Legislation Details (With Text)

File #: 2020-0960

Type: Consent Calendar Item Status: Agenda Ready

File created: 9/15/2020 In control: County Administrator

On agenda: 11/10/2020 Final action:

Title: Recovery and Resiliency Update

Sponsors: County Administrator

Indexes:

Attachments: 1. Summary Report

Date Ver. Action By Action Result

To: Sonoma County Board of Supervisors

Department or Agency Name(s): County Administrator's Office **Staff Name and Phone Number:** Christel Querijero, 565-7071

Vote Requirement: Informational Only

Supervisorial District(s): All

Title:

Recovery and Resiliency Update

Recommended Actions:

Receive an update on the status of recovery operations, planning, and external funding opportunities following recent disasters, including the 2020 Glass Fire, 2020 LNU Lightning Complex Fires (Walbridge/Meyers), 2020 COVID, 2019 Kincade Fire, 2019 Winter Storm and Floods, and 2017 Sonoma Complex Fires.

Executive Summary:

Office of Recovery and Resiliency staff provides the Board monthly updates on disaster recovery efforts, including building permits, external funding and grant efforts, and relevant legislation. Additional information covers the Kincade fire debris removal, 2017 Insurance Collection, and HMGP efforts.

Discussion:

To keep the Board and community informed about the County's recovery efforts, the Office of Recovery and Resiliency (Office) prepares a monthly agenda item, typically included on the consent calendar. Monthly updates includes information on: Ongoing Recovery Efforts; Housing; Recovery Related External Funding Opportunities; and other items of interest. The areas that have been updated since the previous month's Recovery Update have been noted with a yellow highlight on the paragraph title. When additional disasters are experienced, updates are broadened to encompass additional recovery efforts.

This Recovery and Resiliency Update includes information on the 2020 Glass Fire, 2020 LNU Lightning Complex Fires, 2020 COVID-19 Pandemic, 2019 Kincade Fire, 2017 Sonoma Complex Fires, and the 2019 Winter Storm and Floods. Separately, in depth funding updates are conducted by the Disaster Finance Team (DFT) which

consists of CAO, ACTTC, and relevant department representatives. Most recently, on November 19, 2019, under the CAO's leadership the DFT provided expenses incurred, project costs not yet incurred, and reimbursement eligibility from FEMA and Cal-OES. See

<a href="mailto://sonoma-county.legistar.com/LegislationDetail.aspx?ID=4245333&GUID=13C81898-5587-4914-A162-58C0A370DD0D&Options=&Search="mailto:search="mai

The Office will present the next Annual Report to the Board on the status of the implementation of the Recovery and Resiliency Framework following the 2017 Sonoma Complex Fires in January 2021.

2020 Glass Fire

Overview

The Glass Fire started at 3:50 a.m. Sunday, September 27, in eastern Napa Valley, east of the Silverado Trail between Calistoga and St. Helena. The Red Flag conditions caused the fire to grow rapidly with no containment. The Shady and Boysen fires both broke out Sunday evening on the western side of the Napa Valley, on the slopes of Spring Mountain. Pushed by strong winds, the Shady fire moved rapidly over the mountain and into Sonoma County on the eastern edge of Santa Rosa above Rincon Valley. It eventually jumped Highway 12 near Oakmont, as well as spread south into Sonoma Valley. The entire fire complex is now referred to as the Glass Incident.

The Glass Fire burned 67,484 acres destroying 1,555 structures in Sonoma and Napa Counties. In Sonoma County, roughly half the total area burned, and 359 homes were damaged or destroyed.

Mandatory evacuation notices to several areas in the path of the fires, as well as evacuation warnings to areas that could be threatened. At the peak of evacuations, more than 68,000 people had been evacuated in Sonoma County.

On Monday, September 28, 2020, the Director of Emergency Services for the County of Sonoma Issued a Proclamation of a Local Emergency due to the destruction and ongoing threat from the Shady Fire which has since been incorporated into the Cal Fire managed Glass Incident. On September 29, 2020, the Health Officer proclaimed a local health emergency due to contaminated debris from household hazardous waste/materials and structural debris resulting from the destruction of a large number of structures. Both proclamations were ratified by your Board on October 2, 2020.

FEMA Assistance

On October 22, 2020, the Glass Fire received a major disaster declaration DR-4569, including FEMA Individual Assistance (IA). Impacted households and individuals can register for this federal assistance in three ways:

- Register online at www.disasterassistance.gov < http://www.disasterassistance.gov/>
- Register by downloading and using the FEMA app on your smartphone or tablet,
- Register by calling the FEMA Helpline at 800-621-3362 between 7 a.m. and 10:30 p.m. PDT. The helpline has specialists who speak many different languages.

Residents may be eligible for a FEMA award for household repairs not usually covered by insurance, including

repair or replacement of septic systems and wells damaged by wildfires. Survivors who reported they had major home damage at the time they registered with FEMA will receive a call from a FEMA inspector to conduct a remote inspection by telephone. At that time they should tell the inspector about damage to their private well or septic system. For those who have not already reported your well or septic system wildfire damage to FEMA, they can by calling the FEMA helpline at 800-621-3362 or by using their personal online disaster assistance account.

As of October 28, 2020, Emergency Operations Center (EOC) Finance prepared an Initial Damage Estimates (IDE) as required by Cal-OES, which estimates approximately \$39 million for Public Assistance and \$267 million in initial estimates of private property damage in Sonoma County. These early estimates will change as the damage assessment is refined through the FEMA PA process.

Recovery

Glass Fire recovery information can be found at: https://socoemergency.org/recover/glass-wildfire/

The County of Sonoma and the City of Santa Rosa jointly opened a LAC at Maria Carrillo High School in Santa Rosa for the Glass Fire from October 5-14, 2020. The original end date of October 10 was extended to October 14 to accommodate fire survivors in areas where evacuation orders were just being lifted. Similar to the Walbridge/Meyers fires, many agencies opted not to participate in person. Of the organizations that were at the LAC's, the following received the most visits:

- County Environmental Health
- Permit Sonoma
- Department of Motor Vehicles
- American Red Cross
- Catholic Charities Social Services

The following table provides a high-level overview of the LAC:

	Completed			# of owners	Insured		Property Destroyed or Damaged
Glass LAC	503	1,250	160	301	367	105	340

Debris Task Force

At the time the Glass Fire started, the County Debris Task Force was meeting regularly on the LNU Lightning Complex Fires, and immediately absorbed discussions and actions on the Glass Fire. Currently, the City of Santa Rosa and the County of Sonoma Debris Task Forces meet daily.

A total of 303 parcels in unincorporated Sonoma County were affected by the Glass Fire with the following breakdown: 641 structures were damaged, 359 of which were residences. Of the 359 residences, 312 were damaged more than 50%. Forty two residences within the City of Santa Rosa limits sustained damage greater than 50%.

On October 6, 2020, the County submitted a request to the State for a public debris removal program for both Phase 1 and Phase 2. The State announced a government-sponsored Phase 1 debris removal program for the

Glass Fire, and it is anticipated that the State's contractors will begin the Phase 1 household hazardous sweeps on November 2, 2020 and complete the mission by the first week of December 2020.

The State confirmed a Phase 2 government-sponsored debris removal program, and on October 22, 2020, the County received the approved Right of Entry form. The form, as well as an eligibility matrix can be found at socoemergency.org/2020-roe. The State's Phase 2 program is anticipated to begin in early December.

Sonoma County Environmental Health will manage the State-sponsored Phase 2 debris program, and is working on details to roll out the program immediately upon learning of the State guidelines. The program will require property owners to complete a Right-of-Entry form, similar to the 2017 Sonoma Complex Fires, which will give the State permission to enter their property, and will require them to assign their private debris insurance proceeds to the County. Environmental Health will work with fire survivors on the Right-of-Entry forms through on-line applications and appointments, as well as in-person meetings if necessary. At this time, staff anticipates the Phase 2 government-sponsored debris program to begin in early December. Property owners who do not wish to participate in, or wait for, a public Phase 2 program may submit applications for a private contractor to remove debris immediately following completion of the Phase 1 household hazardous sweeps. The private program is very similar to the program run for the Kincade Fire, with added requirements for contractors adhering to all Public Health orders related to COVID. All clean-up must adhere to standards set forth by the County to ensure the protection of public health. Documentation of adequate clean-up and proper disposal is required. Details of requirements, and the application can be found at https://socoemergency.org/recover/debris-removal-requirements-after-wildfire/. Environmental Health can answer questions, or provide assistance, at (707) 565-5700 or EHDebrisRemoval@sonoma-county.org <mailto:EHDebrisRemoval@sonoma-county.org>.

Watershed Task Force

With the Watershed Task Force already working on the Walbridge/Meyers Fires that started a month earlier, the Glass Fire was quickly added to the Task Force efforts early in the incident. The Office of Recovery and Resiliency coordinated with 15 Federal, State, and County departments and agencies to set up a Watershed Task Force. Now also addressing needs resulting from the Glass Fire, the Task Force has been collaborating to assess impacts, plan for watershed protection and recovery, identify funding for mitigation activities, and collaborate on communications to the public.

The Watershed Task Force has met three times a week since August 24, 2020, prior to the start of the Glass Fire, to develop a program with three work groups. These work groups hold additional meetings, conduct field visits, and analyze data, plus a joint effort to identify funding sources in addition to the primary meetings. The Watershed Task Force has three main lines of effort performed by two working groups and a team: Impact & Hazard Assessment, BMP & Mitigation Projects, and the communications team.

The scope of activities for the Impact and Hazard Assessment work group includes:

- Manage WERT Report Process
- Geohazards/Modeling Group
- Water Quality Group
- Ecosystems Group
- Values At Risk (VARs) Group
- Data Assimilation & Mapping Group

Monitoring (rainfall and water quality)

The scope of activities for the BMP & Mitigation Projects work group includes:

- Built Scale/Structures BMPs
 - Pre-Phase 2 Containment (toxins)
 - BMP Outreach (through CBO contractors)
 - o ROW addressed through TPW (processes coordinated with but managed outside WTF)
- Landscape Scale BMPs
 - Slope stabilization
 - Fire line restoration
 - Reforestation/revegetation

The communications team is responsible for the Rain Ready webpages, burn area hazard warning signs, and community outreach.

Further information can be found on the Rain Ready section of the SocoEmergency.org/Recover/ website.

Through our community-based organization partners, the Watershed Task Force is coordinating the development of mitigation measures on both public and private land. This includes high hazard site specific concerns and larger scale landscape concerns. Affected property owners should contact Sonoma RCD, Sonoma Ecology Center, Russian Riverkeeper, or Community Soil Foundation to begin the technical assistance process based on their property's unique situation.

For technical assistance and installation of questions regarding BMPs (wattles) and other erosion control efforts:

- Sonoma Ecology Center: https://sonomaecologycenter.org/fire-recovery/ (707) 996-0712
- Russian Riverkeeper: <u>birkin@russianriverkeeper.org < mailto:birkin@russianriverkeeper.org></u> (707)
 433-1958
- Community Soil Foundation: Info@communitysoil.org (707) 889-

For technical assistance and questions regarding land and forest management:

- Sonoma RCD: https://sonomarcd.org/resources/fire-recovery/ (707) 569-1448 x110
- USDA/NRCS Petaluma Service Office: (707) 794-1242 extension 3

Each of these local community organizations has worked on multiple post-fire BMP and long-term watershed recovery projects here in Sonoma County. They have excellent resources and provide expert technical assistance.

In response to the concerns about steep slopes, the Watershed Task Force requested and has been granted State Watershed Emergency Response Teams (WERT) who are preparing WERT Reports for the both Walbridge/Meyers Fires and Glass Fire areas. The WERT Reports inform the Watershed Task Force, EOC, and public on high hazard areas. They also provide important data that informs the work of the Watershed Task Force.

Coordination with the EOC to monitor rainfall thresholds based on the WERT Reports has begun with the EOC updating their flash flood, mudflow, and debris flow action plans based on the upcoming Walbridge/Meyers and Glass WERT Reports.

If a property owner has property that is identified in the WERT Report as having a Value at Risk (VARs), they should request a free, on-site USDA/NRCS inspection to better understand the risks. They should also read the WERT Report and understand the post-fire rainfall hazards, including developing an emergency plan when heavy rain is forecasted by the National Weather Service (NWS). The WERT Report, once ready, will be available on the Rain Ready section of the SocoEmergency.org/Recover/ website.

2020 LNU Lightning Complex Fires (Walbridge/Meyers)

Overview

Beginning on August 14, 2020, an extreme heat event struck California, causing record-breaking temperatures, widespread dry lightning strikes, and Red Flag Warnings throughout California, including Sonoma County. The extreme weather also brought rolling power outages for the first time in nearly 20 years.

Two wildfires known as the Walbridge and Meyers Fires burned in western Sonoma County requiring evacuations and outside support to fight the fires. The wildfires started as a result of the lighting storm on the morning of August 17, 2020. These fires are part of a larger complex of fires in Sonoma, Napa and Solano counties collectively called the LNU Lightning Complex Fires.

The Walbridge Fire, west of Healdsburg, burned 55,000 acres and the Meyers Fire, north of Jenner, has burned 2,360 acres. Combined, 159 residential structures destroyed by the fire.

The County issued mandatory evacuation notices to several areas in the path of the fires, as well as evacuation warnings to areas that could be threatened. At its peak on August 22, 2020, approximately 16,091 people were under mandatory evacuation orders and 24,810 under evacuation warnings issued by Cal Fire and the Sonoma County Sheriff.

The County established temporary evacuation sites to help evacuees with a variety of resources and find shelter. Given the ongoing COVID-19 emergency, sheltering efforts are greatly constrained in order to ensure the health and safety of the community. The County is following COVID-19 sheltering protocols issued by the State which require extensive screening, limited congregation, and other mitigations to protect public health. In addition, the County's established COVID-19 alternate care location.

The Director of Emergency Services issued a Proclamation of Existence of Local Emergency in the Sonoma County Operational Area on Tuesday, August 18, 2020. Your Board ratified the proclamation of local emergency on August 21, 2020.

The Health Officer proclaimed a local health emergency on August 24, 2020 due to contaminated debris from household hazardous waste/materials and structural debris resulting from the destruction of a large number of structures. Also on August 24, 2020, the Health Officer issued an order advising that "Property owners and

the community should not enter the burn footprint of structures without Personal Protective Equipment," and requiring no cleanup activities without the written authorization of the Department of Health Services, Environmental Health.

FEMA Assistance

On August 22, 2020, the LNU Lightning Complex Fires received a Major Presidential Disaster Declaration, FEMA-4558-DR. This allows Individual Assistance as well as Public Assistance. Impacted households and individuals can register for this federal assistance in three ways:

- Register online at www.disasterassistance.gov < http://www.disasterassistance.gov/>
- Register by downloading and using the FEMA app on your smartphone or tablet,
- Register by calling the FEMA Helpline at 800-621-3362 between 7 a.m. and 10:30 p.m. PDT. The helpline has specialists who speak many different languages.

Residents may be eligible for a FEMA award for household repairs not usually covered by insurance, including repair or replacement of septic systems and wells damaged by wildfires. Survivors who reported they had major home damage at the time they registered with FEMA will receive a call from a FEMA inspector to conduct a remote inspection by telephone. At that time they should tell the inspector about damage to their private well or septic system. For those who have not already reported your well or septic system wildfire damage to FEMA, they can by calling the FEMA helpline at 800-621-3362 or by using their personal online disaster assistance account.

As of October 28, 2020, Emergency Operations Center (EOC) Finance prepared an Initial Damage Estimates (IDE) as required by Cal-OES, which estimated approximately \$25 million for Public Assistance and \$42 million in initial estimates of private property damage in Sonoma County. These early estimates will change as the damage assessment is refined through the FEMA PA process.

Recovery

LNU Lightning Complex Fires recovery information can be found at: https://socoemergency.org/recover/walbridge-meyers-fire-recovery/>

Two Local Assistance Centers (LAC) were stood up for the Walbridge /Meyers fires, one in Guerneville at the Bank of America building and one at Healdsburg High School. The dual locations were challenging from both a logistics and staffing perspective, and these were the first LAC's to occur in the COVID-19 era. Many agencies opted not to participate in person and instead offered online help or provided hand-outs. The two LAC's were open August 29 - September 4, 2020. Of the organizations that were at the LAC's, the following received the most visits:

- County Environmental Health
- California Employment Development Department
- Department of Motor Vehicles
- Catholic Charities Social Services
- American Red Cross

The following table provides a high-level overview of the LAC:

File #: 2020-0960, Version: 1

LNU/Walbridge	Intake Forms	# of impacted	# of	# of	Insured	Not Insured	Property
LAC	Completed	household	renters	owners			Destroyed or
		members					Damaged
Guerneville	363	683	227	93	81	129	32
Healdsburg	126	192	49	52	60	19	78
Total	489	875	276	145	141	148	110

The Walbridge and Meyers fires, as part of the LNU Lightning Complex Fires, became a federally declared disaster (DR-4558) on August 22, 2020, and as a result, affected and eligible households could sign up for FEMA Individual Assistance. FEMA held their Mobile Registration Intake Center at the Sonoma County Office of Education from September 11 - October 10, 2020. There is also a new round of grant funding available through FEMA's Hazard Mitigation Grant Program; Notices of Intent (NOI) to apply are due to CalOES on November 20, 2020.

On Tuesday, August 25, 2020, the County stood up the Debris Task Force who are coordinating Rights of Way (ROW) cleanup, Household Hazardous Waste (HHW) cleanup, and structure fire cleanup. The State's Department of Toxic Substances Control will be conducting the HHW cleanup beginning September 15, 2020. Further information can be found on the Debris section of the recovery page.

Debris Task Force

SONOMA COUNTY

Within days of the Meyers and Walbridge fires' ignition, the County Debris Task Force met and began discussions for debris removal. The State Debris Task Force was stood up for the Northern California Complex Fires and meetings have occurred three times per week with state and federal agencies, and all affected counties in northern California.

A total of 137 parcels in Sonoma County were affected by the LNU Complex Fires with the following breakdown: 332 structures were damaged, 172 of which were residences. Of the 172 residences, 162 were damaged more than 50%.

The State confirmed a Phase 2 government-sponsored debris removal program, and on October 22, 2020, the County received the approved Right of Entry form. The form, as well as an eligibility matrix can be found at socoemergency.org/2020-roe. The State's Phase 2 program is anticipated to begin in early December.

On October 2, 2020, the State confirmed a Phase 2 government-sponsored debris removal program, and on October 22, 2020, the County received the Right of Entry form from the State. As of October 27, 2020, the County is awaiting further information from the State regarding what debris will be included in the Phase 2 government-sponsored program. It is anticipated that the State's Phase 2 program will begin in early December.

Sonoma County Environmental Health will manage the State-sponsored Phase 2 debris program, and is working on details to roll out the program immediately upon learning of the State guidelines. The program will require property owners to complete a Right-of-Entry form, similar to the 2017 Sonoma Complex Fires, which will give the State permission to enter their property, and will require them to assign their private debris insurance proceeds to the County. Environmental Health will work with fire survivors on the Right-of-Entry forms through on-line applications and appointments, as well as in-person meetings if necessary. At this time, we estimate the Phase 2 government-sponsored debris program to begin in early November. Property owners who do not wish to participate in, or wait for, a public Phase 2 program may submit

Page 8 of 32

applications for a private contractor to remove debris. The private program is very similar to the program run for the Kincade Fire, with added requirements for contractors adhering to all Public Health orders related to COVID. All clean-up must adhere to standards set forth by the County to ensure the protection of public health. Documentation of adequate clean-up and proper disposal is required. Details of requirements, and the application can be found at

<a hre

The federal government announced that it will fund 100% of the LNU Lightning Complex Fire debris removal program, and emergency protective measures (as opposed to the usual cost share of 75/18.75/6.29 for federal/state/county share respectively).

Within days of the start of the Walbridge/Meyers Fire, the Office of Recovery and Resiliency coordinated with 15 Federal, State, and County departments and agencies to set up a Watershed Task Force. Now also addressing needs resulting from the Glass Fire, the Task Force has been collaborating to assess impacts, plan for watershed protection and recovery, identify funding for mitigation activities, and collaborate on communications to the public.

Watershed Task Force

The Watershed Task Force has met three times a week since August 24, 2020 to develop a program with three work groups. These work groups hold additional meetings, conduct field visits, and analyze data, plus a joint effort to identify funding sources in addition to the primary meetings. The Watershed Task Force has three main lines of effort performed by two working groups and a team: Impact & Hazard Assessment, BMP & Mitigation Projects, and the communications team.

The scope of activities for the Impact and Hazard Assessment work group includes:

- Manage WERT Report Process
- Geohazards/Modeling Group
- Water Quality Group
- Ecosystems Group
- Values At Risk (VARs) Group
- Data Assimilation & Mapping Group
- Monitoring (rainfall and water quality)

The scope of activities for the BMP & Mitigation Projects work group includes:

- Built Scale/Structures BMPs
 - Pre-Phase 2 Containment (toxins)
 - BMP Outreach (through CBO contractors)
 - ROW addressed through TPW (processes coordinated with but managed outside WTF)
- Landscape Scale BMPs
 - Slope stabilization
 - Fire line restoration
 - Reforestation/revegetation

The communications team is responsible for the Rain Ready webpages, burn area hazard warning signs, and

community outreach.

Further information can be found on the Rain Ready section of the SocoEmergency.org/Recover/ website.

Through our community-based organization partners, the Watershed Task Force is coordinating the development of mitigation measures on both public and private land. This includes high hazard site specific concerns and larger scale landscape concerns. Affected property owners should contact Sonoma RCD, Russian Riverkeeper, or Community Soil Foundation to begin the technical assistance process based on their property's unique situation.

For technical assistance and installation of questions regarding BMPs (wattles) and other erosion control efforts:

- Russian Riverkeeper: <u>birkin@russianriverkeeper.org < mailto:birkin@russianriverkeeper.org></u> (707)
 433-1958
- Community Soil Foundation: lnfo@communitysoil.org (707) 889-1744

For technical assistance and questions regarding land and forest management:

- Sonoma RCD: https://sonomarcd.org/resources/fire-recovery/ (707) 569-1448 x110
- USDA/NRCS Petaluma Service Office: (707) 794-1242 extension 3

Each of these local community organizations has worked on multiple post-fire BMP and long-term watershed recovery projects here in Sonoma County. They have excellent resources and provide expert technical assistance.

In response to the concerns about steep slopes, the Watershed Task Force requested and has been granted State Watershed Emergency Response Teams (WERT) who are preparing WERT Reports for the both Walbridge/Meyers Fires and Glass Fire areas. The WERT Reports inform the Watershed Task Force, EOC, and public on high hazard areas. They also provide important data that informs the work of the Watershed Task Force.

Coordination with the EOC to monitor rainfall thresholds based on the WERT Reports has begun with the EOC updating their flash flood, mudflow, and debris flow action plans based on the upcoming Walbridge/Meyers and Glass WERT Reports.

If a property owner has property that is identified in the WERT Report as having a Value at Risk (VARs), they should request a free, on-site USDA/NRCS inspection to better understand the risks. They should also read the WERT Report and understand the post-fire rainfall hazards, including developing an emergency plan when heavy rain is forecasted by the National Weather Service (NWS). The WERT Report, once ready, will be available on the Rain Ready section of the SocoEmergency.org/Recover website.

2020 COVID-19 Emergency

Since March 2, 2020, a local health emergency has been in effect due to the introduction of COVID-19 coronavirus into the County of Sonoma/Sonoma County Operational Area. A separate, comprehensive update is provided to your Board at every Board meeting.

At the Board's direction, on May 1, 2020, the Economic Development Board (EDB) formed Reopening Workgroups to engage community, business, and industry partners and to serve as a conduit to the County Health Officer for mitigation best practices required to reopen local businesses. The Workgroups were structured along industry lines and around work groups that will recommend appropriate mitigation strategies for similar operational settings based on guidelines for personal protective equipment (PPE), cleaning and disinfecting, distancing, and other physical or engineered methods currently recommended by health professionals. Over 80 local business owners and professionals took place in these work groups, which were staffed and facilitated by the EDB and its economic development partners from throughout the county. EDB continues to engage Workgroups on an as needed basis. For additional information on the work to date please visit the EDB site.

As a continuation of Recovery and Reopening work, on June 1, 2020 EDB received direction to begin work on economic recovery in Sonoma County. This work is comprised to two distinct efforts. The first effort, a Living With COVID-19 advisory committee, will be focused on reopening, economic vitality and community safety. The committee will address challenges and opportunities surrounding phased and safe re-openings of county businesses in line with state health orders, ensuring community safety, access to resources and clarity of information critical to re-opening and remaining open throughout the stages of the pandemic.

The second effort, to ensure the County continues along a path leading to business and community recovery, work must continue in tandem and beyond reopening phases. Thus, a diverse and inclusive recovery process shall be in place, staffed by the EDB and Office of Recovery and Resiliency, and supported by an Economic Recovery Task Force comprised of business, community and civic leaders. A range of perspectives, sectors, geographies, genders, and racial/ethnic backgrounds were represented in the committee and work groups.

The Economic Recovery Task Force focused on three specific elements of recovery to ensure an inclusive approach. These include, 1) industry specific recovery, 2) workforce recovery and 3) community recovery. Deliverables from the task force will help to inform a long-term recovery strategic plan. The Economic Recovery Task Force Steering Committee and three Work Groups have been meeting since July 2020, and a set of community-wide Town Hall meetings were held on September 17, 2020, one during the day and one in the evening to better accommodate the different needs of the community.

Each of the three Work Groups is focusing on four Work Group specific categories. First, the Business Recovery Work Group is focusing on Disaster Readiness, Access to Capital, Regulatory Innovation & Urgency Ordinances, and Economic Diversification. Second, the Workforce Recovery Work Group is focusing on Re-skilling/Training Childcare Solutions, Talent Retention, and Safety Net (for the workforce). Finally, the Community Recovery Work Group is focusing on Access and Functional Needs, Creative Placemaking, Housing and Transportation, and Climate and Energy. By design, there are both unique areas of focus and as well as some overlapping areas of focus within and amongst the three Work Groups.

The Food Task Force was established in March 2020 to address food insecurity associated with the COVID-19 event. Existing food banks and community organizations engaged in food security activities were engaged because they have the expertise, equipment, and systems in place to be able to effectively and efficiently

expand capacity with additional resources and support from the County, State/Federal, and philanthropic sources. All food distribution agencies have seen significant increases in the volume of food needed and in the number of families needing food.

As an example of the increased demand due to COVID food insecurity, Redwood Empire Food Bank, the largest food provider in the county, reported a by month weekly average increase for food ranging from a high of 112% in June to a low of 52% in July since Shelter In Place began on March 17, 2020 for pounds of food distributed. While there were good summer trends, the September weekly average has increased to 87% more than pre-COVID levels.

Pre-COVID Weekly Ave	April Weekly Ave	l. '	June Weekly Ave	l ' '		September Weekly Ave
390,761	656,027	676,895	828,506	592,505	612,008	732,357
0%	68%	73%	112%	52%	57%	87%

As of October 2020, the County has provided direct funding to Redwood Empire Food Bank, Salvation Army, Ceres, Sonoma Family Meal, Petaluma People Services Center, Council on Aging, Coastal Seniors, Food For Thought, and Catholic Charities. These providers are a combination of countywide, "umbrella" agencies or they serve a unique geographically or demographically focused area of coverage. Providers supply boxed groceries, prepared meals, and medically tailored meals. This has resulted in a countywide, all-ages, all-demographics food program throughout the County. Total funding from the County to date has been a FEMA-PA eligible \$1 million. FEMA will cover 75% of the eligible expenses, it is not yet known if the State will cover any of the eligible expenses, and the County will cover the remaining of the eligible expenses. Any ineligible expenses are the responsibility of the County.

On September 1, 2020, your Board approved the use of a portion of the Coronavirus Aid, Relief, and Economic Security (CARES) Act Relief Funds for food security during COVID-19. In total, the County was allocated \$50.6 million in federal pass-through CARES Act Relief funding with the adoption of the State Budget. These funds are exclusively intended to assist local governments with responding to the COVID-19 emergency and any unspent funds must be returned to the State if not spent by December 30, 2020.

Your Board directed staff to develop a funding plan to distribute \$8 million of CARES Relief Funds towards four areas of community needs impacted by the Coronavirus: housing through rental assistance programs; small business impacts; food assistance; and resources and supports to the Latinx community which has been disproportionately impacted by the Coronavirus. Of the \$8 million for community needs, \$1.5 million was designated for food programs.

As part of the recently approved Families First Coronavirus Response Act (HR 6201), the California Department of Aging obtained approval to directly allocate emergency dollars to local Area Agencies on Aging (AAA). On April 8, 2020, CDA confirmed the Sonoma County Area

Agency on Aging would receive \$344,553 to be used for AAA direct and contracted services with community agencies to provide meals for older adults, supportive services, and family caregiver support in response to increased needs due to the COVID-19 virus outbreak. This emergency funding from the California Department of Aging is to supplement and expand meals to older adults, age 60+.

In collaboration with the Latinx Health Task Force, the Food Task Force has, in addition to their current mission, allocated funds to Food For Thought to provide meals to Latinx and indigenous speaking community members who are COVID positive (or contacts required to isolate) and do not have any social resources to assist them in food acquisition. The Latinx Health Task Force is the liaison with Public Health to communicate this resource availability.

On July 27, 2020, during Budget Workshops, the Department of Health Services presented to your Board an overview of a plan to allow for a sustainable response through June 30, 2021 to continue the County's COVID-19 Response efforts. On October 20, 2020, the Department of Health Services presented to your Board the enhanced COVID-19 strategies to address the ongoing operational goals, community needs, communication of COVID related information and efforts, development of partnerships within the County and the designated use of fiscal resources all targeting the underserved communities within the County.

Structural racism affects the distribution of and access to resources and opportunities such as employment, housing, education, and quality healthcare. Low-income communities of color are overrepresented in the low-wage and non-medical essential workforce, with less access to paid leave and other worker protections critical to preventing the spread of COVID-19. Income inequality increases the risk of exposure to the virus, due to overcrowded living conditions, greater use of public transportation, and the need to travel farther from home to obtain essentials.

A combination of these factors results in marginalized communities experiencing higher levels of cumulative adversity over time, which are associated with an increased risk of underlying medical conditions such as high blood pressure, chronic lung diseases, diabetes, and chronic kidney disease. Well-documented racial and ethnic disparities in the prevalence of these chronic conditions among communities of color further increase the risk of morbidity and mortality from COVID-19.

In Sonoma County, socioeconomic inequities are a primary driver of cases, which contributes to limited ability for impoverished populations to shelter-in-place, isolate, and quarantine. Barriers include being an essential worker, lack of sick leave or benefits, no job security to take time off, limited childcare options, and lack of health care access, among others. Socioeconomic and health disparities have disproportionately impacted the LatinX community in Sonoma County.

In order to address these current issues facing the communities within our County, the Department of Health Services and its COVID-19 Section have developed several strategies to address healthcare services, outreach and communication, financial assistance, isolation and quarantine support and forming partnerships within the County to increase our assistance. The population that DHS will focus on for this intervention includes those in areas that are difficult to access with some households living in crowded, impoverished conditions. These households are also more susceptible to negative economic and health impacts due to COVID-19. Providing community members with comprehensive and culturally relevant programs is a crucial step in mitigating the economic impacts of the pandemic on the most vulnerable households in the county.

The six strategies to address these conditions are:

- Strategy 1: Expand Testing Opportunities
- Strategy 2: Enhance Outreach to Latinx Community
- Strategy 3: Provide Incentive Program and Financial Assistance

- Strategy 4: Foster Partnerships with Business Community
- Strategy 5: Provide Isolation/Quarantine Support
- Strategy 6: Create Communications/Education Campaign

The goal of these initiatives is to address COVID-19 disparities while reducing overall community spread, allowing the county to move out of the most-restrictive purple tier in the state's Blueprint for a Safer Economy.

Residents who are living on limited income and cannot afford to miss work are less likely to access testing or have the ability to isolate or quarantine. Financial assistance will help low-income individuals afford to isolate when they are COVID-19 positive, slowing the spread of the virus. To incentivize residents to take part in testing, the County will offer gift cards to help offset costs such as lost wages or transportation. The testing incentive gift cards will be offered only at testing sites in census tracts that are in the lowest 25 percent of the HPI and will be limited to one per month. The County is predicting a 50% to 75% increase in testing demand in target groups based on data from counties with similar incentives.

Residents of the census tracts that are in the lowest 25 percent of the HPI who lack access to paid leave or other compensation will also be offered financial support including lost wage replacement of \$1,216 for a 14-day isolation period. The amount was determined using Santa Rosa's minimum wage rate of \$15.20/hour. Wage replacement will be available to those working 40 hours a week for a maximum of 80 hours of missed work for 14 days.

Residents can find out whether they live within the targeted census tracts by going to this map
this map
this map</

On October 20, 2020, your Board unanimously approved the strategies and \$4 million in CARES Act funding for initial activities through December 31, 2020. The Department of Health Services will come back to the Board of Supervisors at a later date to request the additional \$11.9 million needed to fund the programs from Dec. 31, 2020 through June 30, 2021.

Constantly updated information on the current Health Orders and the Coronavirus Dashboard can be found at SocoEmergency.org

2019 Kincade Fire

Pacific Gas & Electric ("PG&E") instituted de-energization in the Sonoma County Operational Area beginning at approximately 2:15 PM on October 23, 2019, due to extreme fire danger weather, impacting 260,000 residents. In preparation, the Emergency Operations Center (EOC) was activated at approximately 8:00 AM on Wednesday, October 23, 2019, to assist with managing the impacts of de-energization.

The Kincade Fire ignited around 9:00 PM on Wednesday, October 23, 2019 northeast of Geyserville, and burned until November 7, 2019. The fire was driven by high winds with the fire spreading rapidly, forcing the evacuation of over 190,000 residents, destroying 374 structures (174 homes, 11 commercial), damaging an additional 60 structures (34 residences), and burning 77,758 acres generally east of Geyserville, Healdsburg

and Windsor and across to the Sonoma/Lake County line. A total of 21 evacuation shelters were set up and served 4,850 individuals, as well as pets and livestock.

The conditions created by the Kincade Fire were exacerbated by an unprecedented series of wind events-commencing on Tuesday, October 22, 2019, Saturday, October 26, 2019, and Tuesday, October 29, 2019, respectively-with historic maximum wind speeds and corresponding de-energization by PG&E of large portions of the electric grid in the Sonoma County Operational Area.

A local emergency proclamation was issued by the County Administrator on October 24, 2019 and ratified by the Board. In addition, on October 25, 2019, Governor Newson issued a state emergency proclamation for the counties of Sonoma and Los Angeles due to the effects of the Kincade and Tick fires.

To protect residents from hazardous debris exposure after a wildfire, the Sonoma County Health Officer Dr. Celeste Philip issued an order on November 1, 2019 advising community members to refrain from entering the burn footprint without personal protective equipment. On November 5, 2019, the Board of Supervisors passed an emergency ordinance requiring authorization from the Department of Health Services, Environmental Health, prior to commencing debris removal work.

1. Debris Removal

Before the fire was extinguished, the County started working closely with State partners to plan for fire debris removal. As a result of the Proclamation of a Local Health Emergency, the County, through the Debris Removal Task Force, entered into an emergency contract with NRC to perform Household Hazardous Waste sweeps on all burned parcels for a cost not-to-exceed \$750,000. The clean-up was completed on February 13, 2020. The contract was managed by Transportation & Public Works and the contract work was managed by Fire Prevention/Permit Sonoma. The contract has been paid out of the Kincade Disaster Fund, and should qualify as a reimbursable expense.

Sonoma County Environmental Health is managing the second step of fire debris removal and assisting property owners with this process. Following the Household Hazardous Waste sweep, property owners must submit an application and plan to Environmental Health for approval prior to commencing debris removal. The deadline for submission of an application and plan was originally January 31, 2020. Due to the COVID-19 health emergency and the Shelter-In-Place Orders issued by the Sonoma County Public Health Officer, the deadline was extended to August 1, 2020. All cleanup activities must be completed pursuant to standards set forth by the County to ensure the protection of public health. Documentation of adequate clean-up and proper disposal is required.

As of October 28, 2020, out of 226 properties affected by the fire: 6 have not submitted any paperwork (application or plan); 184 have submitted applications; 39 have received exemptions from the program (did not present a public health threat); and 159 properties have cleaned all debris and are approved for rebuilding efforts to begin. A total of 31 properties have not completed the debris removal process.

Of the remaining 31 properties, 3 have submitted completion documents that are pending approval, 16 have not submitted an approvable application and 12 have approved applications and not submitted clearance documents.

On August 1, 2020, a letter was sent to all property owners who have not either received exemptions or

completed the paperwork. This letter advised them that they were out of compliance and urged them to complete the debris removal or to get in touch with Environmental Health with any obstacles they were facing.

On October 7, 2020, a follow up letter was sent to all property owners who had not submitted and completed their paperwork. This letter included information about possible enforcement actions and encouraged property owners to contact Environmental Health to discuss their progress and path forward.

Throughout August through October, Environmental Health Staff reached out to all property owners that had not completed the submittal process by phone, conducted site visits, took additional updated photos and met with property owners to share any necessary guidance to complete their debris removal process. In addition, during the week of October 26, 2020, Permit Sonoma has been flying drones over those 11 properties where we have not been able to connect with the property owner and gain access to the properties. All information is being compiled into a comprehensive list to show all property statuses.

Property owners who have not yet submitted debris removal paperwork can still download a Debris Removal Application form at SocoEmergency.org/Recover/ and contact Environmental Health for assistance at 707-565-6700 or ehdebrisremoval@sonoma-county.org mailto:ehdebrisremoval@sonoma-county.org Additional information about Debris Removal Requirements and a Debris Removal Completion Certification information is also posted on this site.

Sonoma County Environmental Health and CalRecycle held a Debris Removal Training for contractors, waste haulers, and property owners on Wednesday, November 20, 2019 to provide information about the debris removal process. A recording of this training is posted at SoCoEmergency.org/Recover/.

Socoemergency.org/Recover/.

2. Watershed Task Force

Federal, state, local agencies, and community groups have formed the Watershed Task Force to take action to protect the health and safety of the local watershed by providing storm water pollution and debris flow information and support after the 2019 Kincade Fire.

While it is the responsibility of property owners in the process of clean-up and rebuilding to control storm runoff and prevent pollutants, including sediment, from entering storm drains, creeks, rivers, and wetlands, the County is providing \$300,000 to fund implementation of BMP's on private property. Contracts are with Russian Riverkeeper, Soil Conservation, and Sonoma Ecology Center. All three organizations have experience with BMPs after the 2017 Fires and are continuing their efforts with the Kincade Fire. The three contracts run until December 31, 2020 and are encumbered for \$83,000 each for a total of \$249,000. Together, the three contractors have a combined amount of \$90,342.59 remaining for preparation for the 2020/21 rainy season. The unencumbered \$51,000 remains in the Kincade fire disaster fund a reserve if there is an emergency action that needs to be taken in the Kincade burn area.

The Watershed Task Force is also working through two members of the Task Force to pursue additional funding for water quality protection: the California State Water Resources Control Board (Water Board) and Sonoma Resource Conservation District (Sonoma RCD). Sonoma RCD has submitted a \$350,000 319(H) grant to the Water Board and on July 7, 2020 received a signed contract from the State. The contract amount is \$353,727. There is no County of Sonoma match for this 319(H) grant.

Wattles and other BMP materials, such as straw, continue to be available for purchase at various agriculture,

garden supply and hardware stores.

Additional efforts by the Watershed Task Force included developing a debris flow hazard assessment with the State of California through the development of a WERT Report. Citizens are encouraged to familiarize themselves with the potential hazards associated with the burned areas by view the interactive <u>Limited Scope Post-Fire Hazard Assessment Map https://sonomacounty.maps.arcgis.com/apps/webappviewer/index.html? id=06636c962de34888b751ddc9cb9e97db> (the associated Limited Scope WERT Report is linked at the top of the map).</u>

Property owners can visit https://socoemergency.org/recover/2019-kincade-fire/kincade-fire-rain-ready/ for extensive information and resources about how to be Rain Ready.

3. Funding Opportunities

Kincade Fire recovery funding assistance includes the following:

- A. Clean Water Act (CWA) 319(H) emergency funding: Sonoma Resource Conservation District (RCD) will receive \$353,727 in CWA 319(H) emergency funding for purchase of best management practice (BMP) materials that would be placed by non-governmental organization (NGO) partners in burn areas. These materials would also be used to replace previously placed materials in burn zones. Originally the funding was to have been utilized before Summer 2020, but the contract delay due to the coronavirus pandemic has pushed this schedule out to a yet-to-be-determined date which means that any BMP materials purchased must also be placed by a yet to be established date.
- **B.** California Disaster Assistance Act (CDAA) Program: On November 26, 2019, the Kincade Fire wire was determined to be eligible for CDAA funding. CDAA Funding is for eligible disaster costs not eligible under FMAG which includes Permanent Work to repair/replace structure and infrastructure damages and other Emergency Response costs that cannot be claimed through FMAG. CDAA will reimburse 75% of eligible costs. Disaster Finance working with affected departments determined a preliminary estimate of \$7.5M in CDAA assistance with an estimated County share of \$1,875,000 (25%).
- C. Fire Management Assistance Grant (FMAG): On October 24, 2019, a Fire Management Assistance Grant (FMAG) declaration was approved by FEMA in response to the Kincade Fire. FMAG covers costs associate with Emergency Response (CAT B), Mutual Aid, and Fire Suppression costs. FMAG will reimburse 75% of eligible costs with CDAA reimbursing an additional 18.75% of eligible costs. Disaster Finance preliminary estimate for FMAG eligible costs is \$6M with an estimated County Share of \$375,000 (6.25%).
- **D. FEMA Hazard Mitigation Post Fire Grant Program for FMAG-declared fires**: Permit Sonoma submitted a notice of intent for consideration in early June for additional funding for their defensible space and vegetation management efforts.

4. Recovery Resources

The Office of Recovery and Resiliency, in collaboration with County departments and community

resources, is maintaining a Recovery website for the Kincade Fire, at Socoemergency.org/recover. This site contains information on the following key topics:

- 1. Returning Home after a fire, including information about smoke damage, food safety, cleaning and sanitizing, and mental health resources to support the community during this time.
- 2. Rebuilding site that directs property owners to Permit Sonoma to receive information about how to start in the rebuilding process and what support is available. This includes information about the Resiliency Center, originally created following the Sonoma Complex Fires and now also available to those impacted by the Kincade Fire. The Resiliency Center will be gathering data on Kincade Fire rebuilding support and permitting needs over the coming months.
- 3. Debris Removal section of the site contains FAQ's for both the initial Household Hazardous Waste Sweep and fire debris removal.
- 4. Rapid Evaluation Safety Assessment and Property Clean-Up status and maps
- 5. Air Quality information
- 6. Local Recovery Resources, including County, community, and state and federal resources.
- 7. Rain Readiness site with extensive information for property owners to protect creeks and waterways from debris runoff.

The Economic Development Board has also added information about recovery resources available for businesses at http://sonomaedb.org/Business-Assistance/Business-Recovery-Tools/>.

2017 Sonoma Complex Fires

In addition to recovery from the Kincade Fire, the County remains committed to supporting property owners impacted by the 2017 Sonoma Complex Fires. Information below highlights recovery updates in the areas of Housing, Debris Removal Insurance Collection, FEMA Public Assistance, Funding Opportunities, and other updates.

1. Housing

A. Resiliency Permit Center

The Resiliency Permit Center at Permit Sonoma continues to provide expedited comprehensive permitting and inspection services for those who lost homes in the fires and their representatives dealing with reconstruction of approximately 3,000 residential structures destroyed or damaged by the Sonoma Complex Fires. Services at the Resiliency Permit Center began February 13, 2018. The Resiliency Permit Center also provides free general review of bid proposals to fire survivors to help them determine where scope and pricing are appropriate.

B. Rebuilding Permits

As of October 28, 2020, the combined County and City permit departments have had 3,989 homes, or 77.56% of the homes lost in the fires, start the permitting process. Of those homes in the rebuild process, 185 were in the permit review process, 1,642 have been permitted and under construction, and 2,162 had completed construction. The remaining 1,154, or 22.44%, of the homes lost in the fires, have not yet started the permitting process in order to rebuild.

2. Defensible Space/Hazardous Fuels Reduction

Permit Sonoma Fire Prevention Division, in coordination with Cal Fire and several local Fire Districts, are in the midst of conducting seasonal outreach, education, and inspections for compliance with defensible space/hazardous fuels reduction regulations and will perform abatement as necessary. However, neither Cal FIRE nor the Fire Districts do abatement; therefore, Sonoma County will do abatements as necessary within the allocated budget based on seasonal timing as permitted. Inspections are performed by Cal FIRE in the State Responsibility Area (SRA), while Local Fire Districts may perform inspections in both the SRA and/or in the Local Responsibility Area (LRA) based on inspection areas identified in conjunction with the County of Sonoma Fire Prevention Division. Additional details about the County's program are accessible online at:

https://sonomacounty.ca.gov/PRMD/Fire-Prevention/Vegetation-Management-Services/Hazardous-

Sonoma County staff working with our Fire District partners has a goal to perform up to 4,400 inspections, including complaints and re-inspections, in the proposed budget. Sonoma County staff is compiling the 2020 inspections, but reporting is delayed due to the Walbridge/Meyers and Glass Fires. In 2019, Sonoma County and the local Fire District partners conducted a total of 2,993 inspections.

Cal Fire has advised they will perform some level of physical inspections. In 2019, CAL FIRE performed 3,851 inspections. Due to the COVID-19 emergency, Cal Fire has set a goal of 2,500 for 2020. As of October 28, 2020, CalFire had performed 2,481 inspections.

Together, Sonoma County and Cal Fire have a combined goal to perform 7,900 inspections, including complaints and re-inspections in 2020.

In addition to the outreach, inspections, and enforcement program, the 2020 countywide free chipper service has also begun. Chipper season opened on May 4, 2020. The County had 930 applications as of October 23, 2020, with 700 of the jobs completed by crews, 76 jobs completed by property owners, and 67 applications that did not meet program guidelines.

For comparison, last year from May through December 2019, there were 468 chipper jobs completed by crews and 63 jobs completed by property owners for a total of 531 chipper jobs completed in 2019.

Additional details about the program, including guidelines and application forms, are accessible online at: https://sonomacounty.ca.gov/PRMD/Fire-Prevention/Vegetation-Management-Services/Curbside-

3. Debris Removal Insurance Collection

The Office of Recovery & Resiliency has managed the private debris insurance collection on behalf of FEMA/CalOES. A total of 3,671 properties received the federal/state debris removal assistant. To date ORR has collected approximately \$82 million from 1,830 property owners (or approximately 50%). Due to the extent of the damage caused to properties during the debris removal process, the County initiated the Debris Insurance Collection Program in which property owners may be reimbursed for repairs needed as a result of the debris removal process (i.e., destruction of driveways, curbs and sidewalks due to heavy equipment, over-excavation, etc.). In addition, the County is permitting debris insurance monies to be used for tree removal. To date, the County has reimbursed approximately \$6.3 million to 370 property owners, and approximately 220 property owners have withheld approximately \$7.5 million of their debris insurance money for these qualifying expenses. Combined, the County has received paperwork/payments

from 2,221 property owners, or 60% of the total parcels affected by the Sonoma Complex Fires.

Both FEMA and CalOES were provided details on the reimbursement component of the County's Program. However, as with all programs using Federal money, the Program is subject to later audits that could potentially result in FEMA/OIG recoupment of benefits and the County needing to reverse these reimbursements. In order to minimize any potential exposure to the County for the reimbursements to property owners, the County is requiring all property owners that receive reimbursements verify that they have not received a duplication of benefits, which would be a violation of the Federal Robert T. Stafford Disaster Relief & Emergency Assistance Act.

4. FEMA Public Assistance - Sonoma Complex Fires

On November 19, 2019, your Board received an update from the Disaster Finance Team regarding the status of Federal Emergency Management Agency (FEMA) claims from 2017 Floods and Fire and 2019 Floods. This full Board item and supporting documents can be viewed at: https://sonoma-county.legistar.com/LegislationDetail.aspx?ID=4245333&GUID=13C81898-5587-4914-

5. FEMA Public Assistance Appeal

The October 2017 wildfires caused damage to curbs, gutters, sidewalks, asphalt roads, a storm drain, and a timber retaining wall. Sonoma County requested funding for repairs to these facilities, as well as to 51 damaged asphalt sites in the Mark West/Larkfield area on county roads. FEMA initially denied funding for the repairs relating to the sidewalks, curbs, gutters, storm drain and retaining wall totaling \$126,525. Sonoma County appealed FEMA's denial of the repairs. On May 24, 2019, Cal-OES informed the County, via letter, FEMA approved the appeal for \$126,525 which means the County will be receiving the funds to make the repairs.

Sonoma County has identified damage to county roads resulting from the Private Property Debris Removal operations that were conducted by the United States Army Corps of Engineers at FEMA's request. TPW was notified that FEMA has denied this request for \$18,512,123 to fund repair of 32 roads damaged by debris removal trucks. The County received the official Determination/Notice denying the Private Property Debris Removal road damage. The County sent an official appeal letter to Cal-OES on January 22, 2020.

After Transportation and Public Works (TPW) staff inquired about reimbursement for Private Property Debris Removal damaged roads, FEMA and CalOES project managers requested documentation to support the damages. TPW subsequently provided engineering estimates that included type of treatment needed and materials. Site visits were conducted with FEMA representatives, and before and after photos of each site were provided for reference.

On 5/28/2020, the County received a letter from Cal-OES dated 5/24/19 regarding the PPDR damaged roads appeal. Cal-OES has submitted the letter to FEMA with the State's recommendation not to approve the appeal. The County is not expecting to be granted the appeal and as this is the second round of appeals, the appeal options for FEMA funding have been exhausted.

2019 Winter Storms and Flooding Update Summary

On February 26, 2019, Sonoma County Supervisors declared a Local Emergency as powerful winter storms battered the county. On February 28, 2019, Governor Newsom declared a State of Emergency for Sonoma County. On April 13, 2019, Governor Newsom requested a Federal Major Disaster Declaration for the two atmospheric river storm systems that struck California in February 2019, including the County of Sonoma.

On May 17, 2019, the President declared a Federal Disaster for the severe winter storms, flooding, landslides, and mudslides for 16 counties in California, including Sonoma County, for the incident period of February 24 to March 1, 2019. This Federal Declaration allows for FEMA Public Assistance (PA) and FEMA Hazard Mitigation Grant Program (HMGP).

1. FEMA Public Assistance - 2019 Late February Storms

On November 19, 2019, your Board received an update from the Disaster Finance Team regarding the status of Federal Emergency Management Agency (FEMA) claims from 2017 Floods and Fire and 2019 Floods.

This full Board item and supporting documents can be viewed at: https://sonoma-county.legistar.com/LegislationDetail.aspx?ID=4245333&GUID=13C81898-5587-4914-

2. Funding Opportunities

- A. Assistance Hazard Mitigation Grant Program: Notices of Intent (NOI) for the DR-4434 2019 Winter Storms and Floods Hazard Mitigation Grant Program were requested by CalOES by August 9, 2019. The Board was provided NOI information prior to submission, and Board members and Department leaders provided input. Currently four applications are under CalOES review, and five NOI's have been approved.
- **B.** Assistance for Businesses Impacted by Flood: The Economic Development Board continues to help local businesses impacted by the 2019 winter storms and floods to recover by providing support to access a number of loan programs and resources.

Nor-Cal Financial Development Corporation

Nor-Cal Financial Development Corporation (FDC) is offering three loan opportunities for small businesses who incurred damages from the floods. Opportunities include:

- Disaster Relief Loan Guarantee Program, which offers up to \$1.25 million in loans to repair or replace property, inventory, supplies, and equipment, or to relocate the businesses. Interest rates for these loans are less than 9% and are negotiated with lender for up to 7-year terms. This is offered through a partnership with IBank.
- Jump Start Loan Program, which offers up to \$10,000 in quick microloans for small businesses to meet their obligations and pay their necessary operating expenses, as well as general start-up expenses. Interest rates are less than 9% with 5-year terms.
- Small Business Loan Guarantee Program, which offers up to \$20 million in loans with a maximum loan guarantee of \$2.5 million or up to 80% of the loan with 0- to 7-year terms.

<u>California Infrastructure and Economic Development Bank (iBank)</u>

The California Infrastructure and Economic Development Bank (iBank) is providing two loans.

Opportunities include:

- Industrial Development Bond Financing Program is available for all manufacturing or processing businesses and offers up to \$1 million to \$10 million in low-cost, low-interest loans for manufacturing companies to be used for land acquisition, building construction, building renovation, or equipment purchasing.
- Farm Loan Program is available for owners or operators of family farms and vineyards who are
 otherwise unable to secure a loan without a guarantee. This program provides up to \$1.4 million in
 low-interest loans for operation and production expenses, including repair or construction of buildings
 and storage facilities; purchase of equipment, livestock, seed, or fertilizer; soil and water
 conservation; or refinancing debt.

In addition, Working Solutions offers the North Bay Emergency Relief Loan Program, providing up to \$50,000 in loans to pay for obligations and operating expenses, as well as replacement/repair of equipment, inventory, or property. Working Solutions is a certified nonprofit Community Development Financial Institution (CDFI) that supports San Francisco Bay Area entrepreneurs to start and grow local businesses.

Since the floods, Nor-Cal FDC has helped connect four businesses with possible financing to be guaranteed by the state Disaster Loan Guarantee Program. Working Solutions is also assisting five businesses for possible direct loan assistance as well as giving existing loan clients a forbearance on their payments.

For additional information about loans and other resources for local businesses, go to http://sonomaedb.org/Business-Assistance/Flood-Recovery-Business-Resources/

Grants and Funding Opportunities

1. HAZARD MITIGATION GRANT PROGRAM (HMGP) - FEMA SECTION 404

The Federal Emergency Management Agency's (FEMA) Hazard Mitigation Grant Program (HMGP) helps communities implement hazard mitigation activities following a Presidential Major Disaster Declaration. HMGP funding is used to provide protection to undamaged parts of a facility or to prevent or reduce damages caused by future disasters. HMGP is managed by the State under funding provided for in Section 404 of the Stafford Act. The entire state - not just presidentially declared counties - may qualify for HMGP mitigation projects. The State receives a percentage of the total federal share of the declared disaster damage amount, which it uses to fund projects anywhere in the State, regardless of where the declared disaster occurred or the disaster type.

The cost share for HMGP is 75% federal with a 25% non-federal or County match. The County's share is projected at the beginning of the application process, and funding sources are identified before the application is submitted. In addition to some special funds (non-general funds) being used for the local match, the County also set aside \$4 million in anticipation of the local share requirement. The following table shows the estimated balance of the Resiliency Set Aside as \$1.6 million as of 7/8/20:

Grant Match	\$4,000,000
Creative Sonoma-NEA Community & Economic Redev Projects	\$118,000
Awarded Projects - match amount	
Radio Disaster Alert Devices for Vulnerable Populations	\$11,000
Advance Assistance: Wildfire Adapted Sonoma County Phase 1	\$564,170
Fire Early Warning Camera System	\$680,680
Data Center Generator	\$164,545
Operational Area Multi-Jurisdictional Hazard Mitigation Plan Update	\$83,333
Community Wildfire Protection Plan Update	\$50,000
Grant Match Balance as of 5/21/20	\$2,328,272
HMGP projects under FEMA or CalOES review	\$693,722
Estimated Set Aside Balance for Grant Match	\$1,634,550

Recent disasters that have current HMGP grant activity include:

FEMA#	Event
DR-4308	CA severe winter storms, flooding, mudslides (Feb 2017)
DR-4344	CA wildfires (Oct 2017)
DR-4353	CA wildfires, flooding, mudflows, debris flows (Jan 2018)
DR-4407	CA wildfires- Butte, LA, Ventura (Nov 2018)
DR-4434	CA severe winter storms, flooding, landslides, mudslides (Feb 2019)
FM-5278	FMAG - Camp Fire
FM-5295	FMAG Post Fire - Kincade

The "lead agency" refers to the County department or agency that is submitting the HMGP application and who is the primary grant contact.

Lead Agency	Full Name	
CDC	Community Development Commission	
DEM	Department of Emergency Management	
ISD	Information Systems Department	
Permit Sonoma	formerly Permit and Resource Management Department	
Regional Parks	Regional Parks	
SCWA	Sonoma County Water Agency	
TPW	Transportation and Public Works	

To date, \$16.3 million has been awarded, or obligated, in HMGP grant funding. Upon award, the department can begin to work on the mitigation project. Below is a summary of the projects that have received HMGP funding:

DR#	Lead Age	Project Name	Project Cost	Grant Request	Match	GF Match
AWAR	DED		•	•	•	•

			\$28,521, 907	\$16,270,324	\$12,251,583	\$1,553,728

Sixteen projects that have been approved by FEMA for a total of \$28,521,907 in project costs, \$16,270,324 in grants received, and \$1,553,728 coming from the General Fund for the required match.

County - awarded HMGP project descriptions:

DEM: Radio Disaster Alert Devices for Vulnerable Populations

\$33,000 awarded May 2020; completion by May 2023

This funding will enable the purchase and distribution of radio disaster alert devices to vulnerable populations in the Sonoma County Operational Area (OA). The system will use pre-existing infrastructure operated and maintained by the national Weather Service (NWS) to augment the Sonoma OA's alerting systems.

Permit Sonoma: Advance Assistance - Wildfire Adapted Sonoma County Phase 1

\$1,692,510 awarded March 2020; anticipated completion March 2021

This project will educate wildlife urban interface (WUI) residents in unincorporated Sonoma County about the

importance of defensible space and the principles of structural hardening, through targeted events and outreach. Outreach will be followed by comprehensive, community-wide defensible space inspections and voluntary WUI structural hardening evaluations. The project will address vegetation within 100 feet of a structure and focus on reducing the flammability of the structures themselves.

DEM: Fire Early Warning Camera System

\$2,042,039 awarded February 2020; anticipated completion February 2023

This funding will enable the County install a network of fire detection cameras throughout the County that can detect fire day or night. These cameras will provide early detection of fires and provide precise locations that can be transmitted to dispatchers and emergency operations managers immediately.

TPW: Green Valley Creek Restoration and Flood Resiliency Project - Phase 1 (DR-4308)

\$376,673 awarded January 2020; anticipated completion December 2021

This project will reduce the frequency and duration of flooding at Green Valley Road in order to address public safety risks, recurrent road and private property damage, and impacts to listed and endangered species in the watershed. This project is a joint effort between the Department of Transportation and Public Works and Sonoma Water.

CDC: Flood Elevation Program (DR-4301)

\$2,198,796 awarded January 2020; anticipated completion February 2022

The Sonoma County Flood Elevation Program elevates single and multi-family dwellings above established base flood elevation, which reduces damage to structures and prevents loss of life and property. This funding will elevate ten homes in the Russian River area. The County's Flood Elevation program has elevated 293 homes since its inception in 1997; over the years, the program has been funded by both HMGP and Flood Mitigation Assistance (FMA) grants.

TPW: County Airport Generator

\$359,460 awarded November 2019; anticipated completion September 2022

During the 2017 fires, the Sonoma County Airport experienced a total power loss and had to shut down terminal operations for two days. A reliable airport power supply will ensure continued operation of critical infrastructure, airline and security services during an emergency.

ISD: County Data Center Generator - Phase 1

\$26,584 awarded November 2019; anticipated completion August 2020

Installing a generator at the Sonoma County Data Center will ensure that emergency response and public safety systems, including 911 calls and computer-aided dispatch systems, will be available during a power

outage. Phase 1 is the design phase.

TPW: Generator Installation at Santa Rosa Road Maintenance Yard

\$186,741 awarded August 2019; anticipated completion November 2020

Installing a generator at the Santa Rosa Road Maintenance Yard will enable the facility to function as the Sonoma County Transportation and Public Works' Operation Center by providing power for critical dispatching activities during a disaster.

Permit Sonoma: Operational Area Multi-Jurisdictional Hazard Mitigation Plan Update

\$249,998 awarded August 2019; anticipated completion August 2022

The Multi-Jurisdiction Hazard Mitigation Plan will encompass a more comprehensive, regional approach to potential hazards and minimize duplication of efforts.

Permit Sonoma: Community Wildfire Protection Plan Update

\$150,000 awarded August 2019; anticipated completion August 2022

The existing countywide Community Wildfire Protection Plan will be updated with new fire and seismic data, in collaboration with Fire Safe Sonoma.

Sonoma Water: Advanced Radar Flood Warning System - Phase 1

\$110,101 awarded January 2020; anticipated completion April 2021

Precise rainfall forecasting for atmospheric rivers gives flood control managers, including Sonoma Water, emergency responders, transportation officials and media outlets more accurate information on the location, timing and intensity of expected rainfall. This funding will expand a regional flood monitoring and forecasting system to cover a critical coverage gap in Marin and Sonoma counties. Phase 1 includes final site analysis, installation design and configuration.

Sonoma Water: Seismic Rehabilitation and Retrofit of Secondary Treatment Clarifiers, Sonoma Valley County Sanitation District - Phase 1

\$195,959 awarded October 2019; anticipated completion April 2021

This project will replace the internal mechanisms of the two secondary treatment clarifiers at the Sonoma Valley wastewater treatment plant with new components designed to meet current standards for seismic resilience and to ensure operational function following a magnitude 8.0 earthquake along the San Andreas Fault. Phase 1 includes determining structural, mechanical, and demolition methods and preparing construction specifications and contract documents.

Sonoma Water: Water Transmission System Ely Booster Station Hazard Mitigation

\$2,306,867 awarded June 2019; anticipated completion June 2022

Sonoma Water's Ely Booster Station supplies water to over 310,000 residents in Marin and Sonoma counties. This project would seal electrical enclosures, elevate equipment, anchor equipment and construct a sheet pile wall to mitigate the potential for liquefaction and lateral spread in the event of a major earthquake.

Sonoma Water: Santa Rosa Creek Crossing Hazard Mitigation Project (DR-4240)

\$2,979,959 awarded November 2019; anticipated completion September 2021

This funding will enable Sonoma Water to relocate a portion of the Santa Rosa Aqueduct from an area that falls within the "very high" hazard zone for failure during an earthquake to a below-street location. A portion of pipeline that crosses under Santa Rosa Creek will be micro-tunneled under the existing bridge and concrete box culvert in which the creek currently passes.

Sonoma Water: Seismic Rehabilitation and Retrofit of Secondary Treatment Clarifiers, Russian River County Sanitation District (DR-4308)

\$2,238,402 awarded September 2018; anticipated completion September 2021

This project will replace the internal mechanisms of the three secondary treatment clarifiers at the Russian River wastewater treatment plant with new components designed to meet current standards for seismic resilience and to ensure operational function following a magnitude 8.0 earthquake along the San Andreas Fault. The funding will contribute to both the design and construction of the project.

Sonoma Water: Penngrove Sanitation Zone Lift Station Flood Resiliency Project (DR-4301)

\$350,266 awarded August 2017; \$305,920 additional funding preliminarily approved February 2020; anticipated completion February 2021

The location and design of the Penngrove Sanitation Zone Lift Station are increasingly prone to flooding during major storm events. This funding will enable Sonoma Water to lift the electrical equipment above the 500-year flood elevation level, reducing the risk of sanitary sewer overflows due to power loss.

Prior to grant award, an application goes through various stages.

Approved Notice of Intent (NOI) to apply

The initial stage of an HMGP application is an NOI, which then expands to the proposal development phase. The following projects are in this first stage of application:

Approved NOI			
DR	Lead	Project Name	Project Cost

File #: 2020-0960, Version: 1

Total project cost	\$6,020,06 5	
FM-5295	Permit Sonoma	Advance Assistance: Wild\$2,500,000 Part II
4434	SCWA	Sonoma Valley County Sa\$166,667 Update
4434	Permit Sonoma	Sonoma County Non-Stru \$200,000
4434	CDC	Sonoma County Flood Ele\$2,386,731
4434	Permit Sonoma	Russian River Flood Risk a\$200,000
4344	SCWA	Pipeline Crossing Vulnera \$166,667
4434	ISD	Critical Facility Redundan \$400,000

CalOES Review

If the initial NOI is approved, the project's scope and timeline are narrowed and the project advances to CalOES review. The following projects are currently in this stage:

CalOES Review					
DR	Lead	Project Name	Project Cost		
4434	TPW	Annapolis Road Yard and Generator	\$180,000		
4434	TPW	Forestville Road Yard Ger	\$160,000		
4434	TPW	Geyserville Drainage Feas	\$166,666		
4434	ISD	Hardening of Wireless Co	\$300,000		
4431	TPW	Rio Nido Culvert Installat	\$153,799		
FM-5278	TPW	Cavedale and Trinity Road	\$428,200		
Total project cos	\$1,388,66 5				

FEMA Approval

After CalOES review, the application is then sent for FEMA's review. The following projects are currently in this stage:

FEMA Review					
DR	Lead	Project Name Project Cos	st		
4344	Permit Sonoma	Advance Assistance: Wild\$4,639,077 Phase 2	,		
4344	TPW	Bank Stabilization to Save\$5,092,220)		
4344	CDC	Flood Elevation Program \$2,900,000)		
4344	SCWA	Improved Flood Early Wa \$2,666,700)		

File #: 2020-0960, Version: 1

	Permit Sonoma	Sonoma County Hazardo	\$4,500,000
4344	Parks	Stabilize and Re-vegetate	\$310,813
Total project costs under	FEMA review		\$20,108,8 10

Waitlist

Occasionally a project is put on hold, pending additional funding. Permit Sonoma's "Seismic Strengthening and Retrofit of Existing Structures - Sonoma Countywide," in the amount of \$6,777,777 has been waitlisted.

2. PRE-DISASTER MITIGATION (PDM)

PDM, like HMGP, is part of FEMA's overall Hazard Mitigation Assistance program. Unlike HMGP, however, PDM provides funds on an *annual basis* for hazard mitigation planning and the implementation of mitigation projects. FEMA provides funding for measures to reduce or eliminate overall risk from natural hazards. The cost share for the PDM program is 75% federal with a 25% non-federal or County match.

The following projects are in various stages of FEMA approval and review in the PDM program:

Status	Lead	Project Name	FEMA	Match
Awarded	SCWA	Potable Water after Earthquake	\$5,800,000	\$4,400,000
FEMA Review		Rio Nido Culvert Installations to Reduce Flooding *	\$127,500	\$42,500
Waitlisted	TPW	Cavedale & Trinity Roads Fuels Reduction *	\$321,150	\$107,050
Approved NOI		Advance Assistance for Villa Grande Flood Mitigation Plan	\$60,000	\$20,000

^{*} These two projects are also being considered for funding in the HMGP program.

3. PUBLIC ASSISTANCE (PA) FOR RECOVERY & RESILIENCY (FEMA SECTION 406)

The PA grant is managed by the State under funding provided for in Section 406 of the Stafford Act. This funding provides discretionary authority to fund mitigation measures in conjunction with the repair of disaster-damaged facilities and is *limited to declared counties and eligible damaged facilities*. PA is applied on the parts of the facility that were damaged by the disaster and mitigation measures to reduce the potential of future, similar disaster damages to the eligible facility. The cost share is federal 75%, State 18.75% and County 6.25%.

The following projects have received PA funding:

DR#	Lead	Project Name	FEMA	CA	Match
4434	TPW	Culvert Improvements to Reduce	\$1,251,150	\$312,788	\$104,263
		Flooding (Drake Rd)			

4434	TPW	Landslide Stabilization to Save	\$219,119	\$54,780	\$18,260
		Westside Ave			

4. OTHER DISASTER RECOVERY FUNDING

Building Resilient Infrastructure and Communities (BRIC)

Building Resilient Infrastructure and Communities (BRIC) is a FEMA grant program that will support states, local communities, tribes and territories as they undertake hazard mitigation projects, reducing the risks they face from disasters and natural hazards. BRIC is a new FEMA pre-disaster hazard mitigation program that replaces the existing Pre-Disaster Mitigation (PDM) program.

The stated FY 2020 program priorities for BRIC are:

- Incentivize public infrastructure projects
- Incentivize projects that mitigate risk to one or more lifelines
- Incentivize projects that incorporate nature-based solutions
- Increase funding to applicants that facilitate the adoption and enforcement of the latest published editions of building codes

CalOES Notice of Intent (NOI) applications were due 9/18/20, and CalOES will notify applicants if their NOI's are being considered for the full application, which is due to CalOES on 12/3/20. CalOES will then submit applications to FEMA on 1/29/21. The program has a 75% grant / 25% cost share structure. \$446M is available nationally for mitigation, with a \$50M cap per sub-application. Projects must be completed within three years and extensions may be possible with justification and approval.

CAL FIRE Funding

The Geyserville Fire Protection District, in conjunction with the Sonoma County Water Agency, received \$540,212 in Cal Fire funding on May 30, 2019 for hazardous fuel reduction projects. Additionally, Permit Sonoma's Fire Prevention Division worked with Pepperwood Preserve on their decision support system and fuels treatment CAL FIRE grant application and also provided letters of support for Fire Safe Sonoma grants for training of inspectors and community outreach materials.

Community Development Block Grant Disaster Recovery (CDBG-DR)

CDBG-DR funds are based on disaster impacts and address the long-term recovery needs of a community. U.S. Department of Housing and Urban Development (HUD) announced on April 10, 2018, that California would be receiving \$212 million to support long-term disaster recovery through the CDBG-DR program, including \$124 million for unmet recovery needs.

The State's (HCD) HUD approved Action Plan includes a budget of \$47.6 million for an owner-occupied housing program, \$66.7 million for a multifamily housing program, \$3.5 million for a Federal Emergency Management Agency (FEMA) Public Assistance (PA) match program, and \$6.2 million for administration. An additional \$38 million was recently announced for unmet recovery needs.

Additional CDBG-DR funds were recently announced in February 2020, including \$431 million for unmet

infrastructure needs resulting from 2017 disasters. Of that amount, \$38 million is allocated to California, specifically Sonoma and Ventura counties. The County is awaiting program guidelines from State HCD.

CDBG Mitigation (CDBG-MIT)

CDBG-MIT funds facilitate mitigation activities which increase resilience to disasters and decrease the impact of future disasters. The State of California has submitted an Action Plan to HUD, with notification/approval from HUD expected in Summer 2020. After HUD notification, the State will develop program guidelines for the \$88 million in CDBG-MIT funding.

Prop 84 Wildfire Resiliency and Recovery Planning

Permit Sonoma received \$187,000 in June 2020 to develop a comprehensive Sonoma County Forest Resources Ordinance, which will eventually be incorporated into the General Plan Safety Element.

Prior Board Actions:

Regular Recovery Updates have been provided to your Board since November 2017.
