**To:** Board of Directors, Sonoma County Water Agency  
**Department or Agency Name(s):** Sonoma County Water Agency  
**Staff Name and Phone Number:** Ryan Pedrotti 521-6209  
**Vote Requirement:** Majority  
**Supervisory District(s):** All

**Title:**

Implement a Stormwater Education Program with West Yost Associates, Inc.

**Recommended Action:**

In an ongoing effort to improve water quality through public education and outreach:

Authorize Sonoma County Water Agency's General Manager to execute an agreement with West Yost Associates, Inc., for Sonoma County Water Agency to implement a Stormwater Education Program through June 30, 2020, in the amount of \$40,000 (West Yost is paying Sonoma County Water Agency).

**Executive Summary:**

This item requests authorization for Sonoma County Water Agency (Sonoma Water) and West Yost Associates, Inc. (West Yost) to enter into an agreement to implement a Stormwater Education Program. Under the proposed agreement, West Yost will pay Sonoma Water to implement stormwater education programs as part of the Proposition 1 requirement (Water Quality, Supply, and Infrastructure Improvement Act of 2014). This program will include classroom presentations and field trips focusing on stormwater education for students in communities not previously receiving these programs.

**Discussion:**

HISTORY OF ITEM/BACKGROUND

The federal Water Pollution Control Act (Clean Water Act) provides the State of California Water Boards with the authority and framework for regulating storm water discharges under the National Pollutant Discharge Elimination System Permitting Program. The United States Environmental Protection Agency delegates its federal permitting program to the State of California. Cities and local jurisdictions that operate municipal storm water systems must obtain National Pollutant Discharge Elimination System permit coverage for discharges of municipal storm water into United States waters. Large and small municipal sewer system operators must comply with MS4 permits (regulations developed to minimize the environmental impact of stormwater discharge) issued by the State Water Board or applicable Regional Water Board. Education and outreach is a component of the MS4 permit.

The Russian River Watershed Association is a coalition of eleven cities, counties, and special districts in the Russian River Watershed that came together in 2004 to coordinate regional programs for clean water, habitat restoration, and watershed enhancement. West Yost is assisting the Russian River Watershed Association in meeting the primary objectives of their Proposition 1 grant to develop a regional Stormwater Resource Plan for the entire Russian River Watershed. The Stormwater Resource Plan will identify projects that maintain and

restore pre-development hydrology and improve water quality by limiting pollutants carried in storm water runoff from entering local waterways and encourage the use of green infrastructure practices to manage storm water runoff. Under the proposed agreement, West Yost will pay Sonoma Water to implement stormwater education programs as part of the Proposition 1 requirement. Sonoma Water is a member of the Russian River Watershed Association and has partnered with them on multiple regional education projects.

Sonoma Water's Water Education Program provides classroom visits, field trips, and curriculum materials for teachers and their students. The program's goal is for students to become environmental stewards and informed citizens who can examine the world through an inquisitive, scientific lens.

The Water Education Program services Russian River Watershed Association member agencies within Sonoma Water's service area, including the cities of Santa Rosa, Healdsburg, Rohnert Park, and Cotati; and the Town of Windsor. The Water Education Program includes:

1. ZunZun musical assembly program
2. Third and fourth grade classroom programs
3. Middle school classroom programs that provide hands-on STEM activities with wind and solar power
4. Annual Water Awareness Poster Contest and Calendar
5. Fifth grade classroom and field trip program
6. Climate Literacy and Understanding Global Change teacher workshops
7. Stormwater education programs

Under the proposed agreement Sonoma Water will provide stormwater education programs to students in Sebastopol, Cloverdale, unincorporated Sonoma County, and Ukiah.

#### SERVICES TO BE PERFORMED FOR WEST YOST BY SONOMA WATER

Under the proposed agreement, West Yost will pay Sonoma Water to implement a Stormwater Education Program. Services include classroom presentations, field trips, and ZunZun musical assembly programs focusing on stormwater education for students in Sebastopol, Cloverdale, unincorporated Sonoma County, and Ukiah. Stormwater education includes teaching students the connection between their streets and homes and local creeks and rivers, what types of pollution end up in waterways, and how pollution impacts water quality for aquatic life. All other students in Sonoma County were eligible for these stormwater programs previously, and this agreement allows all students in Sonoma County to access to these stormwater programs.

Under the proposed agreement, Sonoma Water will invoice West Yost for services at the same rates Sonoma Water allocates to its internal projects and programs up to a maximum of \$40,000. Sonoma Water is recovering its actual costs of providing services to West Yost with no mark-up. This agreement covers services rendered from September 1, 2019 to June 30, 2020.
