (SCEIP) finances improvements that can make a home more fire hardened as long as those improvements meet the Program's energy requirements (e.g. roofing, siding, windows and air sealing). In addition, SCEIP is authorized for water conservation improvements and could add the additional improvement of hardscaping as a water saving feature.

The County has been actively marketing this aspect of the Program through a postcard mailer to the roughly 1,512 properties in Sonoma that are part of CalFire's very high fire severity zone. In addition to the mailer, there is a social media campaign and both print and digital ads in the Press Democrat.

Your Board is considering expanding the Program to include seismic and fully authorize fire hardening

improvements. Consideration of this enhancement to the program is anticipated in early summer.

C. FEMA Direct Housing Program Extension

This federally-implemented program was intended to run for 18 months (thru April 10, 2019) for qualified fire survivors in need of mid-term temporary housing while they searched for alternative long-term housing solutions.

As of March 21, 2019, the FEMA Direct Housing program was supporting 68 households within Sonoma County who are displaced because of the October 2017 wildfires. Of these, 27 households were in direct lease apartments, 40 in RVs at the fairgrounds, 1 RV on a private lot. Of the 40 in the RVs at the fairgrounds, there were three (3) owners and 37 renters.

FEMA has approved the request to extend the period of assistance for Direct Temporary Housing. The period of assistance for pre-disaster owners is extended to July 10, 2019, and the period of assistance for pre-disaster renters is extended through May 10, 2019. After April 10, 2019, participants will begin paying rent. The number of owners paying rent will be a function of how many of the three have moved out. FEMA will be providing updated numbers once they have updated their system. The number of renters paying rent will be a function of how many of the 37 have moved out. FEMA will be providing updated numbers once they have updated their system. This rent is based on fair market values and the participants' ability to pay. FEMA will be working with participants to determine the amount.

D. Rebuilding Permits

1. The County has issued 945 building permits for homes as of April 8, 2019; 147 permits are in process; 61 homes have been finished. For the latest numbers, go to <http://sonomacounty.ca.gov/PRMD/Performance-Data/Rebuilding-Permits-Data/>>
2. The City of Santa Rosa has issued 1,247 building permits for homes as of April 8, 2019; 270 permits are in process; 237 homes have been finished. For latest numbers, go to <https://www.srcity.org/2675/Rebuilding>>

See attachment: Permit Report 4-8-19

3. Recovery-Related External Funding Opportunities

A. Federal Funding In Process: FEMA Hazard Mitigation Grant Program

FEMA Hazard Mitigation Grant Program Spotlight

After the 2017 Fires, the newly formed Office of Recovery and Resiliency (ORR) convened a Grant Steering Committee to identify and prioritize projects that could be eligible for funding from various grant sources, but particularly the Federal Emergency Management Agency (FEMA) Hazard Mitigation Grant Program (HMGP). The California Office of Emergency Services (CalOES) administers these federal funds to provide for the implementation of hazard mitigation project activities.

Through ongoing coordination of the Grant Steering Committee, 28 applications for federal funding were approved by the Board of Supervisors for submittal with a total estimated project cost of \$47.7 million. The grant proposals aim to support the five strategic areas for recovery identified in the Sonoma County Recovery and Resiliency Framework (i.e., Natural Resources, Community Preparedness & Infrastructure, Safety Net Services, Housing, and the Economy). CalOES has notified the County Administrator's Office that 18 of the County's submitted proposals have been recommended for FEMA funding. Of the ten remaining, nine are still being reviewed and one has been waitlisted. The Seismic Strengthening and Retrofit of Existing Structures is the waitlisted proposal. Waitlisting is akin to "not being moved forward" rather than "being denied." The anticipated start date for the 18 projects is October 2019.

This week's Spotlight is on three proposals from Permit Sonoma. Permit Sonoma has participated in the proposal process to address the Community Preparedness, Housing and Natural Resources strategy areas in the Framework. The total project cost of the six proposals combined is \$18,488,887.

- 1. Wildfire Adapted Sonoma County: Education and Incentives for a Safe and Resilient Sonoma County.** This project will mitigate wildfire risks to homes, lives and property in Sonoma County. Permit Sonoma, Fire Prevention Division, will do this by implementing a program to assess the 100' of defensible space around the home and provide a recommendation for renovations to the home itself. The first phase of this project is to educate Sonoma County's Wildland Urban Interface Zone residents about the importance of defensible space and the principles of structural hardening through targeted events and outreach.

Comprehensive community-wide Defensible Space Inspections and voluntary Wildland Urban Interface Zone structure evaluations will follow outreach. Assessing the older homes that could be extremely at-risk due to structural elements that make them vulnerable to wildfire ignition is an essential component of this project. In Sonoma County, there are 27,286 structures in the Wildland Urban Interface Zone.

Defensible space around the homes in the project area will be conducted by Fire Inspectors and site-specific reports supplied to property owners. The County will then provide cost-share incentives to help property owners mitigate items of highest risk, as identified by inspections and availability of funding. Defensible space recommendations must be implemented prior to the start of structural hardening renovations. Property owners must provide their 25% cost share for the project up front and agree to maintain the project for its useful life (e.g., 30 years). Program participants will be selected based on readiness to proceed and then be rank ordered by a technical advisory committee to meet the number of buildings to be retrofit in the scope and budget.

This program is designed to be a proof of concept for the County and will provide about \$4.3M in direct benefit to approximately 500 private property owners through implementation of defensible space and home hardening recommendations. The total cost of this project is \$6,677,777, of which 75% will be provided by the grant. The long-term maintenance costs of retrofit projects will be the responsibility of the private property owner. This project does not have a long-term maintenance cost to the County. CalOES has recommended this project for full FEMA funding.

2. Seismic Strengthening and Retrofit of Existing Structures, Sonoma Countywide.

The entire Sonoma County population faces some risk and vulnerability to earthquake activity but the risk is considered greatest in areas near earthquake fault zones. Less than ten percent of unincorporated Sonoma County population, or about 13,800 people, live close to the Rodger's Creek or San Andreas faults in areas with the highest probability of violent shaking.

A HAZUS model conducted by Fire and Emergency Services (FES) found that a magnitude 7.3 earthquake on the Rodger's Creek Fault would cause \$29.2 billion in capital stock losses (i.e., losses from structures, contents, inventory, and non-structure damage) and total income loss of \$5.7 billion. A similar earthquake of magnitude 8.0 along the San Andreas Fault would cause \$7.5 billion in capital stock losses and an estimated \$1.1 billion in lost income.

An estimated 10,600 people in the County live in areas potentially at risk of liquefaction. Another 19,200 people live in areas that could experience seismically-induced landslides. Typically, damage in an earthquake is most intense near the epicenter, along the trace of the fault, and in high-risk areas (liquefaction zones and landslide hazard zones). The total damage area affected and the cost of the hazard would vary with the size, location, and type of earthquake. The goal of this project is to implement a phased project that would:

- a. Prepare a feasibility study that identifies an inventory of potentially vulnerable single or multi-family homes in Sonoma County and recommends a mitigation alternative for each structure;
- b. Explore mitigation alternatives and develop a dedicated County building permit

- program to facilitate seismic retrofits for single or multi-family homes in Sonoma County;
- c. Explore potential incentives and funding mechanisms for Sonoma County homeowners to retrofit older homes; and
- d. Develop and implement a program to provide up to 75% of design and construction costs to seismically retrofit single or multi-family homes in Sonoma County.

Permit Sonoma will outreach to approximately 2,200 qualifying parcels. Once a property owner has expressed interest and a preliminary inspection conducted to determine the appropriate retrofit method, the property will be required to enter into agreement with the County that they: 1. support the goals of the project, 2. agree to participate in the project, 3. Will provide maintenance of the project through the useful life of the project (e.g., 30 years). Before owners can participate in having engineered designs for the retrofit they must provide their 25% owner contribution prior to signing a contract for work. Participants will then be rank ordered by a technical advisory committee to meet the number of buildings to be retrofit in the scope and budget. This program designed is modeled after CDC's mobile home elevant program and is considered a proof of concept program which if successful can lead to multiple similar county-run programs

The total cost of this project is \$6,677,777, of which 75% will be provided by the grant. Of the total project cost, about \$5M will provide direct benefit to approximately 300 homes. The long-term maintenance costs of retrofit projects will be the responsibility of the private property owner. This project is on the waitlist for FEMA funding.

3. **Sonoma County Hazardous Fuels Treatment Project.** More than 50.5% of Sonoma County's land area approximately 513,388 acres - is comprised of coniferous forest and oak woodland. Historically, the North Sonoma Coast forest has burned roughly every 30 years. Yet the coast range has not experienced a significant wildfire since 1978, when the Creighton Ridge fire consumed 11,000 acres and 64 homes. Since then, the North Coast has experienced a decline in forest health and a sharp increase in fuel loading.

As Sonoma County recovers from the fires, residents and decision makers are working hard to plan mitigation activities that will reduce risk to our communities. Presently, land managers- both public and private-rely largely on field-based project surveys to target hazardous fuels treatments. The County is seeking funding to develop a centralized data management system to store and analyze data that meets specific quality assurance criteria (i.e., Sourced, Reliable and Comparable).

The County will use existing data sets to inform a County-wide strategy and then provide project partners (i.e., State and Federal Resource Agencies, Non-Profit Organizations, County Departments and Districts and other interested public) with an easy-to-use, interactive online

tool to accelerate the design and implementation of projects that will inform the implementation of hazardous fuels reduction project, in turn reduce the future wildfire risk in Sonoma County and beyond.

The total cost of this project is \$4,500,000, of which 75% will be provided by the grant. The long-term maintenance costs of this project has yet to be determined. This project is still going through the CalOES review process.

B. Community Development Block Grant - Disaster Recovery

Announcement of \$212 Million: U.S. Department of Housing and Urban Development (HUD) announced on April 10, 2018, that California would be receiving \$212 million to support long-term disaster recovery through the Community Development Block Grant - Disaster Recovery (CDBG-DR) program, including \$124 million for unmet disaster recovery needs, and \$88 million for preparedness and mitigation. The Federal Register governing the \$124 million portion for unmet disaster recovery needs was issued on August 20, 2018.

Action Plan: on March 15, 2019, HUD approved the Action Plan for the \$124 million portion for unmet disaster recovery needs as submitted by California Department of Housing and Community Development (HCD), who is the Grantee and receiver of the funds. HUD is still reviewing HCD's Implementation Plan, Capacity Assessment, and Financial Certifications to ensure sufficient capacity to manage the funds and associated risks. HUD also is encouraging HCD to revisit the unmet needs assessment in the Action Plan as new data becomes available and recovery progresses throughout the life cycle of the grant.

The Action Plan details the proposed use of all funds. HCD's proposed Action Plan includes a budget of \$47.6 million for an owner-occupied housing program, \$66.7 million for a multifamily housing program, \$3.5 million for a Federal Emergency Management Agency (FEMA) Public Assistance (PA) match program, and \$6.2 million for administration.

The owner-occupied program is proposed to be a Statewide program by HCD. HCD will release a Survey to help finalize the owner-occupied program prior to opening up the application process.

The multi-family program awards sub-grant funds to the impacted local jurisdictions. Multi-family

program funds are allocated proportionate to the number of Low and Moderate Income renters (those with incomes below 80% of the Area Median Income) within the disaster-affected areas of each jurisdiction. In HCD's Action Plan, Sonoma County received an allocation of \$4,698,809 and the City of Santa Rosa received \$38,469,772. Once HCD publishes program guidelines, the Community Development Commission will use these to inform a proposed process for selecting projects - likely via a Notice of Funding Availability. The Board of Supervisors will make the final determination of what local requirements will be, and for making the final selection of developments to be submitted to HCD for eligibility and compliance review. Community Development staff will be responsible for ensuring compliance with HCD and HUD requirements for use of these funds.

Status of \$88 Million for Preparedness and Mitigation Funding: HUD to develop and finalize the rules and publish in the Federal Register in order to begin the funding cycle. The date the Federal Register will be published has not been announced, although there have been discussions about it possibly being published in May 2019.

The County Administrator's Office has worked with Congressman Mike Thompson's Office to advocate to the United States Senate through U.S. Senator Diane Feinstein to include an additional \$11.1 million in CDBG-DR monies for the State of California.

2019 Winter Storms and Flooding Update Summary

A. Flood Overview

On February 26, 2019, Sonoma County Supervisors declared a Local Emergency as powerful winter storms battered the county. On February 28, 2019, Governor Newsom declared a State of Emergency for Sonoma County.

Sonoma County's Health Officer declared a local health emergency on March 5, 2019 due to the scale of household hazardous waste scattered along waterways, roadsides, and on public and private properties after flooding.

At the March 7, 2019 Special Meeting, your Board ratified the County Health Officer's proclamation of local health emergency due to the presence of significant household hazardous waste in the flood zone that requires proper disposal.

Early damage assessments estimated over \$150 million in countywide flood damages. Thirty-one structures received red tags, which means that the structure is damaged and poses an imminent threat

to life or safety under expected loads or other unsafe conditions, while 527 structures received yellow tags, which means inspectors determined that there is some risk from damage to the structure. There were 1,035 green tags, which means the structure has been impacted by the event but remains safe yet repairs may still be needed. Finally, an additional 136 locations did not have access provided in order for an inspection to occur.

Permit Sonoma does not change the Rapid Evaluation Safety Assessment tag status when the safety issue is addressed via permitted work or otherwise. The Rapid Evaluation Safety Assessment tag represents the safety of that structure the moment it was evaluated and posted per CAL OES Rapid Evaluation Safety Assessment guidelines.

As of April 12, 2019, Permit Sonoma reported 192 permits have been pulled on parcels identified as impacted by the 2019 Winter Storm and Flooding event to make needed repairs. There are 140 permits on unique parcels, with some parcels having multiple permits. 14 permits have been issued on parcels with red tags, 122 permits have been issued on parcels with yellow tags, 25 permits have been issued on parcels with green tags, and 6 permits have been issued on parcels identified as no access. The remaining 26 permits are on parcels that were not included in the Rapid Evaluation Safety Assessment inspections but have subsequently been determined by permit technicians as repair work directly related to the flood event. The permits cover a range of repairs, with the most common being electrical, sheetrock, insulation, and plumbing repairs common with such events.

In addition to private property damage, there are at least \$23.5 million in damages to public property including debris removal, emergency protective measures, non-federal road and bridge systems, water control facilities, public buildings, public utilities, and park and recreational facilities. Damage estimates also include approximately \$4 million in physical agriculture damage.

The County experienced significant road damage on several sites that require exigent work to open or maintain the road as passable due to the importance of the routes. Transportation and Public Works (TPW) has estimated that the temporary repair work is of significant cost.

Site locations and estimated costs of the temporary repairs are:

1. King Ridge Road - roadway slip (estimated repairs: \$660,000).
2. Mays Canyon Road - bridge approach failure (estimated repairs: \$200,000).
3. Geysers Road in Cloverdale - roadway slip (estimated repairs: \$600,000).

Further, TPW is reviewing another site on Moscow Road that may have high temporary repair costs. Finally, Fort Ross Road had two culvert washouts, and a temporary portable, pre-fabricated truss bridge was installed and TPW is working with CalOES on options for permanent solutions.

Your Board voted to direct staff to offer curbside debris collection to assist Russian River communities with the significant amount of waste created by the flood disaster at no cost to residents. This was in response to the health and environmental risk posed by flood debris accumulating in streets, parking lots and in other public areas.

The County collected 1,711.62 tons of waste at the staffed debris drop off sites which were open from Saturday, March 2, 2019 through Saturday, March 9, 2019.

Curbside debris collection from the floods began on March 11, 2019 and ran three weeks. The total tonnage of curbside debris picked up through March 29, 2019 was 3,846 tons for the first three weeks of the program.

2019 Flood Debris Cleanup program includes the estimated costs for the work already performed and projected costs for work being performed at this time.

The estimated costs for debris removal from March 1, 2019 through March 22, 2019 are:

Recology w/subcontractors:	\$960,000
Disposal (3,078 tons):	\$424,764
Monitoring:	\$110,000
Total:	\$1,494,764
Total with 20% contingency:	\$1,793,717

The projected costs for debris removal from March 23, 2019 through March 29, 2019 are:

Recology w/subcontractors:	\$180,000
Disposal (900 tons projected):	\$124,200
Monitoring:	\$25,000
Total:	\$329,200
Total with 20% contingency:	\$395,040

The combined estimated and projected cost totals for debris removal are:

Grand Total:	\$1,823,964
Grand Total 20% contingency:	\$2,188,757

Note that a contingency of 20% has been included in these estimates to capture ancillary costs to the program including traffic control, county staff time (drivers, field supervisors, signs), accounting and record keeping, etc., all necessary to facilitate reimbursement for the performed work. As of April 12, 2019, the estimated expenses are expected to be within the contingency amount.

The Local Assistance Center (LAC) was opened in Guerneville by the Office of Recovery and Resiliency on Sunday, March 3, 2019 and closed on Saturday, March 9, 2019. The LAC served a total of 886 individuals with 1,995 total services provide by all agencies. The most visited County agencies were Permit Sonoma who served 264 individuals, Cal Fresh who served 145 and Community Development Corporation who served 114. The most visited State agencies were DVM who served 216 individuals and CDPH (Vital Records) who served 113. Of the Non-Profit agencies, Red Cross was the most visited, serving 404 individuals, while Catholic Charities served 173 individuals.

The Recovery Operations Center was demobilized on March 20, 2019 and the County transitioned to long-term flood recovery, led by the Office of Recovery and Resiliency but with significant participation from several County agencies.

On March 6, 2019, Sonoma County requested California Disaster Assistance Act (CDAA) funds for private property debris removal because of damages sustained during the event. Governor Newsom has authorized CDAA (CDAA-2019-01-06) for Sonoma County who will perform the debris removal from the public rights-of-way and request reimbursement from Cal OES for the eligible activities at a 75 State/25 County percent cost share.

Immediate response costs totaling \$2.5 million were programmed on March 12, 2019. This includes a \$625,000 match and \$1,875,000 of State disaster aid. Funding for the match includes \$125,000 of contingencies, \$250,000 from the Reinvestment and Revitalization Fund, and \$250,000 from the Transportation and Public Works Special Concessions Fund. Funding for local cost share on permanent work will be identified as projects are identified and developed.

On March 19, 2019, your Board approved a \$150,000 contract with West County Community Services for a Flood Survivor Rapid Re-Housing Program. West County Community Services, the established and capable provider of a range of safety net services in the area, will use the funds to provide housing navigation, short-term rent assistance (including deposits), and transportation services as needed for those without vehicles, for those individuals who have been directly displaced by the Flood Disaster. The ability to quickly invest these one-time funds will prevent affected flood survivors from becoming homeless.

B. Loan Assistance for Businesses Impacted by Flood

The Economic Development Board is helping local businesses impacted by the 2019 winter storms and floods to recover by providing support to access a number of loan programs and resources. There are six different loan programs available.

Nor-Cal Financial Development Corporation (FDC) is offering three loan opportunities for small businesses who incurred damages from the floods. Opportunities include:

- Disaster Relief Loan Guarantee Program, which offers up to \$1.25 million in loans to repair or replace property, inventory, supplies, and equipment, or to relocate the businesses. Interest rates for these loans are less than 9% and are negotiated with lender for up to 7-year terms. This is offered through a partnership with IBank.
- Jump Start Loan Program, which offers up to \$10,000 in quick microloans for small businesses to meet their obligations and pay their necessary operating expenses, as well as general start-up expenses. Interest rates are less than 9% with 5-year terms.
- Small Business Loan Guarantee Program, which offers up to \$20 million in loans with a

maximum loan guarantee of \$2.5 million or up to 80% of the loan with 0- to 7-year terms.

The California Infrastructure and Economic Development Bank (IBank) is providing two loans.

Opportunities include:

- Industrial Development Bond Financing Program is available for all manufacturing or processing businesses and offers up to \$1 million to \$10 million in low-cost, low-interest loans for manufacturing companies to be used for land acquisition, building construction, building renovation, or equipment purchasing.
- Farm Loan Program is available for owners or operators of family farms and vineyards who are otherwise unable to secure a loan without a guarantee. This program provides up to \$1.4 million in low-interest loans for operation and production expenses, including repair or construction of buildings and storage facilities; purchase of equipment, livestock, seed, or fertilizer; soil and water conservation; or refinancing debt.

In addition, Working Solutions offers the North Bay Emergency Relief Loan Program, providing up to \$50,000 in loans to pay for obligations and operating expenses, as well as replacement/repair of equipment, inventory, or property. Working Solutions is a certified nonprofit Community Development Financial Institution (CDFI) that supports San Francisco Bay Area entrepreneurs to start and grow local businesses.

Since the floods, Nor-Cal FDC has helped connect four businesses with possible financing to be guaranteed by the state Disaster Loan Guarantee Program. Working Solutions is also assisting five businesses for possible direct loan assistance as well as giving existing loan clients a forbearance on their payments.

For additional information about loans and other resources for local businesses, go to <http://sonomaedb.org/Business-Assistance/Flood-Recovery-Business-Resources/>

C. SBA Flood Loan Program For Businesses and Residents

Low-interest federal disaster loans are available to businesses and residents affected by winter storms and flooding that began on Feb. 25, 2019. SBA acted under its own authority to declare a disaster in response to a request SBA received from Gov. Gavin Newsom on March 14, 2019. The disaster declaration makes SBA assistance available in Lake, Marin, Mendocino, Napa, Solano, and Sonoma counties.

According to SBA, low-interest federal disaster loans are available to businesses of all sizes, most private nonprofit organizations, homeowners and renters whose property was damaged or destroyed by this disaster.

Beginning Monday, March 25, SBA representatives will be on hand at the following Disaster Loan

Outreach Center to answer questions about SBA's disaster loan program, explain the application process and help each individual complete their application.

The center will be open on the days and times listed below until further notice and no appointment is necessary:

Disaster Loan Outreach Center
Former Bank of America Building
16390 Main St.
Guerneville, CA 95446
Mondays, Tuesdays, Thursdays, Fridays, 9 a.m. - 6 p.m.
Wednesdays, 1 p.m. - 7 p.m.

The deadline to apply for property damage is May 20, 2019. The deadline to apply for economic injury is December 23, 2019.

Businesses of all sizes and private nonprofit organizations may borrow up to \$2 million to repair or replace damaged or destroyed real estate, machinery and equipment, inventory and other business assets. SBA can also lend additional funds to businesses and homeowners to help with the cost of improvements to protect, prevent or minimize the same type of disaster damage from occurring in the future.

For small businesses, small agricultural cooperatives, small businesses engaged in aquaculture and most private nonprofit organizations of any size, SBA offers Economic Injury Disaster Loans to help meet working capital needs caused by the disaster. Economic injury assistance is available regardless of whether the business suffered any property damage.

Disaster loans up to \$200,000 are available to homeowners to repair or replace damaged or destroyed real estate. Homeowners and renters are eligible for up to \$40,000 to repair or replace damaged or destroyed personal property.

Interest rates can be as low as 4 percent for businesses, 2.75 percent for private nonprofit organizations and 2.063 percent for homeowners and renters with terms up to 30 years. Loan amounts and terms are set by SBA and are based on each applicant's financial condition.

Applicants may apply online, receive additional disaster assistance information and download applications at <https://disasterloan.sba.gov/ela>

Applicants may also call SBA's Customer Service Center at (800) 659-2955 or email disastercustomerservice@sba.gov <<mailto:disastercustomerservice@sba.gov>> for more information on SBA disaster assistance. Individuals who are deaf or hard of hearing may call (800) 877-8339.
