# **COUNTY OF SONOMA**

575 ADMINISTRATION DRIVE, ROOM 102A SANTA ROSA, CA 95403

## SUMMARY REPORT

**Agenda Date:** 3/10/2020

**To:** The Board of Directors of the Sonoma County Water Agency **Department or Agency Name(s):** Sonoma County Water Agency

Staff Name and Phone Number: Grant Davis 547-1911

Vote Requirement: 4/5th Supervisorial District(s): All

### Title:

Receive Report on Emergency Need to Perform Work to Stabilize Dangerous Conditions Resulting from Pipeline Corrosion on the Cotati Aqueduct in the Meter Vault at the River Road Chlorine Building.

#### **Recommended Actions:**

- A) Receive report on emergency need to perform work to stabilize dangerous conditions resulting from pipeline corrosion on the Cotati Aqueduct; and
- B) Make findings that there is an ongoing emergency need to stabilize dangerous conditions resulting from the pipeline corrosion; and
- C) Continue to suspend competitive bidding requirements for emergency flooding repairs (4/5<sup>th</sup> Vote Required)

#### **Executive Summary:**

This item requests the Board of Directors for the Sonoma County Water Agency (Sonoma Water), to make findings of the ongoing emergency need to stabilize dangerous conditions resulting from pipeline corrosion on the Cotati Aqueduct and continue to suspend competitive bidding requirements.

#### **Discussion:**

On February 19, 2020, the General Manager of Sonoma Water, pursuant to authority delegated in Resolution # 06-0649, declared the existence of an emergency for Sonoma Water due to pipeline corrosion occurring on the Cotati Aqueduct. In response, the Sonoma Water Emergency Operations Center (EOC) was activated to assist with managing the impacts. As a result of the corrosion occurring on the Cotati Aqueduct, dangerous conditions have arisen at the River Road Chlorine building owned or maintained by Sonoma Water that was sudden and unexpected, and poses a clear and imminent danger requiring immediate action to prevent or mitigate the loss or impairment of life, health, property, or essential public services.

Based upon discussions with the consultant and staff's experience, it was determined that potential failure of the pipeline was highly possible. If the pipeline were too unexpectedly fail, it could cause major eroding and flooding along River Road, thereby posing a significant danger to motorist. In addition, the flooding would impact neighboring properties and businesses in the area.

Based upon the above, there is an urgent need to make the needed repairs to Sonoma Water's potable water
