1) Project Description - Provide a comprehensive project description. For operations projects, include: number of trips, span, frequency improvements, and number of days of operation. For capital projects, include: product specifications and identify all LCTOP funded components. No more than 12 lines.

LCTOP funding is being requested by Sonoma County Transit (SCT) to assist with the purchase of two 35-foot electric-powered buses that will be available for deployment on intercity routes 44 and 48 providing service to the cities of Santa Rosa, Rohnert Park, and Petaluma. The two low-floor buses will be 35-feet in length and equipped with 32 seats, 2 ADA-compliant wheelchair securement areas, security cameras, AVL systems and have a range of approximately 200 miles on a single charge. The electric-powered buses will be charged utilizing an existing charging station located at SCT's bus yard, which will be expanded to multiple charging stations over the next year. Also, a remote charging station is planned at the Petaluma Transit Mall located at the southern terminus of routes 44 and 48. This remote charging station in Petaluma will effectively expand the range of the electric buses beyond 200 miles.

2) Project Planning - Provide a detailed explanation of the project planning process and how it was designed to avoid substantial burden on any low- income, disadvantaged, and vulnerable populations. Include any public outreach efforts, engagement events, community input, and workshops. *No more than 12 lines.* 

The purchase of electric-powered buses for Sonoma County Transit's fixed-route fleet is included in the current version of its Short Range Transit Plan. This project was designed to avoid substantial burden on any low income disadvantaged communities by replacing old CNG vehicles with clean air electric buses, reducing air contaminants along the corridors. The 35-foot electric-powered buses to be purchased will be deployed on Sonoma County Transit's intercity routes located in the cities of Santa Rosa, Rohnert Park, Cotati and Petaluma based only on current range limitations for electric-powered buses. As the operating range for electric-powered buses expands, SCT will deploy its electric-powered buses on additional intercity routes, as determined feasible.

3) Project Costs - Provide an itemized breakdown of project components and describe how the cost estimations were developed. Total costs must correspond to the Funding Information section above. *No more than 10 lines*.

As mentioned previously under project description, LCTOP funding is being requested by Sonoma County Transit (SCT) to assist with the purchase of two 35-foot electric-powered buses that will be available for deployment on intercity routes 44 and 48 providing service to the cities of Santa Rosa, Rohnert Park, and Petaluma. The two low-floor buses will be 35-feet in length and equipped with 32 seats, 2 ADA-compliant wheelchair securement areas, security cameras, AVL systems and have a range of approximately 200 miles on a single charge. This requested LCTOP funding will assist with the first purchase of 35-foot electric-powered buses in SCT's fixed-route fleet. With the assumption for this project that SCT will be purchasing the 35-foot electric-powered buses from BYD, the cost is estimated to be \$1,982,330 (including options and delivery) based on SCT's recent electric-powered bus procurements from BYD.

## **Agency Information**

4) Agency Fare - Describe the fare structure for your system and how the project will affect that structure if at all.

Sheet Name: Allocation Request Rev. 1-2020

<u></u>
All of Sonoma County Transit's local routes are currently fare-free. Cash fares on SCT's intercity routes currently range from \$1.50 to \$4.80 for adults, \$1.25 and \$4.55 for youth, and \$0.75 and \$2.40 for senior/disabled. This project will not affect SCT's current fare structure.
5) Agency Service Area - Describe the agency's service area including the city, town, or community (rural, suburban, urban & demographics). No more than 10 lines.
The County of Sonoma is a rural/subrurban area comprised of nine incorporated cities located in the San Francisco Bay Area approximately 50 miles north of the Golden Gate Bridge. Sonoma County's total population as of 2019 was 494,336. Sonoma County Transit (SCT) provides fixed-route transit and ADA paratransit service that connects all nine incorporated cities and most other towns located in the unincorporated areas of the County. SCT is the local transit operator for the incorporated cities of Cloverdale, Healdsburg, Windsor, Sebastopol, Sonoma, Rohnert Park and Cotati. Sonoma County's demographics are generally less diverse than most other counties in the San Francisco Bay Area. According to the 2019 American Community Survey estimate, Sonoma County's total population was 62.7% White, 27.3% Hispanic/Latino, 4.1% Asian, 1.3% Black, 0.5% Native American and 3.7% Other. The median household income was \$87,000 and the number of persons below the povery level was estimated to be 6.8% of the total population.
6) Agency Service - Describe the transit service provided and how the project plays into the overall operations. Include how the COVID-19 pandemic has impacted transit service related to the project. <i>No more than 10 lines</i> .
Sonoma County Transit currently operates a total of eighteen (18) local and intercity routes. Local service is provided within the cities of Cloverdale, Healdsburg, Windsor, Sebastopol, Rohnert Park, Cotati, Sonoma, the Lower Russian River area and the Sonoma Valley area. SCT's 35-foot electric-powered buses will be available for deployment on intercity routes serving the cities of Santa Rosa, Rohnert Park, Cotati and Petaluma. During FY 2018-19 SCT provided a total of 906,863 fixed-route passenger trips and 58,772 ADA paratransit trips. During FY 2019-20 with the outbreak of COVID-19 and major decreases in ridership, four of SCT's underperforming intercity routes were suspended and the schedules for most core intercity routes were reduced. These route suspensions and reductions have continued into FY 2020-21,

although the return of students on-campus again next fall is anticipated to increase ridership and the need for the restoral of

Greenhouse Gas Reductions - <u>Describe qualitatively</u> how this project will reduce greenhouse gas emissions. For example, expanded/enhanced transit service will improve headways thus making transit a more convenient mode of transportation thus increasing ridership, reducing Vehicle Miles Traveled (VMT) and reducing GHG.

some service.

On the intercity routes operated to the cities of Santa Rosa, Rohnert Park, Cotati and Petaluma, Sonoma County Transit currently deploys buses that are fueled by compressed natural gas (CNG). This project will replace two CNG-fueled buses with two zero-emission electric-powered buses. The deployment of additional zero-emission electric-powered buses will help reduce greenhouse gas emissions.

**Greenhouse Gas Reductions** - Please provide quantitative information requested below and explanations supporting the data provided.

Transit Mode Share: Describe how this project will increase transit mode share (increase mobility).

The new 35-foot electric-powered buses will be deployed on Sonoma County Transit's intercity routes providing service in the cities of Santa Rosa, Rohnert Park, Cotati and Petaluma. These routes directly serve the Sonoma Marin Area Rail Transit (SMART) commuter rail stations located on East Cotati Avenue in the City of Cotati and on East Washington Street in the City of Petaluma. The novelty of the new buses will help to increase transit mode share by promoting use of intercity bus routes that provide feeder service to and from the Cotati and Petaluma SMART stations, respectively.

Co-Benefits - Describe benefits selected above and other benefits not listed.

This project will improve public health through the deployment of a new zero-emission electric-powered buses on Sonoma County Transit's intercity routes serving the cities of Santa Rosa, Rohnert Park, Cotati and Petaluma. The deployment of additional zero-emission electric-powered buses will reduce greenhouse gas emissions, and help reduce air pollution and related public health issues. Also, overall maintenance costs for the new electric-powered buses are expected to be less than the costs for CNG-fueled buses. In addition, because the new electric-powered buses will be deployed on routes in the cities of Cotati and Petaluma directly serving SMART commuter rail stations, they will help promote the intergration of bus and rail service in Sonoma County. Furthermore, overall system reliability and safety will be improved with the addition of the new electric-powered buses because upgraded AVL and security camera systems will be included.

### **Priority Populations Benefits**

community or household.	

**Priority Population Benefit:** Based on the selections above, explain in greater detail how the project will provide benefits to the priority populations in your service area.

The project will benefit the residents in DAC census tract 6097153200 by improving public health through the deployment of new zero-emission electric-powered buses on Sonoma County Transit's intercity routes serving the cities of Santa Rosa, Rohnert Park, Cotati and Petaluma. The deployment of additional zero-emission electric-powered buses in this disadvantaged community will also help to reduce greenhouse gas emissions, air pollution and related public health issues.

SB 1119 Project Criteria: See LCTOP Guidelines for more information.

Is the project a transit fare subsidies or network and fare integration technology improvements, including, but not limited to, discounted or free student transit passes

Is the project a purchase of zero-emission transit buses and/or supporting infrastructure?

Is the project a new or expanded transit service that connects with transit service serving a disadvantaged communities?

SB 1119 Project Criteria: If this is a new or expanded service project, explain how it connects to a transit service that serves a Disadvantaged Community.
