

## SUMMARY REPORT

---

**Agenda Date:** 11/5/2019

---

**To:** Board of Supervisors

**Department or Agency Name(s):** Department of Health Services; Office of Recovery and Resiliency

**Staff Name and Phone Number:** Christine Sosko, 565-6521

**Vote Requirement:** 4/5th

**Supervisorial District(s):** All

**Title:**

Urgency Ordinance Establishing Requirements For The Removal Of Fire Damaged Debris From Private Property Following The Kincade Fire

**Recommended Action:**

Waive further reading of the Kincade Fire Cleanup Emergency Ordinance and adopt the urgency ordinance.

**Executive Summary:**

The Kincade Fire has destroyed or damaged 434 structures, 208 of which are residential. The Health Officer proclaimed a local health emergency on October 30, 2019 due to contaminated debris from household hazardous waste/materials and structural debris resulting from the destruction of a large number of structures. On November 1, 2019, the Health Officer issued an order advising that "Property owners and the community should not enter the burn footprint of structures without Personal Protective Equipment," and requiring no cleanup activities without the written authorization of the Department of Health Services, Environmental Health. The proposed Kincade Fire Cleanup Emergency Ordinance establishes cleanup standards to protect public health and the environment, and to facilitate recovery. It tracks the cleanup ordinance from the 2017 Sonoma Complex Fires. At this time it is unknown whether there will be a public cleanup option administered by the California Office of Emergency Services. If there is a public cleanup option, no alterations will be required of this ordinance.

**Discussion:**

The Kincade Fire has had a devastating impact on Sonoma County. As of 700 hours on November 4, 2019, 77,758 acres have burned, 374 structures have been destroyed, 174 of which are residences, and an additional 60 have been damaged, 34 of which are residences. The Health Officer proclaimed a local health emergency on October 30, 2019 due to contaminated debris from household hazardous waste/materials and structural debris resulting from the destruction of a large number of structures. On October 31, 2019, the Board of Supervisors ratified the local emergency proclaimed by the Director of Emergency Services. On November 1, 2019, the Health Officer issued an order advising that "Property owners and the community should not enter the burn footprint of structures without Personal Protective Equipment," and requiring no cleanup activities without the written authorization of the Department of Health Services, Environmental Health. Debris and ash from this fire contain hazardous substances. The health effects of hazardous substance releases after a wildfire are well documented. Improper handling can expose workers to toxic materials, and improper transport and disposal of fire debris can spread hazardous substances throughout the community. The proposed Kincade Fire Cleanup Emergency Ordinance substantially mirrors the requirements for private

cleanups from the October 2017 Sonoma Complex Fires. The cleanup standards are the cleanup standards recommended by CalRecycle. Samples will be required to establish baseline/background conditions and post-cleanup conditions. The health screening levels are found in the attached Debris Removal Requirements document, adapted from CalRecycle guidance. In Sonoma County, the geology in many areas exceeds health screening levels for some chemicals - for example, arsenic - and where this is the case, the cleanup will only be required to meet background conditions in the area.

Staff believes standards for cleanups need to be put in place as expeditiously as possible to protect public health and the environment, and to facilitate recovery. The County has requested a Phase I (Household Hazardous Waste sweep) and Phase II (debris removal) cleanup be conducted by the State. At the time of this writing, the State has declined and only offered technical assistance related to the Kincaid Fire disaster. If this changes, the Director of Environmental Health and Safety will have the authority under the emergency ordinance to make minor clarifications to the cleanup requirements. Various State agencies will be participating in the County's Debris Removal Taskforce.

**Prior Board Actions:**

Ratification of Local Emergency, October 31, 2019

**FISCAL SUMMARY**

<b>Expenditures</b>	<b>FY 19-20 Adopted</b>	<b>FY20-21 Projected</b>	<b>FY 21-22 Projected</b>
Budgeted Expenses			
Additional Appropriation Requested			
<b>Total Expenditures</b>			
<b>Funding Sources</b>			
General Fund/WA GF			
State/Federal			
Fees/Other
