

Legislation Details (With Text)

File #: 2021-1153
Type: Consent Calendar Item **Status:** Agenda Ready
File created: 10/5/2021 **In control:** Sonoma County Water Agency
On agenda: 12/14/2021 **Final action:**
Title: State of California Department of Water Resources Land Use Agreements and Groundwater Sustainability Agency Easement Agreements - Sustainable Groundwater Management Act
Sponsors: Sonoma County Water Agency
Indexes:
Attachments: 1. Summary Report, 2. Resolution

Date	Ver.	Action By	Action	Result
12/14/2021	1	Board of Supervisors	Approved as recommended	Pass

To: Board of Directors, Sonoma County Water Agency
Department or Agency Name(s): Sonoma County Water Agency
Staff Name and Phone Number: Marcus Trotta, 547-1978
Vote Requirement: 4/5th
Supervisory District(s): Fifth

Title:

State of California Department of Water Resources Land Use Agreements and Groundwater Sustainability Agency Easement Agreements - Sustainable Groundwater Management Act

Recommended Action:

- Authorize the General Manager of Sonoma County Water Agency to execute an easement agreement with the Santa Rosa Plain Groundwater Sustainability Agency for a multi-depth groundwater monitoring well.
- Adopt a resolution authorizing Sonoma Water's General Manager to execute the easement agreement; and finding that the grant of easement to the Santa Rosa Plain GSA will not adversely affect Sonoma Water in any respect.

(4/5th Vote Required)

Executive Summary:

To facilitate compliance with the Sustainable Groundwater Management Act and to develop information regarding groundwater basin conditions throughout the County, a system of monitoring and sampling wells have been proposed by the Sonoma Valley, Santa Rosa Plain, and Petaluma Valley Groundwater Sustainability Agencies (collectively, the GSAs) and the State of California Department of Water Resources (DWR). As part of this program, the Sonoma County Water Agency (Sonoma Water) and the Sonoma County Department of Transportation and Public Works (TPW) have allowed the DWR to install groundwater monitoring wells for use by the GSAs. The monitoring wells were installed under encroachment permits and revocable licenses; however, the DWR now requires that Land Use Agreements be executed to ensure the State's right to access the monitoring wells for a period of 20 years. Authority is needed for Sonoma Water and TPW to execute the Land Use Agreements on the terms requested by DWR.

In addition, three deep multi-level groundwater monitoring wells are proposed by the GSAs: one on County property maintained and controlled by TPW, one on County property maintained and controlled by the General Services Department, and one at a site owned by Sonoma Water.

A previous agenda item authorized TPW's Director and General Service's Director to execute land use agreements with DWR and easement agreements with the GSAs, in a form approved by County Counsel; and requested that the Board consider the grant of easement by Sonoma Water to Santa Rosa Plain GSA.

Discussion:

On April 25, 2017, the Sonoma County Board of Supervisors and Sonoma Water Board of Directors authorized joint powers agreements for the formation of three Groundwater Sustainability Agencies: Sonoma Valley, Santa Rosa Plain, and Petaluma Valley Groundwater Sustainability Agencies (GSAs). Staff from the eligible agencies, as defined by the Sustainable Groundwater Management Act (Groundwater Act), cooperated to develop a governance structure for these agencies. Each of the three basins have a separate Groundwater Sustainability Agency with a board made up of elected or appointed board members from the eligible agencies. The GSAs are tasked with assessing the conditions in their basins and adopting locally-based Groundwater Sustainability Plans by January 31, 2022.

To assist Groundwater Sustainability Agencies throughout the state, the California Department of Water Resources has developed a Technical Support Services program which includes funding the construction of groundwater monitoring wells. Sonoma Water prepared applications to the Technical Support Services program on behalf of the local GSAs. Previous and ongoing studies of the basins, including United States Geological Survey studies, have identified the need for additional monitoring wells to develop and implement the Groundwater Sustainability Plans. While existing monitoring networks have been developed in the basins, additional information is needed for the purposes of complying with the Groundwater Act, particularly regarding the connection between groundwater and surface water.

Through the Technical Support Services program, Department of Water Resources hired a drilling subcontractor to construct the shallow monitoring wells in the various groundwater basins. Each of the sites are located on publicly-owned property. Sonoma Water assisted the Department of Water Resources by providing specific well locations; obtaining needed access and permits; conducting necessary environmental work; and providing ongoing monitoring services. These services are within the scope of Sonoma Water's existing technical agreement with the GSAs, and are not anticipated to require additional funding. The funding provided by the Department of Water Resources for installation of the monitoring wells is estimated to be \$334,000.

As a condition of funding the installation of the monitoring wells, the Department of Water Resources requires the execution of a Land Use Agreement for each monitoring well site. The Land Use Agreements ensure the Department of Water Resources has access to the subject property for the installation, use, and monitoring of each monitoring well for a twenty-year period. Four monitoring wells have been installed on Sonoma Water property under revocable license agreements. Eight monitoring wells have been installed on County Right-of-Ways under encroachment permits. One additional monitoring well is planned to be installed in a certain County Right-of-Way in the future. An additional monitoring well is planned to be installed on County property maintained and controlled by TPW's Airport Division. A Land Use Agreement has been proposed by DWR for each of the monitoring well sites (for those existing and the proposed additional locations). The Land

Use Agreement form has been reviewed by appropriate TPW staff, including Airport staff and, with certain modifications, determined that it is compatible with County and Federal Aviation Administration requirements.

In addition to the shallow monitoring wells described above, the GSAs are requesting to install 12 deep multi-level groundwater monitoring wells to address key data gaps. Each of the three GSAs received a \$1 million grant from DWR through the California Drought, Water, Parks, Climate, Coastal Protection, and Outdoor Access for All Act of 2018 (Proposition 68), which will fund the deep multi-level monitoring wells. One well is proposed on County property maintained and controlled by TPW, one well is proposed on County property maintained and controlled by General Services, and one at a site owned by Sonoma Water. The easement agreements for each include a non-exclusive temporary easement for construction purposes to build a deep groundwater monitoring well, a long-term easement for the well itself, and a corresponding access easement to maintain the well. As for the County sites, the wells will be installed in out-of-the-way areas at existing, developed properties where existing County operations and uses will not be impacted. The site owned by Sonoma Water, along Colgan Creek, is subject to a conservation easement held by Sonoma County Agricultural Preservation and Open Space District (Ag and Open Space). A Permitted Use Notice and Request Form has been submitted to Ag and Open Space and is pending approval.

This item will have no fiscal impact to Sonoma Water, TPW, or General Services. Costs to Sonoma Water to execute the Land Use and Easement Agreements will be funded by the respective Groundwater Sustainability Agencies. The Land Use Agreement for the Airport property provides a one-time \$500 payment to TPW Airport Division for the use of the land. The other agreements and easements will be granted free of charge to the GSAs and DWR. Future monitoring and maintenance of the monitoring wells will be performed by the GSAs at no cost to County or Sonoma Water.

In accordance with Section 9 of Sonoma Water's enabling legislation, this item was considered by the Board at a previous Board Meeting with regard to the grant of easement from Sonoma Water to Santa Rosa Plan GSA, and was approved with regard to County properties.

Strategic Plan:

This item enhances the resiliency of the clean water supply in Sonoma County by contributing to sustainable groundwater management. This project involves cooperation across county agencies and with the State Department of Water Resources with the common goal of sustainably managing the County's groundwater basins.

This item directly supports the County's Five-year Strategic Plan and is aligned with the following pillar, goal, and objective.

Pillar: Climate Action and Resiliency

Goal: Goal 2: Invest in the community to enhance resiliency and become carbon neutral by 2030

Objective: Objective 1: Develop partnerships with cities, tribal governments, and private organizations regarding flood protection and sustainability to identify gaps and address climate change impacts.

Sonoma Water's Strategic Plan Alignment: Water Supply and Transmission System, Goal 1: Protect drinking water supply and promote water-use efficiency.

Sustainable management of the county's groundwater basins protects an important component of the regional drinking water supply. This project enhances Sonoma Water's ability to monitor groundwater levels throughout the county, which is necessary to sustainably manage the basins.

Prior Board Actions:

12/07/2021: Consider grant of an easement by Sonoma Water to Santa Rosa Plain GSA; Approve grant of easements to GSAs and authorize execution of land use agreements between DWR and County General Services and TPW Departments.

04/06/2021: Services for Groundwater Sustainability Agencies; Authorize Sonoma County Water Agency's General Manager to execute the Third Amended Agreement for technical, outreach, and grant administration services with each GSA to include funding from Proposition 68 grant.

12/04/2018: Services for Groundwater Sustainability Agencies; Authorized General Manager to execute agreements with Groundwater Sustainability Agencies and to extend provision of technical, outreach, and grant administration services with each GSA through the year 2022.
