Title:

Main Adult Detention Facility Expansion Roof Replacement, Phase IV

Recommended Action:

Approve plans and specifications for Phase IV of the Main Adult Detention Facility (MADF) Expansion Roof project.

Executive Summary:

Background

The Main Adult Detention Center (MADF) expansion roof at the County Center is 25 years old and the roof is now beyond its useful life. Significant leaking from the roof and parapet gaskets has been experienced over the past several years and that has prompted the need to perform multiple repairs. Continued repairs are not feasible and a new roof is now necessary. The new roofing will be a PVC membrane cool roof enhancing the energy efficiency of the building.

This item is to approve the plans and specifications for the last phase (Phase IV) of the roof replacement project. All other phases of the MADF roof replacement project have already been completed. Phase IV represents the final phase of the MADF roof replacement.

Discussion:

The Main Adult Detention Facility building roof is very large and the estimated \$4,252,000 total cost represents a significant budget request in a single year. Therefore the reroofing project and request for funding was previously divided into four phases: Phase 1 North section in FY 2015-16, Phase 2 South section in FY 2016-17, Phase 3 East and west sections in FY 2017-18 and Phase 4 Expansion in FY 2019-20. Funding for Phase 4 was appropriated for the Criminal Justice Fund in the FY19/20 Capital Project Budget in the amount of \$1,137,550. The roof replacements each have an anticipated life of approximately 15 to 20 years. Although phasing the MADF roof replacement project exposed the total project cost to cost escalation over five years, there was no other alternative financing mechanism identified in FY 2014/15 when the project was launched.

Project Description:

This portion of the project will re-roof the Expansion section of the MADF, of approximately 29,953 square feet. The old roofing and insulation will be completely removed to the concrete decking and new insulation with a PVC cool roof membrane will be installed. All expansion joints in the Expansion building section will be

replaced and a metal parapet capping will be added to the tops of all the walls to prevent water from seeping into the block walls.

The plans and specifications for the roof replacement project were developed and certified by design consultants and licensed architects Nichols, Melburg and Rossotto. General Services' Facilities Development and Maintenance staff have reviewed the plans and specifications and recommend their approval.

Public Bid:

The current schedule calls for a notice inviting bids for the MADF Expansion Roof Replacement Phase 4 project to be issued end of November, 2019. A mandatory pre-bid conference would be held mid-December. The bid opening would then be held in early January, 2020.

Schedule:

The work is scheduled to start in March, 2020 and it is anticipated to be completed in July, 2020. The project is anticipated to take 120 days to substantial completion.
